Jennifer Sharkey updated the Commissioners on the status of the bridge work. She said that the maintenance and rehab work has been completed on 18 bridges and 4 small structures. Ms. Sharkey said that there are still 15 bridges and 1 small structure that has work remaining.

Ms. Sharkey asked if there has been any more discussion regarding taking the fiber connection to the Highway Barn. Lynne Liechty stated that doing so would cost $9,000.00. Ms. Sharkey said that at this time she believes it would be beneficial so the Highway Barn is on the County network. She said currently they do not have access to electronic files such as the GIS database for updates, they don’t have data backup and they are on a separate phone system. Ronald Smith stated that the Commissioners set aside money in Major Moves for this project. Lynne Liechty made the motion to have iMAN install the fiber connection to the Highway Barn. James Crowl seconded that motion and the motion carried with three (3) ayes.

Emmett Heller, Highway Superintendent, informed the Commissioners that they finished their chip and seal projects last Tuesday and are working on installing gravel berms.

Mr. Heller said that they made repairs to the salt barn last week as well.

Mr. Heller stated that sometime within the next thirty (30) days they hope to finish the paving projects.

Emmett Heller stated that at the last Council meeting the funds were approved for the purchase of two (2) dump trucks. Jeff Rysenga, Lane 890B Snow Lake, along with Gene Huss and Tim Gorman came to the Commissioners with a petition to convert 890B from a private road to a public road. Mr. Rysenga stated that their lane is private; however, the other lanes surrounding them are county owned. He said that they have done things in the past to keep the dust down and when the County did the paving, it made a large transition at the end of the lane. He said that it is inconsistent to have 890B as a private road as it has the same 40’ right of way as the other lanes that are county owned. Mr. Rysenga also stated that the cul-de-sac has the same 40’ radius as Lane 890 and 880 which are county owned.

Jennifer Sharkey stated that she met with Mr. Rysenga and walked the area and according to the ordinance in place, lane 890B does not meet the minimum requirements.

James Crowl said that if this is done, it will be opening up a can of worms for many other places that have a yellow sign on their private road. Commissioner Crowl said that the advice of the Engineer should be followed. Lynne Liechty said that she can see both standpoints.

Jennifer Sharkey said that if a property owner or association would like to bring their roadway within the specifications that are stated, there would be another review process. Ms. Sharkey said that on this particular situation there is a concrete driveway that extends into the right of way that has a curb and currently all of the drainage goes onto private property into a drain and then tiles out to the lake.

Ms. Sharkey said that the residence of 890C opted to have the same contractor that the Highway used pave their lane, but it was a separate contract that the property owners paid for.

Ronald Smith stated that the Commission Board would be open to hearing if the residents of 890B want to work with the Highway Engineer to get the lane up to specifications, but there would still be a final review if and when the lane is brought up to specs. Jennifer Sharkey stated that bringing the lane up to specs would be very involved.
