

Appendix III

Tree Fact Sheets and Locations

The numbers listed below are based on 70,000 planted and available planting sites located within the street lawn. These numbers will be updated upon completion of the Tree Inventory. The specifications in Action 2: Master Planting Design mandates the following criteria be met to avoid a monoculture planting:

Establish and maintain a diverse population of trees by adhering to the following targets:

- 30% from one Family = 21,000 trees
- 20% from one Genus = 14,000 trees
- 10% from one Species = 7,000 trees
- 5% from one Cultivar = 3,500 trees

Master Planting Design relating to segments of trees:

- Single variety shall not exceed 8 segments
- A goal of 8 segments between the same cultivar or a minimum of 6 segments between the same cultivar
- A goal of 6 segments between the same species or a minimum of 4 segments between the same species
- A goal of 4 segments between the same genus or a minimum of 2 segments between the same genus
- A goal of 2 segments between the same family or a minimum of 1 segments between the same family

Enclosed in this appendix are fact sheets of each tree variety listed in the Master Tree List accompanied by a detailed listing of their location, limits, and quantity within the City of Akron.
