

# City of Akron 2024 Resurfacing Program

In **2024**, Akron will be **resurfacing a total of 70 centerline miles of pavement** including **50 carryover miles** from the **2023 resurfacing program**. By **focusing primarily on the carryover work**, the city will be able to **get the program caught up** and **start 2025 fresh** with a **full program completed** on an **efficient, annual basis**.

**Akron has budgeted \$3,975,000** for this year's program for **resurfacing** and approximately **\$2.9M for equipment replacement**. The **resurfacing program does not include concrete or brick roads** scheduled for repair since **they are not utilizing asphalt** however the list does separately show the **concrete roads in the patch and match program for 2024**.

# City of Akron 2024 Concrete Patch & Match Program

The **Concrete Patch and Match Program** is not an overall replacement of the entire pavement, but replacement of individual concrete slabs (or blocks) that are needed. Each slab is around 10' x 12'- 18' depending on the street. Each road segment is evaluated and a determination is made which segments need to be replaced in order to improve the overall condition of the road. It could just be 1 slab that needs replaced or multiple.

# Resurfacing Program

## Crack Sealing & Rejuvenation

### **Crack Sealing:**

Crack sealing involves applying elastic material into pavement cracks to prevent or reduce the intrusion of water. This helps extend the pavement life.

### **Rejuvenation:**

Rejuvenation is a chemical process that replaces lost bitumen oils in the roadway which helps protect the pavement and extend its lifespan.
