10. CLOSED MEETING

11. MOTION TO ADJOURN OR CONTINUE MEETING

VIRGINIA: AT A REGULAR MEETING OF THE COUNTY OF AMELIA BOARD OF SUPERVISORS HELD AT THE AMELIA COUNTY HIGH SCHOOL ON WEDNESDAY, MAY 18, 2022.

PARTICIPANTS:

DAVID M. FELTS	District 1
DEXTER JONES	District 2
SHAUN WEYANT	District 3
H. JOSEPH EASTER, IV	District 4
TODD ROBINSON	District 5

Board of Supervisors

A. TAYLOR HARVIE, III, County Administrator
BRENDA ARTHUR, Assistant Administrator
HOLLY P. STEELE, County Planner
JEFF GORE, County Attorney

Chairman Felts called the May 18, 2022 Regular Meeting of the Amelia County Board of Supervisors to order at 7:00 P.M. and determined there was a quorum with all five members participating. Supervisor Felts offered the invocation and everyone joined in the Pledge of Allegiance.

CONSENT AGENDA

- The agenda was amended to remove budget amendments.
- The following minutes were approved with changes on a motion by Supervisor Easter:
 - April 20, 2022 Regular Meeting
 - April 28, 2022 Continued Meeting
- The April Financial reports were approved on a motion by Supervisor Weyant.

PUBLIC COMMENTS

- Laura Walsh asked “what’s gonna happen” to the Commissioner of the Revenue when the County administrator pushes her out.
- Suzy Gunter spoke about a flash drive that has been distributed to citizens in the County.
- Grace Weyant expressed her displeasure with the comments made at the April budget meeting regarding her and husband, Shaun Weyant.

- Lee Walsh commented on the information on a flash drive and accused the county administrator and finance director of lying about his wife to the Virginia State Police,
- Diana Morris stated that the proposed solar farm would reduce the value of adjoining property.
- Paul Hill spoke in opposition to the solar farm.
- Robby Parsons said the solar farm would “devalue” his property.
- Bobby Lipes said he was not for or against solar farms and believed property owners should be able to do what they want with their property but he thought solar panels was a fad.
- Amber Shaffer reiterated her knowledge and experience with IT.

STAFF/COMMITTEE/ORGANIZATIONAL REPORTS AND PRESENTATIONS

- The Honorable Thomas Stark, IV shared plans for District Court Expansion. He announced that Melissa Gill, Clerk of the General District Court and Juvenile Domestic Relations Court, had been named Employee of the Year and recognized her for her outstanding service not only to Amelia but oversaw Powhatan General District Court when their clerk became ill.
- Rebecca Worley, of VDOT, gave a report on road projects in the County.
- Dr. Harper and Carly Bullock reported on Amelia School Board activities and financial reports. A supplemental appropriation was approved on a motion by Supervisor Easter.
- The Board reported on meetings they have attended.

COMMUNITY DEVELOPMENT

- Following last month’s public hearing, on a motion by Supervisor Easter, the Board unanimously approved the conditional rezoning requested by Roy Lanford to operate a cement plant.

OLD/NEW BUSINESS

- On a motion by Supervisor Easter, the Board unanimously approved the acceptance of the VATI grant.
- On a motion by Supervisor Robinson, the Board unanimously approved the signing of the ground lease for the Manboro Tower.

- The Board requested County Attorney to update the Technology Systems and Social Media Policy and bring it back to the June meeting. Supervisor Easter also requested that the county document a written policy for surplus items and bring it to the Board for review.
- No action was taken on a request for cash match for GoVirginia Enhanced Capacity Grant.
- On a motion by Supervisor Easter, the Board approved a special event permit to hold a Lavendar Festival, with no fees from the Amelia County Rescue.
- Rebecca Worley, of VDOT, presented on overview of the Secondary Six-year plan. Supervisor Felts motioned to have Stoney Point road added and the Board unanimously approved. A resolution will be drafted and a public hearing will be held.
- After no one spoke at the public hearing, and on a motion by Supervisor Easter, the Board approved the Revenue Sharing Ordinance, allowing the County to assess fees to certain solar energy projects in accordance with Virginia State Law.
- A public hearing was held for a special exception permit for Amelia Energy Facility, LLC. Diana Morris, Trisha Patton, Paul Hill, and Bobby Lipes spoke in opposition to the solar project. Justin Wade and Martin Konkel spoke in support of the project. Supervisor Robinson motioned to defer voting until the June meeting to consider all information that was presented.
- A public hearing was held for the siting agreement. No one spoke and the Board unanimously agreed to defer action for 30 days.

COUNTY ADMINISTRATOR'S REPORT

- The host fee check from Waste Management for April 2022 was \$263, 578.21.
- CRC submitted the April Items of Interest.
- DMV Select submitted financial reports for March 2022.
- Columbia Gas of Virginia submitted a request for rate increase.
- Certification of No Objection from the Attorney General's Office was submitted.
- A Supplemental Appropriation for Rolling Meadows was shared with the Board.

BOARD MEMBERS COMMENTS/REPORTS

District 1-The Honorable David M. Felts

Supervisor Felts said he thought it was a good meeting with no personal attacks.

District 3-The Honorable Shaun Weyant

Supervisor Weyant thanked everyone for their support. He spoke about appreciation for his wife.

District 4-the Honorable H. Joseph Easter, IV

Supervisor Easter spoke about his family being attacked and found it ironic to have a board member talk about pot stirring and then doing it.

District 5-The Honorable Todd Robinson

Supervisor Robinson thanked RJ Smith for the work at the Soccer field at no charge to the County. He talked about pot stirrers.

MOTION TO ADJOURN/CONTINUE MEETING

There being no other business, the May 18, 2022 Regular meeting was adjourned.

ATTEST:

Minutes Approved: June 15, 2022

A. Taylor Harvie, III
Amelia County Administrator

David M. Felts, Jr., Chairman
Amelia County Board of Supervisors

WHEREAS, Section 33.2-332 of the Code of Virginia, permits the hard surfacing of certain unpaved roads deemed to qualify for designation as a Rural Rustic Road; and

WHEREAS, any such road must be located in a low-density development area and have no more than 1,500 vehicles per day; and

WHEREAS, the Board of Supervisors of Amelia County, Virginia ("Board") desires to consider whether the following roads should be designated as Rural Rustic Roads:

Stony Point Road (Route 620),
From: Reed Rock Road (Route 621)
To: Cumberland County Line

WHEREAS, the Board is unaware of pending development that will significantly affect the existing traffic on these roads; and

WHEREAS, the Board believes that these roads should be so designated due to its qualifying characteristics; and

WHEREAS, these roads are in the Board's six-year plan for improvements to the secondary system of state highways.

NOW, THEREFORE, BE IT RESOLVED, the Board hereby designates these roads Rural Rustic Roads, and requests that the Resident Engineer for the Virginia Department of Transportation concur with these designations.

BE IT FURTHER RESOLVED, the Board requests that these roads be hard surfaced and, to the fullest extent prudent, be improved within the existing right-of-way and ditch-lines to preserve as much as possible the adjacent trees, vegetation, side slopes, and rural rustic character along the road in their current state.

BE IT FURTHER RESOLVED, that a certified copy of this resolution be forwarded to the Virginia Department of Transportation Resident Engineer.

And further, the Board adopted the following resolution:

WHEREAS, the Amelia County Board of Supervisors and the Virginia Department of Transportation (VDOT) have conducted a public hearing on the FY2023 through FY2028 Secondary Road Six-Year

Improvement Plan; and

WHEREAS, the Board concurs with the proposed projects identified in the Plan.

NOW, THEREFORE, BE IT RESOLVED that the Amelia County Board of Supervisors approves the FY2023 through FY 2028 Secondary Road Six-Year Improvement Plan, as attached and presented by VDOT.

And, further the Board adopted the following resolution approving the FY2023 Secondary Road Improvement Budget:

WHEREAS, the Virginia Department of Transportation (VDOT) has submitted its proposed FY2023 Secondary Road Improvement Budget to the county; and

WHEREAS, the Budget represents the implementation of the first year of the FY2023 through FY2028 Six-Year Secondary Road Improvement Plan adopted by the Board.

NOW, THEREFORE, BE IT RESOLVED that the Amelia County Board of Supervisors approves the FY2023 Secondary Road Improvement Budget as presented by VDOT.

Adopted this 10th day of November 10, 2021 by the Amelia County's Board of Supervisors during their Regular Meeting.

MEMORANDUM:

TO: Amelia County Board of Supervisors

FROM: Melody Foster, Executive Director

SUBJECT: Request for Cash Match – GO Virginia Enhanced Capacity Building Grant
To fund Business Plan for the Creation of a CRC (footprint) Regional Economic
Development Organization (REDO)

DATE: May 2, 2022

As you are aware we have hosted numerous meetings to discuss the creation of a new Regional Economic Development Organization (REDO) in the CRC region. Following input and a White Paper on the subject developed by GO Virginia staff, the CRC board of directors have given the go-ahead in moving forward with actions to create this NEW organization. To be clear, this will be a separate NEW organization with its own staff and board of directors, not a part of the CRC.

The Commonwealth Regional Council (CRC) will be applying for \$100,000 in GO Virginia Enhanced Capacity Building Grant funds to fund a Business Plan for the Creation of a New Regional Economic Development Organization (REDO) for the CRC footprint counties & Longwood University (partner). See attached Grant Request Summary Sheet.

The GO Virginia Region 3 Council has identified a new REDO as a priority for the CRC region and has already earmarked grant funds for this planning project.

The CRC is requesting that all seven counties within the CRC foot print and Longwood University (as a partner) provide a cash match of \$2,500 for this grant request. The CRC will be providing a \$10,000 cash match as a show of financial commitment to the creation of this new organization. Each county and Longwood University will also be asked to provide in-kind cash match through participation on the advisory committee and staff time. The advisory committee will oversee the development of the project from start to finish.

The CRC plans to submit the GO Virginia Enhanced Capacity Building Grant in June and therefore, needs to have the commitments of all seven counties and Longwood University in order to proceed.

Please let me know if this request for a Cash Match of \$2,500 will be provided by Amelia County.

GO Virginia Enhanced Capacity Building (ECB) Grant Application (Summary)

Grant Applicant: Commonwealth Regional Council

PROJECT NAME: Business Plan for the Creation of CRC Regional Economic Development Organization (REDO)

Project Elements:

- Creation of Business Plan to Stand-Up NEW REDO in CRC region to include Longwood University as a partner.
 - **NEW REDO Business Plan and Strategy Design:**
 - Conduct SWOT Analysis of Regional Capabilities
 - Conduct Market Demand Analysis
 - Conduct Site & Building Inventory Analysis
 - Creation of Board and Operational Structure Design including Legal Structure
 - Develop Vision, Goals and Strategy Framework
 - Develop Budget and Financial Sustainability Plan for 3 Years, including Fund Raising Campaign framework

Project Goals:

The localities of the Commonwealth Regional Council footprint, through a series of critical discussions, desire a strategic reset of goals, priorities, focus and support to better reflect changes in the economic development landscape and to launch a NEW REDO in an effective and sustainable manner. The goals of this Enhanced Capacity Building project are:

- Complete an inclusive and collaborative process that results in a collective determination of the value of launching a Regional Economic Development Organization (REDO) that is financially sustainable and produces a return on investment for local members in terms of stronger economies.
- Complete a business plan that incorporates organizational, program, and budget recommendations with defined measures of success.

Grant Funding Request:

GO Virginia matching requirements 2/1 with an expectation of an in-kind/cash match.

Grant Funding Request: GO Virginia: \$100,000

Match: \$50,000

Cash match: \$2,500 per locality & Longwood - \$20,000

CRC Cash Match - \$10,000

\$30,000 Cash Match

In-Kind match: Localities, Longwood & CRC -
Staff/Advisory Committee

\$20,000 In-Kind Match

\$50,000 Match (Total Cash & In-kind)

April 15, 2022

Congresswoman Abigail Spanberger
1431 Longworth HOB
Washington, DC 20515.

Dear Rep. Spanberger;

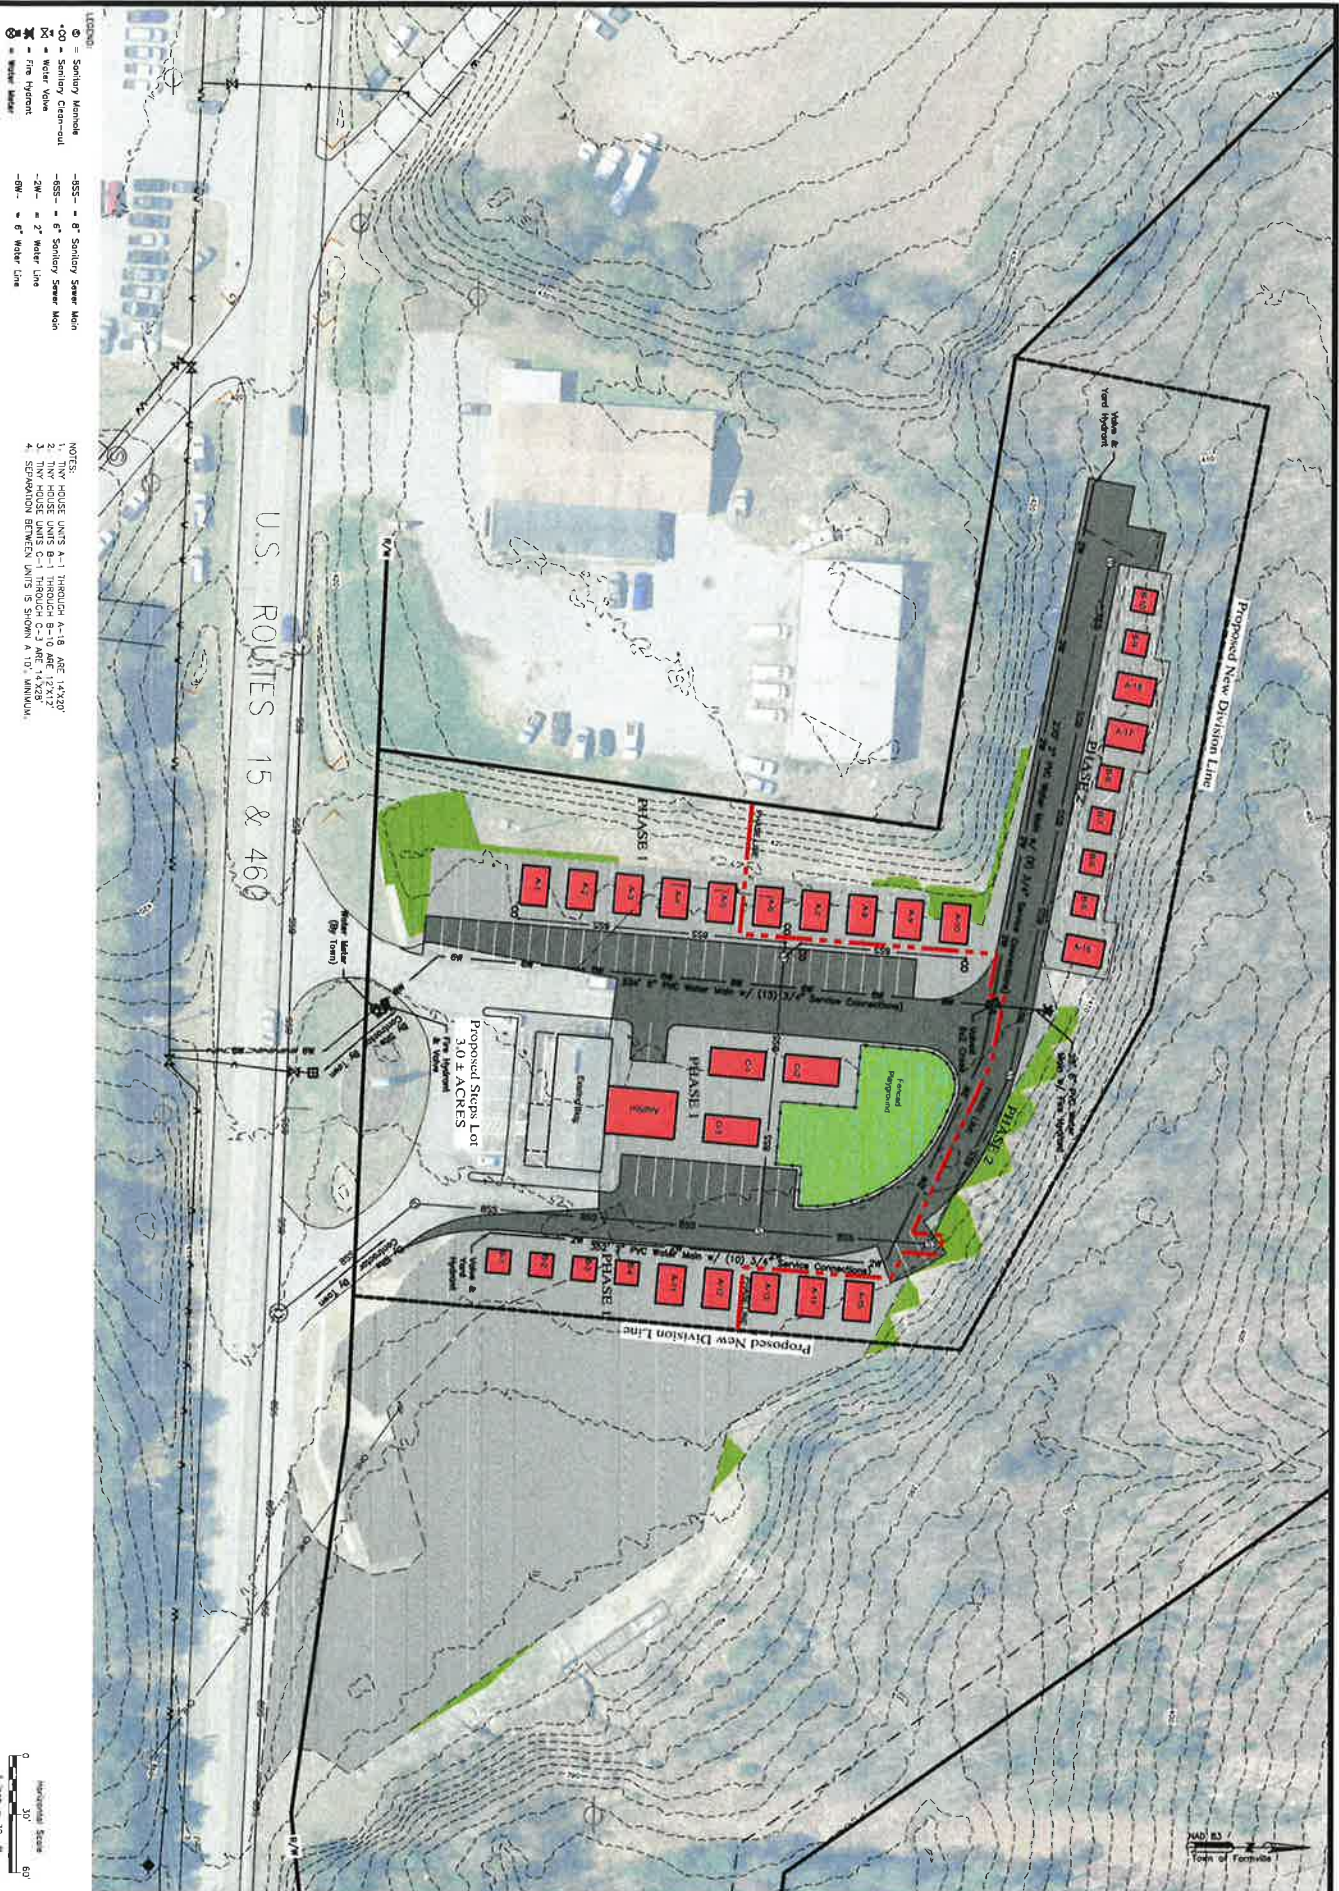

Amelia County is in full and complete support by the Grant Application from STEPS, Inc. for the Housing Grant. Listed below are six of the many reasons that the Board of Supervisors is in support.

- STEPS is Amelia County's Virginia Homeless Solutions provider through the Virginia Department of Housing and Community Development.
- Amelia County has no access to a homeless emergency shelter in the region, with all potential shelters located outside the region. STEPS is working with Amelia County to implement a critically needed solution to this problem.
- No accessible shelters in the region can cause significant issues with resolving homeless situations that local police and human service agencies in your county are responding to.
- In FY 2021, 368 individuals in 191 households in the region were sheltered in local hotels by STEPS, and in the current year we have already sheltered 326 individuals in 181 households with the use of COVID related funding. Each county in the region needs and utilizes these homeless services.
- STEPS has facilitated planning with the region's Homeless Housing Taskforce to propose a 1,380 square foot community center surrounded by 11 tiny homes on 3 acres. Current cost estimates are \$820,344 for all aspects of construction and \$500,000 for purchase of property with an existing office building located in Farmville. This provides access to town water and sewer and public transportation.
- This tiny home village emergency shelter will be a far more efficient and effective way to provide the support services necessary to assist county citizens with getting established in permanent housing. Funding for motel sheltering will also be significantly reduced with the expiration of COVID related funding.

Please give this application your strongest attention as it will help fill a vital hole in the net that the County has for the homeless.

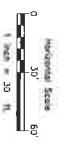

Respectfully,

A. Taylor Harvie, III

 Composite Master Base Map

STEPS, Inc. Homeless Housing Proposal

Introduction

As the counties of the region plan and implement their response to the health, economic, and housing effects created by the COVID-19 pandemic, the community partners who provide services to the county and its citizens have joined together in planning for and serving the homeless of the region. The counties of the Heartland Planning Group include Amelia, Buckingham, Cumberland, Lunenburg, Nottoway, and Prince Edward. The Homeless Housing Task Force facilitated by STEPS, Inc. is proposing to partner with the counties of the region in providing emergency sheltering, support services, and permanent supportive housing to mitigate the effects of the pandemic and strengthen compliance with COVID-19 health precautions. In addition, the services offered by the shelter staff and partners will help citizens to assimilate into the job and housing market as they exit sheltering services.

Homeless Service Provision Needs During the Pandemic

During fiscal year 2021, STEPS provided emergency sheltering for 368 individuals in 191 households. This is compared to 191 individuals in 86 households for fiscal year 2020. This was a large increase over the numbers previously sheltered due to the impact of COVID on the economy with numerous lay-offs and shut-downs that had the greatest impact on those who are in poverty. In addition, the need for stability of housing during a pandemic is even more critical for homeless individuals and the community at large to slow the spread of COVID. Information obtained from national leaders in a recent webinar provided by the *Center for Homeland Defense and Security* strongly outlines the need for non-congregate sheltering to the extent possible during the pandemic, which is now anticipated to extend into 2022. This is in contrast to the more traditional bunk style buildings. Localities are exploring options such as purchasing existing hotels or other buildings that allow for separate sleeping space, and the construction of tiny homes.

The homeless need the support of our community and available services as they find themselves in crisis, often staying in their cars or other places not meant for human habitation. The homeless citizens being served by STEPS often present with multiple barriers including disabling conditions, being aged, families with children, or other crisis situations. It is essential that these individuals are able to be temporarily and safely housed while they work on plans that include employment, assuring their children's education is maintained, being screened for long-term care services when applicable, and searching for permanent housing. It is extremely difficult to function in life, education, and work without stable housing. Currently there is no emergency homeless shelter in the region, so STEPS is only able to pay for motel stays to house individuals and refer them to shelters outside the region when funds are insufficient to continue motel sheltering. This service delivery model is both inefficient and insufficient as a standalone model of emergency sheltering for the homeless.

Strategy to Meet Housing Needs

This region has come together to plan for the construction and operation of a non-congregate emergency shelter and permanent supportive housing that will be necessary to mitigate the effects of COVID-19 and enable compliance with COVID-19 public health precautions. The construction of tiny homes surrounding a

STEPS, Inc. Homeless Housing Proposal

central community center will be an effective way to accomplish these objectives. Representatives from the Town of Farmville, Commonwealth Regional Council, Centra Health, Southside Virginia Electric Cooperative, several community service providers, local churches, and STEPS have come together to develop these plans. This Homeless Housing Task Force has reviewed three programs in other areas of the country that provide temporary housing through the use of tiny homes.

The Task Force's plan is to initially start with eleven homes for emergency shelter, three homes for permanent supportive housing, and a 1,380 square foot community center. The community center will have a kitchen, space for serving food, large room for meetings, staff/security offices, and laundry facilities. Of the eleven tiny homes, there will be four 12 X 12 homes for individuals and seven 14 X 20 homes for families. Three additional tiny homes will be constructed for permanent supportive housing for a total of 14 homes. More tiny homes will be added to the layout as additional funding is received.

Buggy Top in Cumberland has completed an estimate for these tiny home sizes, which is \$11,056.50 for the 12 X 12 and \$16,742.70 for the 14 X 20. These estimates include the delivery and anchoring of the buildings. All buildings will be temperature controlled with mini-split systems estimated by Massie Wood and West to cost \$2,600 per unit. It is important to note that this pricing was based on costs prior to the escalation we are experiencing at this time.

Emergency Shelter/Permanent Supportive Housing Location

The tiny home village will be located in the Farmville area as it is central to the region. This location allows for the easier access to employment and supportive services. The public bus service for individuals who do not have their own transportation is critical to their independence.

Emergency Shelter Tiny Home Plans

A draft set of plans for the emergency shelter tiny homes is attached to this proposal. The homes will be 12 X 12 for single occupants, and 14 X 20 for families. The homes will contain the following features:

1. Insulated floor, walls, and ceiling
2. Plywood walls for durability/painted
3. Double plywood floor
4. Wiring for 6 outlets and split system (see below)
5. Front and back door
6. Toilet, sink, shower
7. Split system that does heating and air conditioning (electric); no duct work required
8. Small kitchen area with sink, mini-fridge, and microwave
9. Outside lighting

Furnishings for these homes will include a 1.2 cubic foot capacity microwave (1100 watts), 3.1 cubic foot mini refrigerator, dining table, chairs, twin and queen panel beds with mattress, and an end table.

STEPS, Inc. Homeless Housing Proposal

Essential Services Provided to Tiny Home Village Residents

Homeless individuals from the region will be able to shelter in these tiny homes temporarily and receive services that will assist them in pursuing employment and permanent housing options. The services below will be provided by STEPS staff through operational funding from state and local sources and partner agencies whose have expertise and mission in these areas:

- Food
- Health care
- Case management
- Employment services
- Housing search and placement
- Transportation
- Security
- Rapid re-housing/utilities - DHCD funded
- Mental health services
- Substance abuse services
- Replace/secure identification
- Long-term care screenings

Emergency Shelter Funding Request

STEPS estimates that the cost of building this shelter is \$820,344 (exclusive of land acquisition) for the construction of a community center, eleven tiny homes, water and sewer costs, site preparation, and furnishings as outlined below:

1. 1,380 square foot community center with offices, meeting room, kitchen, and laundry totaling \$236,738.
2. Four 12 X 12 homes at \$13,656.50 per home totaling \$54,626.
3. Seven 14 X 20 homes are estimated at \$19,342.70 per home totaling \$135,399.
4. Water/sewer and site preparation costs are estimated to by Maxey and Associates to be \$260,395.
5. Furnishing costs are estimated below for a total of \$26,185.
 - Microwave 1.2 cubic ft. (1100 watts) \$110 per unit totaling \$1,210
 - Mini-refrigerator with freezer- 3.1 cubit ft. \$150 per unit totaling \$1,650
 - Eleven twin panel beds with 1 storage drawer \$525 per bed totaling \$5,775
 - Eleven twin mattresses in a box \$190 per mattress totaling \$2,090
 - Seven queen panel beds with 4 storage drawers \$925 per bed totaling \$6,475
 - Seven queen mattresses in a box \$265 per mattress totaling \$1,855
 - Eleven end tables \$240 per table totaling \$2,640
 - Sixteen sets of two side chairs \$150 per set totaling \$2,400
 - Four small dining tables \$155 per table totaling \$620
 - Seven family dining tables \$210 per table totaling \$1,470

STEPS, Inc. Homeless Housing Proposal

Due to the rising costs for building materials since the initial construction estimates were obtained, a 15% contingency has been factored into the above estimated costs to arrive at the total of \$820,344. Updated cost estimates will be sought when the start-up of construction is closer.

Permanent Supportive Housing Funding

The GG Wade Charitable Trust has awarded \$50,000 towards the construction and furnishing of three additional tiny homes for permanent supportive housing. A \$50,000 match was also pledged by a local donor towards the costs of these homes for a total of \$100,000. This funding is in addition to the funds being requested above for the construction of the emergency shelter homes.

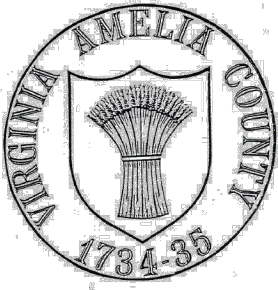

The homes will be larger than the shelter homes since this program will allow for longer stays than emergency shelter. Two 14 X 28 homes for families, and one 14 X 24 home will be built for singles. These homes will contain more kitchen appliances such as a full refrigerator and stove.

AMELIA COUNTY DEPARTMENT OF COMMUNITY DEVELOPMENT SUMMARY REPORT

Meeting Date: June 15, 2022

Subject: Amelia Energy Facility, LLC; Special Exception Permit request to establish a utility-scale solar farm.

Summary of Information: Attached to this summary report is the application and supporting documents from **Amelia Energy Facility, LLC** (the “Applicants”), request a Special Exception Permit for a utility-scale solar farm on 1,103 acres. The subject properties, which are owned by JoAnn S. Webb, William L. Scott, Leander O. Scott, Jr., and Susan C. Wade, and are located east of Route 640 (Buckskin Creek Road), north of Route 649 (Old Court House Road) and west of Route 607 (West Creek Road) and are identified as Tax Map Parcels 41-19, 54-4, 54-2-14, 54-2-16, and 54-2D on the Amelia County Real Property Identification Map. The Amelia County Comprehensive Plan shows this property is located in the Rural Preservation Area.

Amelia Energy Facility, LLC is requesting a Special Exception Permit to establish a utility-scale solar array on 5 parcels with a total combined acreage of 1,103 acres. According to the exhibits provided in the Special Exception Permit application, of the 1,103 acres, panels will only be placed on approximately 630 acres. The rest of the land will be used to achieve a landscape buffer and required setbacks.

Since the December meeting when the initial application for this project was considered, the applicants have made several changes to their proposal and site layout. Seven parcels have been removed from the project and removal of these parcels has almost completely eliminated any cropland that was initially being converted to panels. The parcels in this proposal are largely forested and the only non-forested land is that lying near Buckskin Creek Road. In addition, the project has been pulled back off of Poorhouse Road, West Creek Road, and Dennisville Road. There will be limited visibility of the project on West Creek and Buckskin Creek Roads and no visibility from Dennisville, Poorhouse, or Old Court House Road.

If approved, the applicants will be subject to the following standard conditions, per Article XXXIV of the Amelia County Zoning Ordinance:

1. Compliance with Building & Electrical Codes. All Solar Energy System components shall conform to the requirements of the National Electrical Code and State Building Code. All Small Solar Energy Systems used for residential purposes, all large Solar Energy Systems and all Utility Scale Solar Energy Systems shall be inspected by a county building inspector through the building permit process.

SEP APPLICATION NUMBER: SEP22-02

2. Installation and Design. Solar Energy System components shall have a UL listing and must be designed with an anti-reflective coating. Individual arrays/panels shall be designed and installed in order to prevent glare toward buildings on adjacent properties and vehicular traffic.
3. Location. No Utility Scale Solar Energy System shall be located within one (1) mile of a village development area.
4. Density. No more than three percent (3%) of the land area in any given five-mile radius shall be approved for use as the project area for Utility-Scale Solar Energy Systems. For the purpose of calculating density, the project area for a Utility-Scale Solar Energy System shall consist of the entire fenced-in area and the required landscaped buffer zone.
5. Setbacks. Large Scale Solar Energy Systems and Utility Scale Solar Energy Systems shall conform to all minimum building setback requirements for principal structures of the zoning district in which they are located, or fifty (50) feet, whichever is greater, unless otherwise prescribed by the Board of Supervisors as a condition of approval for a Special Exception Permit.
6. Height. Solar Energy Systems & equipment shall not exceed twenty-five (25) feet in height when ground mounted as measured from the highest grade at the base to the top of structure. Excluded from this requirement are utility poles and transmission lines. Roof mounted systems shall not exceed the maximum height requirements for the applicable zoning district by more than four (4) feet.
7. Lighting. Lighting shall be limited to the minimum necessary and shall meet all requirements of this ordinance.
8. Utility Connection. No Utility Scale Solar Energy System shall be installed until evidence has been provided to the County that the owner has been approved by the utility company to interconnect.
9. Screening and Fencing for Utility Scale Solar Energy Systems. Utility Scale Solar Energy Systems shall be enclosed by security fencing not less than six (6) feet in height equipped with an appropriate anti-climbing device. The entire facility, including fencing, shall be screened from ground-level view of adjacent properties by a landscaped buffer zone at least 25 feet wide consisting of an evergreen and deciduous mix as approved by the Zoning Administrator, unless otherwise prescribed by the Board of Supervisors as a condition of approval for a Special Exception Use Permit. Existing mature tree growth and natural land forms on the site shall be preserved to the maximum extent possible and may be used in whole or in part to provide the required screening if they provide adequate screening from public view as determined by the Zoning Administrator. In the event that existing vegetation or landforms providing screening are disturbed, new plantings shall be provided which accomplish the same.

SEP APPLICATION NUMBER: SEP22-02

10. Noise Limits for Utility Scale Solar Energy Systems. After completion of construction, noise levels measured at the property line shall not exceed 50 dbA, unless the owner of the affected adjacent property has given written agreement to a higher level.

11. Signage for Utility Scale Solar Systems. Appropriate warning signage and a 911 address sign shall be posted in a clearly visible manner. Warning signage must identify the owner and include a 24-hour emergency contact phone number.

12. Site Maintenance for Utility Scale Solar Systems. Weed control and mowing shall be performed in accordance with an approved site management plan.

13. Repair of panels. Panels shall be repaired or replaced when in visible disrepair. Such repairs shall also include the restoration of non-reflective finish per manufacturer specifications.

In addition to the 13 standard conditions dictated by the Amelia County Zoning Ordinance, I would like to propose three additional conditions:

14. There shall be no battery storage permitted.

15. The maximum acreage under panels shall not exceed 650 acres.

16. Work shall only be performed from dawn until dusk.

17. Decommissioning, Periodic adjustment of Decommissioning Security, Deferral and Salvage Value.

The Applicant, its successors and assigns shall comply with the decommissioning requirements of the Amelia County Zoning Ordinance, (Set out in § 325-34.2 et seq. of the Amelia County Code), except as otherwise provided herein.

The Parties agree that Decommissioning Security (as defined below), to cover the costs of decommissioning Applicant's facilities, is required as a condition in this SEP, except as otherwise agreed to herein. Further, the Applicant recognizes the protection this provides for the County taxpayers and does not desire to shift that expense to them should the Applicant or its successors or the landowner not be able to comply with the decommissioning requirements set forth herein (the "**Decommissioning Obligations**"); and County recognizes that the Decommissioning Security is an expense to be incurred by the Applicant encumbering funds that could otherwise go directly towards investing in the Project or other potential projects. In recognition of these factors, the Parties desire for the Decommissioning Security and the costs for such to accurately reflect the associated decommissioning costs being insured. Therefore, the Applicant, or its successor, agrees to update the gross estimated costs of performing the Decommissioning Obligations ("**Gross Decommissioning Costs**") every three (3) years, unless a longer interval is agreed to in writing by the County, and to reimburse the County for an independent review and analysis by a licensed engineer. The Decommissioning Security amount

SEP APPLICATION NUMBER: SEP22-02

shall be adjusted accordingly to ensure it accurately reflects the costs associated with performing the Decommissioning Obligations. As used herein: (i) “**Decommissioning Security**” shall mean either (a) a bond, surety or letter of credit from a Qualified Financial Institution (as defined below) securing the payment or performance of the Decommissioning Obligations, or (b) a corporate guarantee from a Qualified Guarantor (as defined below) pursuant to which such Qualified Guarantor guarantees to the County, in the event of a default by Applicant in the performance of the Decommissioning Obligations, the reimbursement to the County of its actual out of pocket costs incurred in performing such obligations, up to the amount of the Net Decommissioning Cost (as defined below); (ii) “**Qualified Financial Institution**” means an FDIC-insured bank or other financial institution with assets exceeding \$1 billion; (iii) a “**Qualified Guarantor**” means an entity that either (a) is a public service corporation as defined under the laws of the Commonwealth of Virginia, (b) has a tangible net worth of not less than Fifty Million Dollars (\$50,000,000), as verified by financial statements certified to County by such company’s chief financial officer or equivalent, (c) has equity interests listed on the NYSE, NASDAQ, or another national public equities exchange, or (d) whose senior unsecured debt carries a credit rating of at least Baa3 or better by Moody’s, BBB- or better by S&P, and/or BBB- or better by Fitch (or the equivalent(s) under any successor rating category of Moody’s, S&P or Fitch, as applicable); and (iv) “**Net Decommissioning Cost**” means the Gross Decommissioning Costs less the Salvage Value (as defined below).

Notwithstanding any provision herein to the contrary, the County agrees to the following:

a. to defer the requirements of this section until 5 years after the date the first Phase of the Project commences Commercial Operation (as defined below) (the “**Commercial Operation Date**”). The purpose of this deferral is to recognize that the likelihood of decommission being required this early in the project life is very remote. “**Commercial Operation**” shall mean, with respect to any Phase of the Project, the delivery to the electric grid, for sale to third parties, of electrical power generated by such Phase, other than deliveries of test power.

b. to allow the Applicant to apply the Salvage Value (as defined below) to the calculations in determining the required amount of Decommissioning Security. The “**Salvage Value**” shall mean the estimated gross sale value that could be realized upon resale of salvage of Project equipment after decommissioning of the Project, as determined by independent review and analysis by the same licensed engineer engaged from time to time to review the Gross Decommissioning Costs.

SEP APPLICATION NUMBER: SEP22-02

18. **Right of Entry for Enforcement and Decommissioning.**

- a. **Enforcement.** Applicant and the County acknowledge and agree that the County, its personnel and duly authorized agents shall have the express right of entry upon the Project parcels for the purposes of inspecting solar panels, battery storage facilities and all appurtenant facilities. The County shall provide the Applicant with reasonable advance written notice of no less than forty-eight (48) hours, in any event, prior to making such entry for any inspection or enforcement purposes. No prior notice shall be required to enter the Project in the event of an emergency that constitutes an immediate danger to life or property.
- b. **Decommissioning.** If the Applicant fails to decommission the project, the County shall have unrestricted access to the Project to effect any and all tasks, as necessary, to decommission solar panels, any battery storage equipment and all appurtenant facilities and restore the parcels to substantially the same condition that existed prior to construction of the solar facilities and as provided by Va. Code § 15.2-2241.2, as it may be amended through the Termination Date as defined in this Agreement. Such access rights shall remain in effect through decommissioning regardless of whether Va. Code § 15.2-2241.2 is repealed or otherwise limited in scope from the access rights it provides the County as of the date of execution of this Agreement.

Voluntary Conditions Offered by Applicant on May 10, 2022:

1. Compliance with Revised Preliminary Plan. Amelia Energy Facility, LLC (“Permit Holder”) shall develop the Project in general conformity with the Revised Preliminary Plan.
2. Stormwater.
 - A. Prior to the start of construction of the Amelia Energy Facility (“Project”), the Applicant shall apply for and obtain a Virginia Stormwater Management Program Permit (“VSMP Permit”), including a proposed Stormwater Pollution Prevention Plan (“SWPPP”) for construction of the Facility.
 - B. During the construction period, the Permit Holder may, upon request by Amelia County, reimburse Amelia County for all reasonable out-of-pocket fees actually paid by Amelia County to a third-party inspector for the review of erosion and sediment control facilities and stormwater management facilities. The inspector shall be selected and directed by the County Administrator and/or his or her designee. The inspector will ensure all facilities are installed correctly and maintained properly in accordance with applicable regulations.
3. Panel setbacks. Permit Holder will not install solar panels or associated equipment within 1,000 feet of any residence occupied at the time of SEP approval. For the avoidance of doubt, this restriction shall not apply to project fencing, stormwater and/or erosion and

SEP APPLICATION NUMBER: SEP22-02

sediment controls, driveways, access roads, or vegetative barriers, each of which may be installed within 1,000 feet of any such occupied residence.

4. Wildlife Corridors. The Permit Holder shall establish and maintain, for the duration of the Project's operating period, no fewer than two (2) fifty foot (50') wide wildlife corridors through the Project area to enable the unimpeded ingress and egress of small wildlife through the Project area. Such corridors shall be oriented adjacent to stream features within the Project area, as depicted on the Revised Preliminary Plan. The Permit Holder will also install raised wildlife-compatible fencing in at least one location adjacent to each such corridor.
5. Preservation of Soils. Topsoil moved during construction will be kept on the Project area and used in the establishment of ground cover.

Local Contractor and Job Fair. No later than ninety (90) days prior to the start of construction of the Project, the Permit Holder shall hold a contractor and job fair in Amelia County. The purpose of the contractor and job fair shall be to attract qualified construction sub-contractors and vendors with operations in Amelia County, as well as individuals qualified to perform specific tasks related to the construction and operation of the Facility. The contractor and job fair shall be advertised in the local newspaper at least two (2) weeks in advance of the event.

The applicant is requesting an amendment to Condition #5 that states the primary setbacks for the underlying zoning district must be met. The applicants will maintain the underlying setbacks, plus additional landscaping and distance, along the perimeter of the project, but would like to build panels along the interior property lines. The zoning ordinance requires a 40-foot side setback in RP-5. Due to the nature of the project, the applicants would like to build within the side building setback and construct panels across property lines. This is commonplace in other localities and being that the project and lease run with the land, I do not foresee this request to be problematic.

Recommendation:

The Planning Commission held the public hearing for this at their March 28, 2022 regular meeting. The Planning Commission voted to defer the application for 30 days and vote on the project at their April regular meeting. The Planning Commission recommended denial of this project by a vote of 6-4-1 and recommended that the Zoning Committee convene to discuss the Alternative Energy Ordinance. The Board of Supervisors held the public hearing for this item at their May 18, 2022 regular meeting. The Board voted 5-0 to defer voting on the item for 30 days.

SEP APPLICATION NUMBER: SEP22-02

PUBLIC HEARINGS

Planning Commission Public Hearing March 28, 2022

Board of Supervisors Public Hearing May 19, 2022

SUMMARY of FACTS

Applicant: Amelia Energy Facility, LLC

Land Owner: Scott Timerland Company, L.P. and Susan C. Wade

Proposed Use: Utility-scale solar farm

Location: East of Route 640 (Buckskin Creek Road), north of Route 649 (Old Court House Road) and west of Route 607 (West Creek Road)

Acreage: 1,103 acres

Existing Zoning: RP-5, Rural Preservation

Proposed Zoning: RP-5, Rural Preservation with Special Exception Permit

Comprehensive Plan: This property is located in the Rural Preservation Area

Surrounding Zoning: West = RR-3; North = RR-3; East = RP-5; South = RP-5

Utilities: No

Wetlands Impact: There are wetlands present on 4/5 parcels, with the majority lying on parcels 54-4 and 41-19. The applicant will be conducting a wetlands delineation prior to any land disturbance. Additionally, the applicants will be consulting with the Department of Environmental Quality (DEQ) during the permitting process.

Zoning History: RP-5, Rural Preservation

Recommendation:

Review and (PC) provide recommendation to the Board of Supervisors

Application for Special Exception Permit

Date: _____ File Number: _____

Application Fee Paid: _____

Applicant: Amelia Energy Facility, LLC Phone: 703-999-4280

Planning Commission Hearing Date: _____

Board of Supervisors Decision: _____

Planning Commission Recommendation: _____

Permit Signed by Applicant/Owner: _____

IMPROVEMENTS PROPOSED

Describe briefly the improvements proposed on the property. State whether new buildings are to be constructed, existing buildings are to be used and/or renovated or additions are to be made to existing buildings. Please include a plat, conceptual layout, and/or sketch plan demonstrating the proposed improvements.

This application proposes the development of a utility-scale solar energy generation facility.

The facility includes the installation of ground-mounted solar arrays and supporting equipment, associated wiring and interconnection infrastructure, as well as project fencing and internal access roads.

PROTECTION TO ADJOINING PROPERTY

Describe the effects of the proposed use on adjacent properties and the surrounding neighborhood. What protection will be offered to adjoining property owners?

The Project will maintain a minimum 50-foot setback from all external boundaries. It will pose a minimal impact to surrounding properties due to extensive natural screening and buffering from wetlands, existing tree lines, and existing topography.

ENHANCEMENT OF COUNTY

How will this requested change be advantageous to the County?

The Project will deliver increased tax revenue to the County without requiring additional County services. It will generate local jobs and create infrastructure that is essential for the production of clean electricity.

PLAN

Furnish a plan showing boundaries and dimensions of the property, width of abutting rights-of-way, location and size of buildings on the site, roadways, walks, off street parking and loading spaces, landscaping, etc. A conceptual layout of the proposed changes is also required.

Refer to attached Preliminary Plan.

The Project will deliver increased tax revenue to the County without requiring additional County services. It will generate local jobs and create infrastructure that is essential for the production of clean electricity.

PLAN

Furnish a plan showing boundaries and dimensions of the property, width of abutting rights-of-way, location and size of buildings on the site, roadways, walks, off street parking and loading spaces, landscaping, etc. A conceptual layout of the proposed changes is also required.

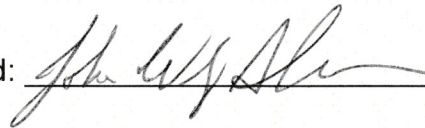

Refer to attached Preliminary Plan.

STATE OF VIRGINIA
COUNTY OF AMELIA

to wit

I, Wes Andrews, on behalf of Amelia Energy Facility, LLC, being duly sworn, deposed and say that I am the Lessee/Owner of the property involved in the application. If I am not the Lessee/Owner, I will produce a copy of a contract to purchase the property or right to submit this application. I further declare that I have familiarized myself with respect to preparing and filing the application and that the foregoing statements and answers herein contained and the information on the attached sheets thoroughly and to the best of my ability present the argument on behalf of the applicant herewith requested and that the statements and information above referred to are in all respects true and correct to the best of my knowledge and belief.

**AMELIA ENERGY FACILITY
PROPOSED CONDITIONS
MAY 18, 2022**

1. Compliance with Revised Preliminary Plan. Amelia Energy Facility, LLC (“Permit Holder”) shall develop the Project in general conformity with the Revised Preliminary Plan.
2. Stormwater.
 - A. Prior to the start of construction of the Amelia Energy Facility (“Project”), the Applicant shall apply for and obtain a Virginia Stormwater Management Program Permit (“VSMP Permit”), including a proposed Stormwater Pollution Prevention Plan (“SWPPP”) for construction of the Facility.
 - B. During the construction period, the Permit Holder may, upon request by Amelia County, reimburse Amelia County for all reasonable out-of-pocket fees actually paid by Amelia County to a third-party inspector for the review of erosion and sediment control facilities and stormwater management facilities. The inspector shall be selected and directed by the County Administrator and/or his or her designee. The inspector will ensure all facilities are installed correctly and maintained properly in accordance with applicable regulations.
3. Panel setbacks. Permit Holder will not install solar panels or associated equipment within 1,000 feet of any residence occupied at the time of SEP approval. For the avoidance of doubt, this restriction shall not apply to project fencing, stormwater and/or erosion and sediment controls, driveways, access roads, or vegetative barriers, each of which may be installed within 1,000 feet of any such occupied residence.
4. Wildlife Corridors. The Permit Holder shall establish and maintain, for the duration of the Project’s operating period, no fewer than two (2) fifty foot (50’) wide wildlife corridors through the Project area to enable the unimpeded ingress and egress of small wildlife through the Project area. Such corridors shall be oriented adjacent to stream features within the Project area, as depicted on the Revised Preliminary Plan. The Permit Holder will also install raised wildlife-compatible fencing in at least one location adjacent to each such corridor.
5. Preservation of Soils. Topsoil moved during construction will be kept on the Project area and used in the establishment of ground cover.
6. Local Contractor and Job Fair. No later than ninety (90) days prior to the start of construction of the Project, the Permit Holder shall hold a contractor and job fair in Amelia County. The purpose of the contractor and job fair shall be to attract qualified construction sub-contractors and vendors with operations in Amelia County, as well as individuals qualified to perform specific tasks related to the construction and operation of the Facility. The contractor and job fair shall be advertised in the local newspaper at least two (2) weeks in advance of the event.

EXHIBIT A – PRELIMINARY PLAN
EXHIBIT B – DECOMMISSIONING PLAN
EXHIBIT C – LAND MANAGEMENT PLAN

1. Executive Summary

Amelia Energy Facility, LLC (“Applicant”), a subsidiary of Torch Clean Energy (“Torch”), requests a Special Exception Permit (“SEP”) to allow the construction and operation of an up to 106MWac utility scale solar energy system (the “Project”) as described in this Application. The Project is proposed on the parcels identified by Amelia County as Tax Map IDs 41-19, 54-4, 54-2D, 54-2-14, and 54-2-16 (collectively, the “Property”). A maximum of 635 acres will be used for solar panels, and a maximum of 700 acres will be disturbed. The site is located south of Poor House Road, west of West Creek Road, and east of Buckskin Creek Road, approximately 3 miles southwest of Amelia Court House.

The Project will include the installation of photovoltaic solar panel arrays, inverters, access roads, a Project substation, and a utility switchyard. The Project will interconnect directly to the Dominion transmission line running through the Property. No new transmission lines will be built. Once constructed, the Project is designed to operate for at least 35 years.

The Project has been sited and proposed with the following considerations:

- The Project location was selected for its immediate proximity to existing transmission facilities and minimal visual impact to existing residences and neighboring properties.
- The Project will be designed to avoid impacts to cultural and environmental resources.
- The Project will provide clean energy that matches the electricity consumption of up to approximately 21,000 homes in Virginia and will help the Commonwealth meet its goals for the adoption of clean energy.
- The Project will provide personal property and increased real estate taxes to the County over the course of its life as well as injecting direct economic activity into the County during the construction and operating periods.
- The Applicant would like to request a variance to eliminate internal setbacks between Project parcels, as each Parcel will be contracted under long-term leases that run with the land. Because Parcels involved in the Project are contiguous and will be bound to the same use for the same length of time, regardless of whether the land changes ownership, a waiver of setbacks would not change the character of the district or be detrimental to the public interest.

If approved by the Board of Supervisors, the Project will bring economic benefits to Amelia County with no detrimental effects on the neighboring properties or the County as a whole.

Torch Clean Energy

Torch Clean Energy is developer and owner of renewable energy generation facilities in the United States with offices in Virginia and Colorado. Torch has over 500MW of solar under development in the Commonwealth of Virginia, including the Chester Solar Technology Park in Chesterfield County, the Jarratt Energy Facility in Greensville County, and the Bartonsville Energy Facility in Frederick County. To date, Torch has developed and financed over \$600 million of renewable energy projects throughout the country.

2. Comprehensive Plan Review

Section 15.2-2232 of Virginia Code provides that no public utility facility may be “constructed, established or authorized, unless and until the general location or approximate location, character, and extent thereof has been submitted to and approved by the commission as being substantially in accord with the adopted comprehensive plan or part thereof.”

The Applicant requests approval from the Amelia County Planning Commission that the Amelia Energy Facility (“Project”) is substantially in accord with the County’s Comprehensive Plan (“Comprehensive Plan”). The Project is sited along the County’s only high-voltage transmission line and is in a remote part of the County that is not targeted for future growth. Specific goals and objectives from the Comprehensive Plan are quoted below to demonstrate the Project’s consistency.

Consistency with the Comprehensive Plan

Excerpts from the Comprehensive Plan are included below, with an explanation of the Project’s consistency in *italics*. Only items related to the Project are addressed below. Items not related have been omitted because they are not relevant to the development of this solar facility.

Goals and Objectives

GENERAL

- 1) Protect the rural character, cultural heritage, and scenic beauty of the County. Recognize that these are valuable and irreplaceable resources.

The Project is not in the vicinity of any known historical sites. The Project will ensure a continued passive used of agricultural land and will “protect the Rural Preservation district from uncontrolled residential growth” (one of the Three Principles for the Future of Amelia County).

- 2) Agriculture and forestry industries represent the foundation of the County’s economy and its most significant natural resource. Their stewardship, support, protection, and continuation should guide Amelia’s future land use and zoning decisions.

The Project would lease land from multiple landowners and allow them to diversify their farming or timber operations while providing passive income. Solar is a good neighbor to agricultural land and can provide benefits to the neighboring farms by benefiting pollinators. Setbacks and screening will preserve the rural road corridor.

- 3) Concentrate future County growth in the County’s “Development Areas”: these include the Courthouse Village, Corridor Crossroads Mixed-Use, and Corridor Economic Development planning areas.

The Project site is not in or near the County's Development Areas. The Project will provide economic benefits and tax revenue to the County without using land that is identified for future growth.

- 4) Work to attract new businesses that employ Amelia citizens and contribute to the local tax base, through business-friendly regulatory practices and other incentives in growth areas.

The Project would provide significant economic benefits to the County in the form of construction jobs, ongoing operations and maintenance jobs, and significant tax revenue without any requirement of County services. Solar provides an opportunity for landowners to diversify their operations and reduce the risk that comes with farming.

- 5) Maintain the capacity and quality of the Route 360 corridor throughout the County; ensure that future development patterns do not further diminish the levels of service and safety of the County's rural road system.

The Construction of the Project will not negatively impact the County's roads. Once operational, the Project will require very few trips for maintenance and will not cause a meaningful increase in traffic. The Project will not require any County services but will pay significant tax revenue which can be used for maintaining County infrastructure.

- 6) Invest in a quality public school system that prepares students to be productive and successful members of the community.

The Project would pay significant property taxes that will benefit Amelia County's school system. In addition, the Project would allow for educational opportunities for students in the County's school system.

- 7) Preserve, expand, and promote Amelia's historic sites, landmarks, parks, community attractions, recreational opportunities, and open space areas in ways that bring tourism revenue to County businesses.

The Project is not in the vicinity of the County's historic sites or parks.

- 8) Ensure adequate water supply, utilities, and infrastructure essential to serve the projected County growth. Continually improve County services and facilities, including fire, rescue, law enforcement, utilities, and related infrastructure. Utilities should include compatible alternative or "green" energy systems.

The Project will not require any County services but will make a significant contribution in the form of property taxes that can improve the County's infrastructure.

- 9) Ensure the County's responsibility to undertake fiscally responsible, disciplined decisions that adequately serve both our current citizens and the County's future growth.

This goal specifically encourages the County to consider policies that can benefit the recruitment of economic development and other revenue generating enterprises.

Future Land Use Map

The County's Future Land Use Map identifies Village Development Areas, Economic Development Areas, and a Rural Village Area. The Project Site falls outside of these areas. The Project would not use land that is identified for future growth but would make a meaningful contribution to the County.

I. Alternative Sites Considered for Proposed Use

The Applicant spent a considerable amount of time identifying a promising site for a solar project in Amelia County. The vast majority of the County is not conducive for a utility-scale solar project because of the lack of transmission infrastructure. The Jetersville – Ponton 115 kilovolt transmission line traverses the Project site, which eliminates the need for a new transmission line.

The Project site also offers other advantages: large tracts with generally flat and dry land, and distance from residential centers.

II. Anticipated Impacts and Mitigation Measures Proposed

The Project will be a benefit to the County and will not adversely affect its agricultural character. Existing vegetation and county-recommended setbacks will be used to screen the Project. It is a quiet, passive use of the land and will support the stated goals of the County.

3. Property

The Project Property is zoned RP-5 Rural Preservation and consists of portions of land from the following parcels:

Parcel	Acreage	Zoning
41-19	286	RP-5
54-4	550.6	RP-5
54-2D	122	RP-5
54-2-14	127.6	RP-5
54-2-16	16.8	RP-5

The Property is located approximately 3 miles southwest of Amelia Court House, in Planning District 3, and is primarily in use for timber cultivation, with a small portion being used for agriculture. Significant portions of Parcel 54-4 and Parcel 41-19 have recently been timbered by the landowner. The surrounding properties include rural residences, forested areas, and agricultural fields. An existing Dominion 115 kV transmission line runs through the Property, which will serve as the Project's point of interconnection.

The Amelia County Zoning ordinance permits utility-scale solar facilities in the RP-5 Rural Preservation District (Article VII) through a Special Exception Permit (SEP). The Applicant requests a SEP to allow the construction and operation of the Project on the Property.

4. Project Overview

Facility Summary

The Amelia Energy Facility will produce over 180,000 megawatt-hours of clean energy in its first year of operation, which represents the energy consumption of up to 21,000 homes. The Project will generate electricity from photovoltaic solar modules that will be attached to a single axis tracking system supported by driven posts that track the sun from morning to evening east to west. A series of central inverters or string inverters will be used to convert the electricity from direct current (DC) to alternating current (AC). A series of internal collection lines will centralize power from the Project to the substation. The Project substation and switching station will be built on Parcel 41-19. The Project substation will step up the power from 34.5 kV to 115 kV to interconnect to the existing transmission line.

The Project will interconnect to a Dominion Energy 115-kilovolt transmission line that runs through the northern portion of the Project. No new transmission-voltage lines will be built for the Project.

The Project will be developed generally as depicted on **Exhibit A**, the Preliminary Plan, as included with this Application. The Preliminary Plan provides a map of the solar array area, the substation, and the proposed point of interconnection with the transmission system, vegetative buffer zones, perimeter fencing, access points, and other features of the Project.

As shown on the Preliminary Plan, a primary point of access is proposed from Buckskin Creek Road. A secondary access point will be designated during the Site Plan process, pending VDOT approval. The approximate location and orientation of the primary Project entrance is depicted on **Exhibit A**.

Construction Schedule

The construction of the Project is estimated to take approximately 15 months. The first phase of the Project will be site preparation and civil works, such as area-specific grading, in order to prepare for the installation of the solar equipment. The second phase will consist of the mechanical and electrical installation of the solar equipment. The final phase is the testing of the facility and the energization.

Phase 1 –Site Preparation and Civil Work: 6-8 Months

Phase 2 - Mechanical and Electrical Installation: 4-6 Months

Phase 3 – Facility Testing and Energization: 2 Months

Overlap between the first two phases is expected, subject to the final construction schedule. Additionally, construction of the interconnection facilities by Dominion Energy will span all three phases of construction.

Compliance with County Regulation

The Applicant completed a Pre-Application meeting with the Amelia County Planning Department on March 5, 2021 and reviewed application requirements. SEP materials have been compiled according to the County Zoning Ordinance and Planning process guidelines.

5. Analysis of Impacts

Pursuant to Article IV of the Amelia County Code of Ordinances, a Special Exception Permit (SEP) may be granted where the governing body finds that: (i) the proposed use is in an appropriate location and not in conflict with the Comprehensive Plan and the statement of intent for the district in which it is located; (ii) that the health, safety, and general welfare will not be adversely affected; (iii) the necessary safeguards will be provided for surrounding properties, persons, and neighborhood values; and (iv) all additional standards have been complied with (Section 4.2).

The Project is supported by the Comprehensive Plan goals. In particular, the Plan seeks to concentrate development to appropriate areas and encourage new businesses that employ County residents and contribute to the local tax base. Additionally, the Comprehensive Plan prioritizes the agricultural economy and includes goals to promote existing farming, agricultural industry and companion land uses to include, but not limited to, utility scale solar energy systems or other like “green” energy generation systems” in the Rural and Agricultural Preservation Area.

In accordance with the criteria set forth in the Zoning Ordinance for SEP approval, the proposed Project will not adversely affect the health, safety, or welfare of persons residing or working in the neighborhood of the proposed use and will not be detrimental to public welfare or injurious to the Property or improvements in the neighborhood. As a passive use located in the Rural Preservation district, the Project will not be detrimental to, or substantively change, the character of the surrounding area. The Project will prevent more intensive, permanent forms of development, such as residential subdivisions. As a temporary use, the Project will not prevent the Property from being used for agriculture or silvicultural once again when the land is decommissioned at the end of the Project’s operational life.

The proposed Project will generate increased tax revenue but will not cause any increase in demand for County services. It will have minimal impacts on drainage and erosion and will not require the use of local water or sewer utilities. Erosion and sediment controls and permanent stormwater management facilities will be provided as part of the Project to the extent required by applicable laws. The Project will not significantly increase traffic in the area once constructed, and no public road improvements should be needed for the construction or servicing of the Project.

The effects of the Project are evaluated as follows:

Visual

With no permanent road frontage and substantial natural buffers that will be left intact, the Project will not present significant visual impacts to surrounding properties. Along the perimeter of the Property, a setback of 50 feet from the Property line shall be maintained, and an increased setback of 100 feet on the front of the parcels adjacent to roadways. Within the setback, a 25-foot natural buffer of existing vegetation will generally be used to screen the Project, as noted on **Exhibit A**. Aside from utility poles and utility interconnection equipment, all installed solar generation equipment will be under twenty-five (25) feet in height, according to the Ordinance.

The public roads nearest to the Project include Buckskin Creek Road to the west, Poor House Road to the north, Dennisville Road to the northwest, and West Creek Road to the east. Project Parcel 54-2D has approximately 0.16 miles of frontage on Buckskin Creek Road. However, panels will be approximately 1,300 feet from the road and will be screened by a forested stream channel.

Figure 1: Setback from Buckskin Creek Road, Parcel 54-2D.

The Project will also be screened from residences on the west side of West Creek Road due to a significant wetland system that runs through the Project area. This will be left intact as a natural buffer.

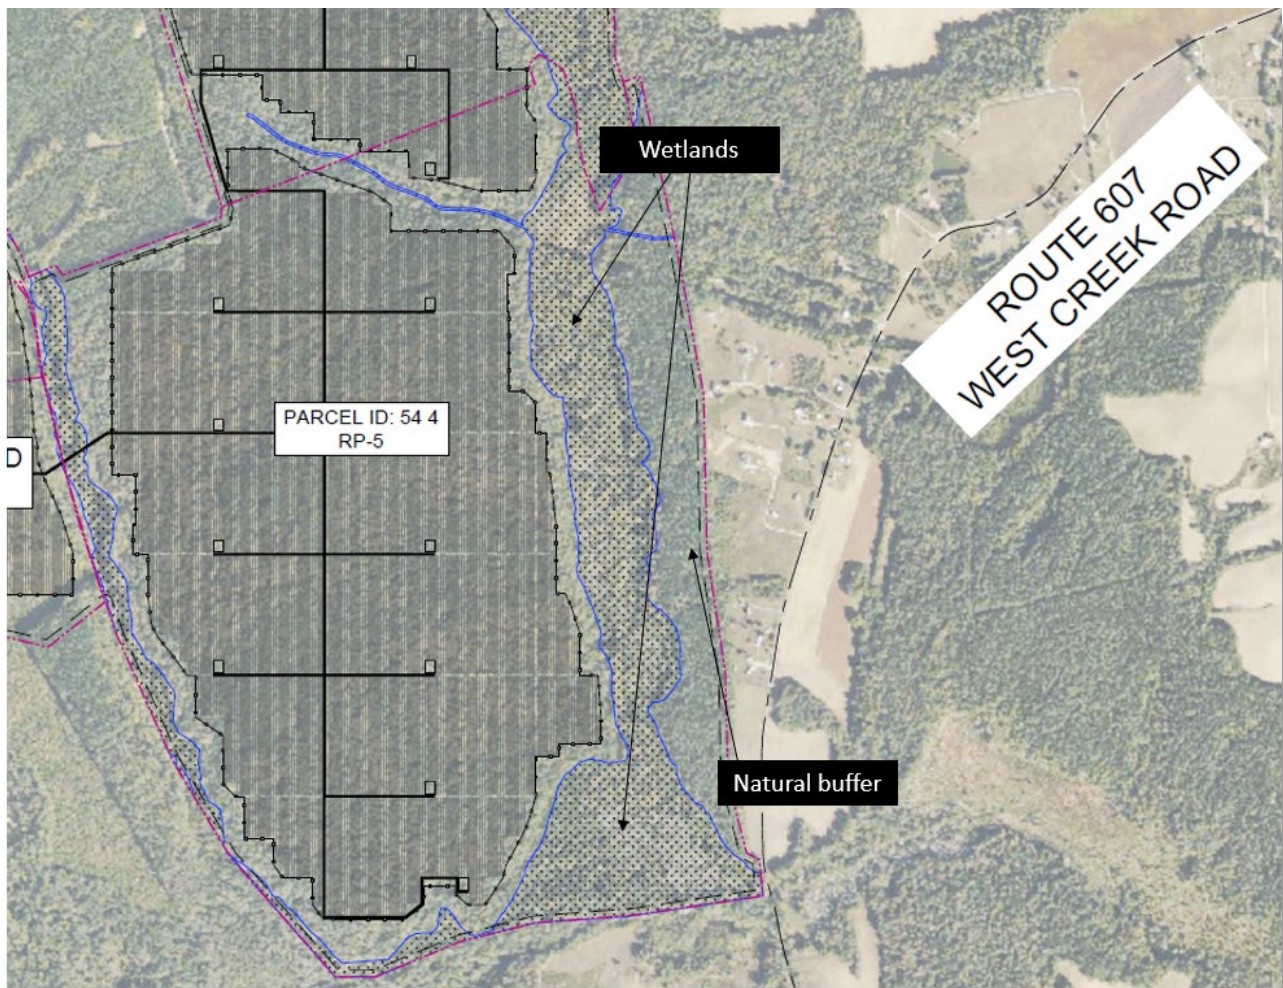

Figure 2: Large natural buffer between West Creek Road and solar arrays.

Ecological and Drainage

Wetlands will be delineated and avoided in the construction of the Project. Additionally, the Project will complete thorough environmental consultation with the Department of Environmental Quality as part of the “Permit by Rule” process for renewable energy facilities.

The Project will submit Erosion and Sediment Control and Stormwater Management plans prior to finalization of site design. Because the racking system uses driven posts for structural support, changes to the impervious surface will be limited to inverter and transformer pads, access roads, and interconnection equipment. These uses constitute a small percentage of the total project area. In addition, grading will be minimized, and the project will limit earth disturbance to every extent feasible.

Cultural Resources

A desktop review of cultural resources has been completed for the Project area. The Project will undergo a comprehensive archeological and architectural study in accordance with all relevant regulations and will not directly impact any identified landmarks. Additionally, the Project will require

concurrence from the Department of Historic Resources as part of the Permit by Rule process for renewable energy facilities.

Noise

Once operational, the Project will not be audible to adjacent landowners. The only noise-generating equipment associated with the facility will be from the inverters located in the interior of the Project. The inverters convert DC electricity to AC electricity and have a fan that keeps them cool during the daytime. At 150 feet from the inverter or transformer, noise cannot be heard. After sunset when no power is being generated, the inverters will stop operating and will produce no noise.

Traffic

General construction traffic will use the Project's access points and the internal road network to move around the site. General construction traffic consists of personal vehicles (e.g. pickup trucks) carrying passengers, and minor equipment to and around the Project site.

Component deliveries (e.g. solar panels, inverters and transformers, substation concrete trucks, construction equipment, etc.) will primarily use the Buckskin Creek Road entrance. A temporary construction laydown area for the Project will be on Parcel 54-2D.

Operations and Maintenance for the Project will not measurably increase vehicular traffic and typically consists of only two vehicle visits a month since the project is operated remotely through a SCADA system

Lighting

Except for minimal safety and security lighting in a few locations, the Project will not be lit. Any installed lighting will comply with applicable County ordinances.

Odors, Dust, Fumes, Vibrations

The Project will not generate air emissions. Once operational, no odors, trash, or recycled materials will be located on site. Any materials that need to be disposed or recycled due to ongoing maintenance will be taken offsite to the appropriate disposal facility. There will be no impact on water or air quality.

Fire Safety / Security

The Project will not pose increased security or safety risks or fire hazards. Once the Project is constructed, a permanent perimeter/boundary fence will enclose the solar panels. The fence will have a minimum height of six (6) feet and will be consistent with the National Electric Code. The fence will be posted with security signage displaying 911 address information and a warning identifying the owner and contact information for a 24-hour manned communication system.

The site entrances and internal road network will provide access to every part of the Project. The Project will be monitored remotely on a 24/7 basis. The Operations Team will have the ability to remotely de-energize the Project if necessary and immediately contact and coordinate with the appropriate local fire and EMS personnel.

Community Outreach

The Applicant sent out a letter via U.S. Mail on April 30, 2021 that provided Project details and invited all adjacent Project neighbors to attend a Community Meeting on May 13, 2021 at the Amelia County Administrative Building. During this meeting, the Applicant presented preliminary project plans to attendees and received comments in-person and via Zoom call.

The Applicant delivered an informational presentation to the Planning Commission at its public meeting on November 22, 2021. On December 27, 2021, the Applicant presented to the Planning Commission and gathered additional feedback from Commissioners, neighbors, and community members. Since the public meeting, the Applicant has met in person with several of these individuals to discuss concerns with the Project.

The Applicant is submitting a significantly modified Project proposal based on the feedback gathered in numerous interactions with the public, project neighbors, and community officials.

6. Decommissioning Plan

Article XXXIV of the Amelia County Code of Ordinances requires applications for Utility Scale Solar Energy Systems to include a Decommissioning Plan. To support this application, the Applicant has provided **Exhibit B**, the Preliminary Decommissioning Plan.

Prior to the issuance of the Site Plan, a Decommissioning Cost Estimate and means of financial security will be provided in accordance with **Exhibit B** and Virginia Code.

7. Land Management Plan

Pursuant to Article XXXIV of the Amelia County Code, the Applicant has provided **Exhibit C**, the Land Management Plan, as a part of this application. The Land Management Plan ensures all permitted landscaping and buffer conditions are established and maintained throughout the life of the Project. Specifically, the Project will do the following:

- Maintain a 25-foot-wide buffer of existing tree lines along external project boundaries, where applicable;
- Maintain a grassy and meadowlike condition underneath solar panel arrays;
- Undergo periodic mowing to control vegetation in fenced-in areas;
- Adhere to all County and State-mandated regulations related to landscaping and vegetation management.

Refer to **Exhibit C** for additional detail.

Subject: EMF and “Dirty Power” in Context to the Proposed Amelia Solar Project, Amelia County, Virginia

Introduction

Amelia Energy Facility, LLC (Amelia Energy Facility) is proposing to build a utility scale solar electric generation project in Amelia County, Virginia. The proposed Amelia Solar Energy Project (Project) would generate up to 106 megawatts of alternating current (MWac) of peak electric power and occupy approximately 1,103 acres of land in an area bounded by Poorhouse Road, Buckskin Creek Road, and West Creek Road in Amelia County. Of the 1,103 acres, Amelia Energy Facility is proposing to place panels on approximately 635 acres. Electricity from the solar energy facility would be sent to an existing Dominion Energy electric transmission line that crosses the northern portion of the Project site.

Solar energy is the conversion of sunlight into usable energy forms. The sun’s rays transmit light energy, in the form of photons, which can be converted to electricity using certain materials that naturally release electrons when exposed to light. These materials are contained within the photovoltaic solar panels. When the sun shines on the solar panels, direct current (DC) electricity is produced. The DC electricity is then fed into a solar inverter to convert the DC electricity to 60 hertz (Hz) alternating current (AC) electricity (the form of electricity that is used by the power grid and household appliances). A transformer is also used to increase or decrease the voltage level of the AC electricity. Figure 1 provides an overview of the different components of a solar energy system.

The Project will consist of solar panels on mounting racks, low-voltage DC cabling, inverters to convert DC to AC electricity, transformers to step up the voltage of the AC electricity from the inverters, belowground AC collector lines, and a substation to convert the produced power to 115 kilovolts (kV) and deliver the power to the Dominion Energy Jetersville-Ponton 115-kV transmission line, which crosses through the northern portion of the Project site. The Project is considering one of two alternate points of interconnection to the Dominion transmission line, either of which could be used to tap the existing line.

SOLAR ENERGY AND BATTERY ENERGY STORAGE SYSTEM HOW IT WORKS

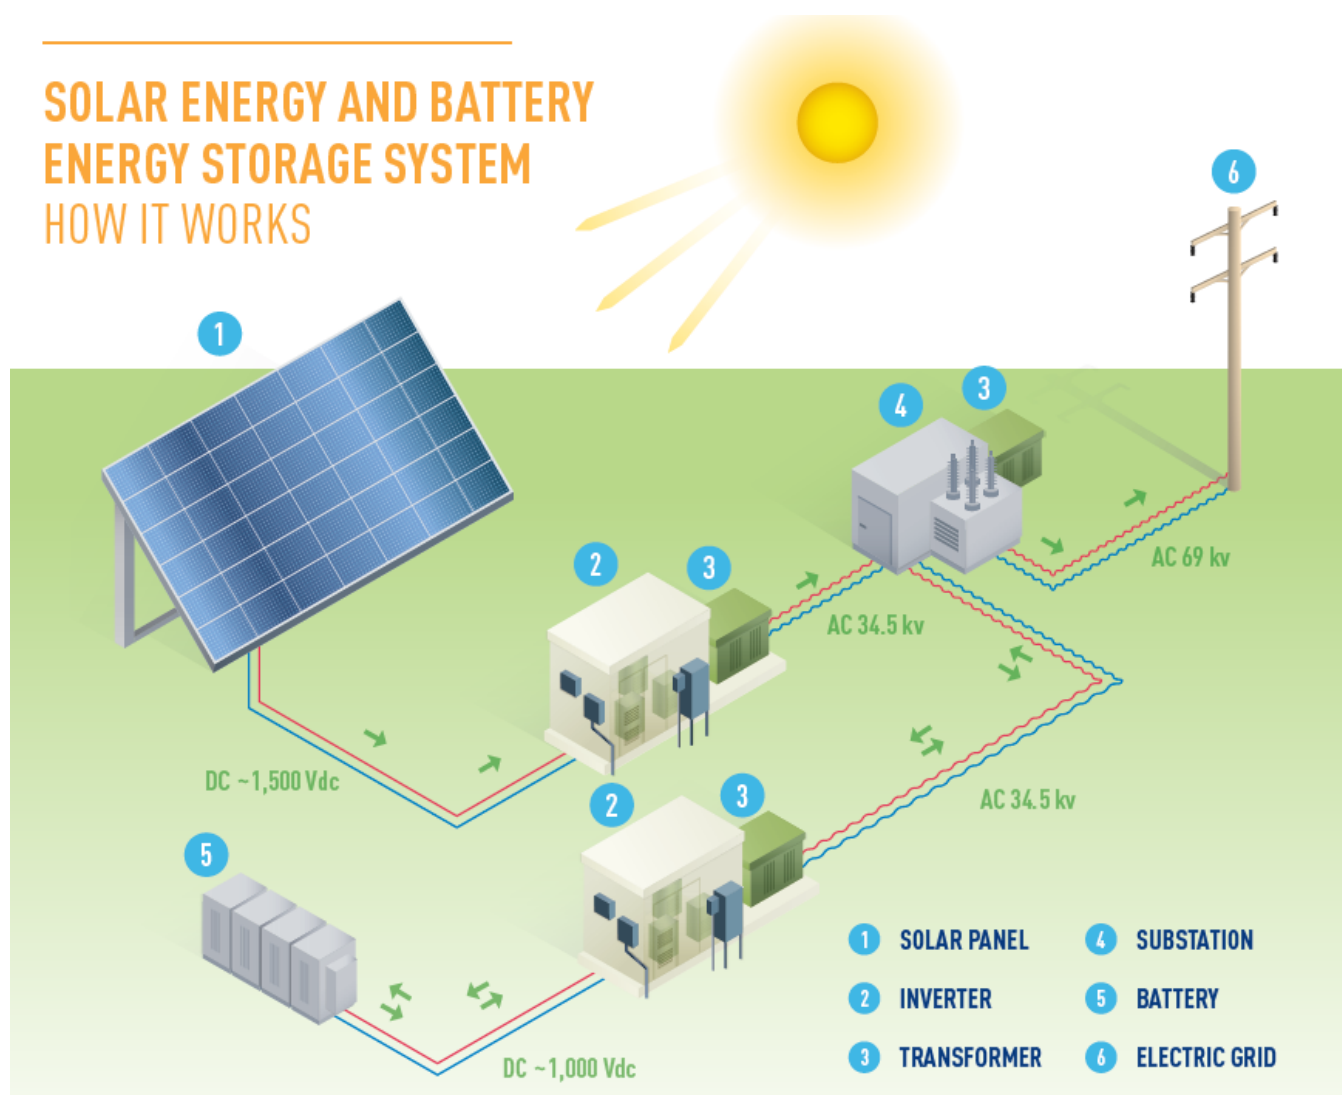

Figure 1. Solar Energy Project Components

Representatives of Amelia Energy Facility have engaged the community through a neighborhood meeting, public presentation, Planning Commission hearing, and various individual meetings with project neighbors. During these conversations, some concerns were raised about electric and magnetic fields (EMF) and adverse impacts to nearby residents, particularly those living closest. This technical memorandum addresses the concerns raised by the residents regarding EMF from the Project.

Electric and Magnetic Fields

Electric facilities such as the Project produce EMF when they are in operation. These fields are caused by distinct aspects of the operation of the facility and can be evaluated separately.

Electric fields are produced whenever a conductor such as a power line is connected to a source of electrical voltage—plugging an electric appliance such as a toaster into a wall outlet in a home, for example. When the toaster is plugged in, a voltage is induced in the cord to the toaster that causes an electric field to be created around the cord. The electric field remains constant even when the electricity is not being used. In other words, even if the toaster is off, there is an electrical field around the electric cord. Electric field strengths are measured in units of volts per meter (V/m) or kilovolts per meter (kV/m), where 1 kV/m = 1000 V/m.

Magnetic fields are produced whenever an electrical current flows in a conductor. In the toaster example, if the toaster is being used, allowing electricity to flow to the toaster, a magnetic field is created around the electric cord in addition to the electric field. The magnetic field will vary with the amount of power being produced by the solar farm, which is highest at midday and absent at night. Magnetic fields are measured in milliGauss (mG). The strength of both electric and magnetic fields decreases rapidly with distance from the source.¹

Since the Project will have both DC and AC electricity, it will produce both DC and AC EMF. The Project solar panels and underground DC collector lines will produce low levels of DC EMF while the Project's inverters, transformers, substation, AC collector lines, and 115-kV AC generation-tie line will produce low levels of AC EMF.

DC electricity is considered “static” because it does not vary in the direction of the current. Static electric fields are created by the separation of a positive and negative electric charge and are created naturally by the earth's atmosphere during stormy conditions or by friction (e.g., “static cling” of clothes from the dryer). Static magnetic fields are created by magnets or by the flow of DC electricity. The earth has a naturally occurring static magnetic field, which is what enables a compass to be used for directional finding. The earth's DC magnetic field varies between 350 and 700 mG, depending on the location.

The DC magnetic fields produced by the solar panels will be a few mG, which is significantly less than the earth's natural magnetic field and therefore would not be detectable above the baseline levels of the earth's natural magnetic field at the Project's eastern parcel boundary (west of West Creek Road). Additionally, strength of the DC magnetic field is estimated to be zero within 50 feet of the solar panels because the magnetic field decreases rapidly with distance from the source. The closest solar panel to the Project's eastern property boundaries is more than 500 feet. The electric fields produced by the solar panels will be zero within 50 feet of the solar panels because the electric fields will be quickly absorbed by the metal components of the solar panels, which will be grounded. The low-voltage DC cabling will be buried at a depth of 3 to 5 feet and will have both positive and negative conductor lines located close together underground; therefore, they will have no measurable EMF aboveground because the magnetic fields from the positive and negative lines will cancel each other out, a

¹ For more information about EMF, please review the following publication: “EMF Electric and Magnetic Fields Associated with the Use of Electric Power Q&A,” which is published by the National Institute of Environmental Health Sciences of the National Institutes of Health. This publication can be downloaded at: https://www.niehs.nih.gov/health/materials/electric_and_magnetic_fields_associated_with_the_use_of_electric_power_questions_and_answers_english_508.pdf

phenomenon called phase cancellation. Therefore, the DC EMF produced by the Project's solar panels and collector lines would be unmeasurable at the property boundary.

The inverters and substation transformers will act as point sources of AC EMF because they each have discrete locations within the Project area. Each of these components will produce low levels of AC EMF that will decrease with distance at a rate equal to the cube of the distance decay rate. In other words, for each doubling of the distance from the EMF source, the EMF will drop by a factor of eight. As an example, if the magnetic field level near a transformer is 10 mG at a distance of 10 feet, the field level will drop to one-eighth of this, or 1.25 mG, at 20 feet, and to 0.16 mG at 40 feet. This same decay rate would also apply to the electric fields from these same devices. Electric fields will also diminish from absorption by any vegetation (including low-growing vegetation) located in its path because the plants effectively ground the electric fields. The closest point source of AC EMF to the West Creek Road neighborhood is an inverter located approximately 1,200 feet west of the closest residence along West Creek Road. The EMF field 1,200 feet from this inverter would be zero at the residence. The other inverters and substation transformers are even farther from residences along West Creek Road. Therefore, no EMF from the Project inverters and substation transformers would reach the homes along West Creek Road. Residences outside other portions of the Project area are even further away and therefore will also not be affected.

The linear AC power lines within the Project will also produce low levels of AC EMF. The 34.5-kV AC collector lines running from the inverters to the Project substation will be buried underground and will thus produce very low levels of EMF fields due to the earth absorbing the electric fields and phase cancellation of both electric and magnetic fields. The 34.5-kV AC collector line will be a minimum of 1,200 feet from the closest residences along West Creek Road, and the EMF from the collector line will drop to zero well before reaching these homes.

The 115-kV overhead generation-tie line extending from the Project substation to the Dominion Energy transmission line at either of the two alternate locations in the northern portion of the Project area will produce low levels of EMF. However, these EMF fields will quickly dissipate to background levels within a few hundred feet from the 115-kV line. Since the 115-kV power line will be at least 4,000 feet from the closest residences along West Creek Road, the EMF from the 115-kV power line will drop to zero well before reaching the homes along West Creek Road. The net result will be that the total level of EMF from the Project will be zero at the residences along West Creek Road and at any other residences that are further away.

These levels of EMF can be compared to EMF levels from common household appliances that we are all exposed to every day. The levels of magnetic fields from common household appliances are shown in Figure 2. These levels of magnetic field commonly experienced within a home are far higher than the levels that would be experienced within a residence from a field that originates from the solar facility.

Some states, including New York and Florida, have adopted EMF exposure standards for members of the general public for power lines constructed within their jurisdiction. However, neither the Commonwealth of Virginia nor the federal government have adopted acceptable EMF public exposure standards for power lines. Therefore, no public EMF exposure standards apply to the Amelia Energy Facility Project.

Figure 2. Magnetic Field Exposure from Common Household Appliances¹

Dirty Power

Some have expressed concern that the operation of solar electric systems produce “dirty” power. Dirty power is electricity that contains high radio frequency (RF) noise in addition to pure 60-Hz electric power. “Dirty” power is not usually produced by utility scale power generators because they are typically subject to national power quality standards² for conducted or radiated higher frequency emissions from their systems. However, many smaller consumer electronic devices are exempt from these standards due to their small size. These consumer devices can produce higher frequency noise that results in “dirty” power. Such small consumer devices include

² The Institute of Electrical and Electronics Engineers (IEEE) sets standards for the power and energy industry. IEEE 1547 is a widely adopted standard addressing the performance, operation, testing, safety considerations, and maintenance of a grid interconnection.

personal computers, electric razors, electric power tools, florescent light bulbs, light dimmer switches, etc. Also, smaller consumer sized “square wave” or “modified sine wave” inverters used in residential home solar systems have limited filtering and can cause non sinusoidal voltage waveforms, which can cause significant issues with other consumer equipment such as microwaves or power tools.

In contrast, large commercial multi-step inverters such as those proposed for installation at the Project include adequate high-frequency voltage filtering, resulting in a near-perfect sine wave with very low harmonic distortion. The power output of the Project inverters will be a 60-Hz sine wave with very low harmonic distortion since the inverters are designed to have a Total Current Harmonic Distortion (THD) of less than 1.2 percent. This THD level is less than the standard set by IEEE 1547 (an industry standard that applies to the power output from these inverters), which sets the THD limits for equipment to a total of 5 percent across all frequencies. Therefore, the actual harmonic distortion from the Project inverters easily complies with the IEEE 1547 standard as the THD is less than 1.2 percent, and no further high frequency filtering will be required to condition the 60-Hz output power from the inverters. In addition, the electricity produced by the inverters will transmit through the medium- and high-voltage transformers located within the Project substation. These transformers will effectively block high-frequency noise by filtering the electricity to smooth 60-Hz sinewaves before it is delivered to the grid.

The inverters that Amelia Energy Facility plans to use to convert the DC electricity from the solar panels to 60 Hz AC electric power will use high frequencies in their operation; however, the frequencies used are less than 1 megahertz and therefore do not cause interference with higher frequency communications (radio, TV, or cell phones). The inverters will meet RF radiation standards for a Class B digital device as required by part 15 of the Federal Communications Commission Rules (Code of Federal Regulations Title 47, Part 15). These limits are designed to provide reasonable protection against harmful RF interference to electronic devices in a nearby residence. Since the inverters are designed to operate without interference near a residence, and the nearest residence to a Project inverter is 1,200 feet away, any low level of RF produced by the inverter will dissipate near the inverter within the Project boundaries and will not be measurable or noticeable at the Project boundary or at the nearest residence.

Cardiac Pacemakers

A cardiac pacemaker is an electronic device that is implanted into a patient to sense the cardiac activity of the heart and then send a signal to the heart that provides an appropriate pacing of the heart. The functioning of a cardiac pacemaker can be compromised by exposure to extremely high electromagnetic fields, generally of 100 mG or higher. Modern pacemakers are protected against this kind of interference by shielding of the device and in the operation of the pacemaker. Depending on the strength of the electromagnetic field, a transient effect on the pacemaker in the vicinity of electrical devices such as a handheld electric drill or other electric appliance, which produces an extremely high magnetic field, is possible. In this case, the pacemaker cannot deliver a pacing pulse or unnecessarily accelerates the heart rhythm. When exposed to these very high EMF fields, the pacemaker is prevented from delivering appropriate pacing signals to the heart. In this case, some pacemakers are designed to start pacing the heart with a steady asynchronous pacing rhythm, such as 60 beats per minute, until the high-level EMF is removed. When this happens, the pacemaker returns to normal function.

The levels of EMF necessary to interfere with a modern cardiac pacemaker are far higher than the levels that will be produced by the solar farm. This includes EMF levels next to the power lines and inverters within the solar farm as well as the transmission tie line that connects the solar facility to the Dominion Energy transmission grid. EMF levels from the Project will not cause interference to a modern properly operating pacemaker.

Note:

This memo was authored by Dr. Robert Pearson, a nationally recognized expert concerning environmental issues in the electric utility industry. Dr. Pearson has over 45 years of experience in environmental and technical engineering, regulatory review and assessment, preparation of industrial compliance policy, and environmental consulting.

Resumes

EXPERIENCE SUMMARY

Dr. Pearson is currently a Senior Project Manager in the Denver operations staff of Tetra Tech, Inc. with responsibility for developing programs to respond to clients in all areas of environmental services, with a particular emphasis to clients in the electric utility industry. Dr. Pearson has over 45 years of experience studying the health effects of electric and magnetic fields (EMF) from powerlines. He has published original scientific research on the issue of EMF and childhood cancer and is qualified as an EMF technical expert in courtroom testimony and regulatory public hearings (PUC). To date, Dr. Pearson has participated in over 100 public workshops regarding proposed transmission line projects. Previously, Dr. Pearson has Chaired the EMF Health Studies Task Force of the Electric Power Research Institute, an industry advisory committee that directs the EMF health studies research program; the largest such basic EMF research program in the world. Dr. Pearson also served as Vice Chairman of the Electric and Magnetic Fields Task Force for the Edison Electric Institute. Lastly, Dr. Pearson managed utility company participation in two, state-of-the-art, epidemiological research studies on the relationship between electric power lines and the occurrence of childhood cancer. Much of the data required for the studies were provided from company data files and the overall design and execution of both studies was critiqued for its correctness and appropriateness.

SELECTED PROJECT EXPERIENCE

Senior Technical Advisor, Dominion Energy, Coastal Virginia Offshore Wind

Commercial Project (2019 - Present) Dr. Pearson Oversaw the analyses of EMF exposure from offshore export cables and onshore transmission to the point of interconnection located in Chesapeake, VA.

Senior Technical Advisor, Avangrid Renewables, Kitty Hawk Offshore Wind Project

(2019 - Present) Dr. Pearson Oversaw the analyses of EMF exposure from offshore export cables and onshore transmission to the point of interconnection located in the Hampton Roads region of Virginia.

Senior Technical Advisor, Equinor, Empire Wind I and II Projects (2017 - Present)

Dr. Pearson Oversaw the analyses of EMF exposure from offshore export cables and onshore transmission to the points of interconnection located in New York.

Senior Technical Advisor, Next Era Energy Resources Wheatridge Wind Energy Facility, Oregon (2019). Provided EMF analyses for transmission lines serving the Wheatridge Wind Energy Project,

Project Manager, Tri State Generation and Transmission Association 300 MW Rattlesnake Ridge Wind Project (2019).

Provided EMF analyses for transmission lines and high voltage switchyard serving the Rattlesnake Ridge Wind Project, Weld County, Colorado.

Project Manager, Xcel Energy, 1775 MW Rush Creek Wind Projects (2016–2018). Provided EMF analyses for transmission lines serving the Rush Creek Wind Project and the Shortgrass Switching Station for the wind farm in Lincoln County, Colorado.

Project Manager, Eastern Plains Transmission Project (EPTP), Western Area Power Administration and Tri State

(2007, 2008) Dr. Pearson represented WAPA and Tri State in over 30 public workshops (on EPTP) in Colorado and Kansas, to discuss the issue of EMF with members of the public and public officials.

Project Manager, Xcel Energy and Tri State Generation and Transmission Association transmission line projects.

Dr. Pearson represented both utilities at public meetings on the construction of several new or upgraded 115, 230 and 345 kV electric transmission lines in Colorado. Similarly, he has also represented other electric utilities in New Mexico, Utah, California and Florida over the last twenty years.

Introduction

One of the first utility-scale solar projects constructed in Virginia was constructed in Powhatan County in two phases from April 2016 to December 2017. This project is near two recently developed neighborhoods: Fighting Creek and Mill Station. These communities include parcels directly adjacent to the solar project, and houses as close as 600 feet from the project's limits of development. Home sales in these neighborhoods are a good comparison for the Amelia Energy Facility, due to the neighborhoods' proximity to Amelia County and a similar landscape.

Findings

We used a simple “price per square foot” value to track house sales in the area in recent history. The sale prices have steadily increased over time and the permitting and construction of the solar project do not seem to have affected the trend:

Re-Sales

Two homes in these neighborhoods sold both before and after construction of the Solar Facility: 3960 and 3950 Mill Station Drive. These homes, located immediately east of the project, were constructed in 2008 and 2013. Both homes initially sold in 2014 for \$324,000 and \$620,000, respectively. Both saw increases in the post-project sale: 3960 sold for \$364,900 in 2018 (12.6% increase over four years), and 3950 sold for \$795,000 in 2021 (28.2% increase over seven years). These increases appear to be in line with the increase in sale prices on other homes in the neighborhoods.

3950 Mill Station Drive

3960 Mill Station Drive

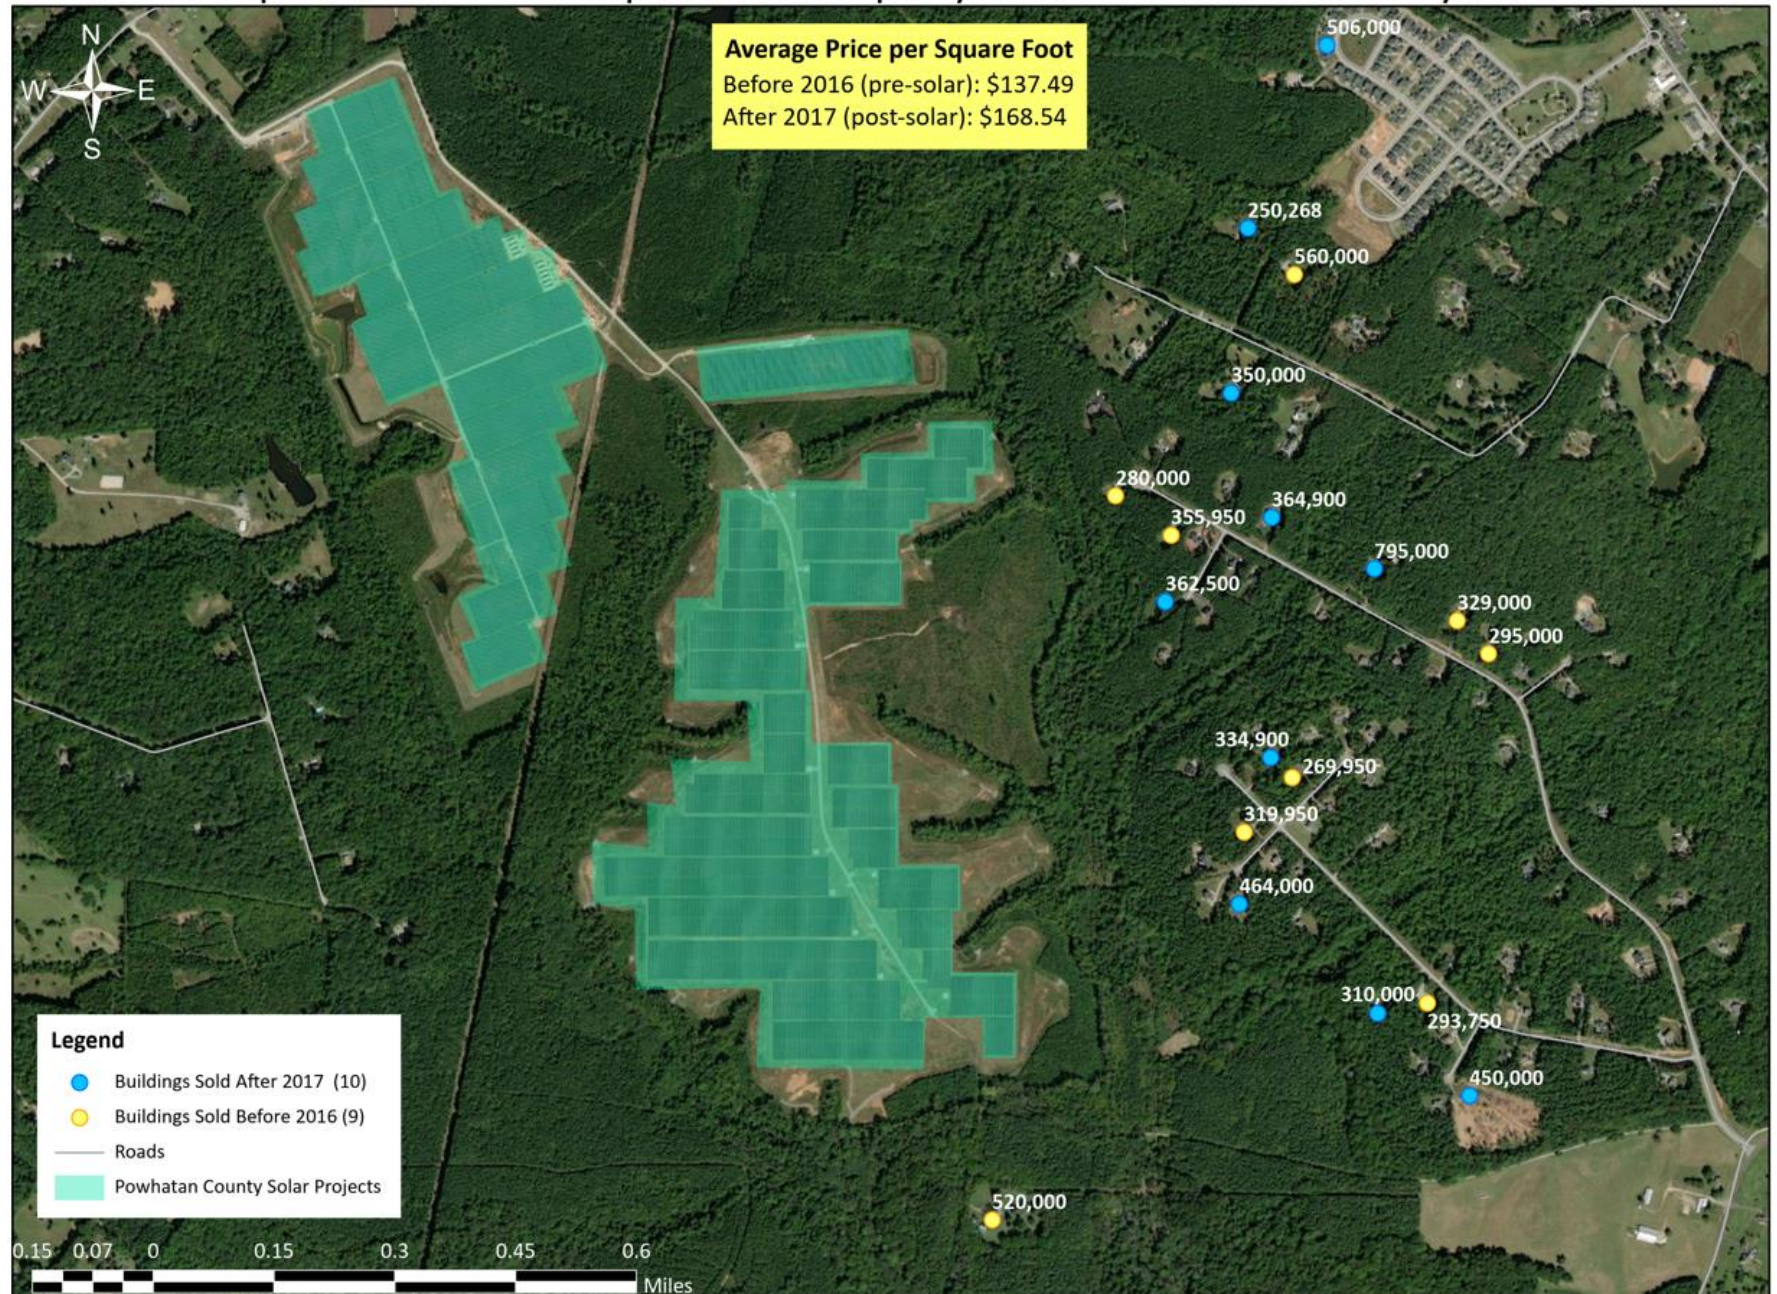

Diagram

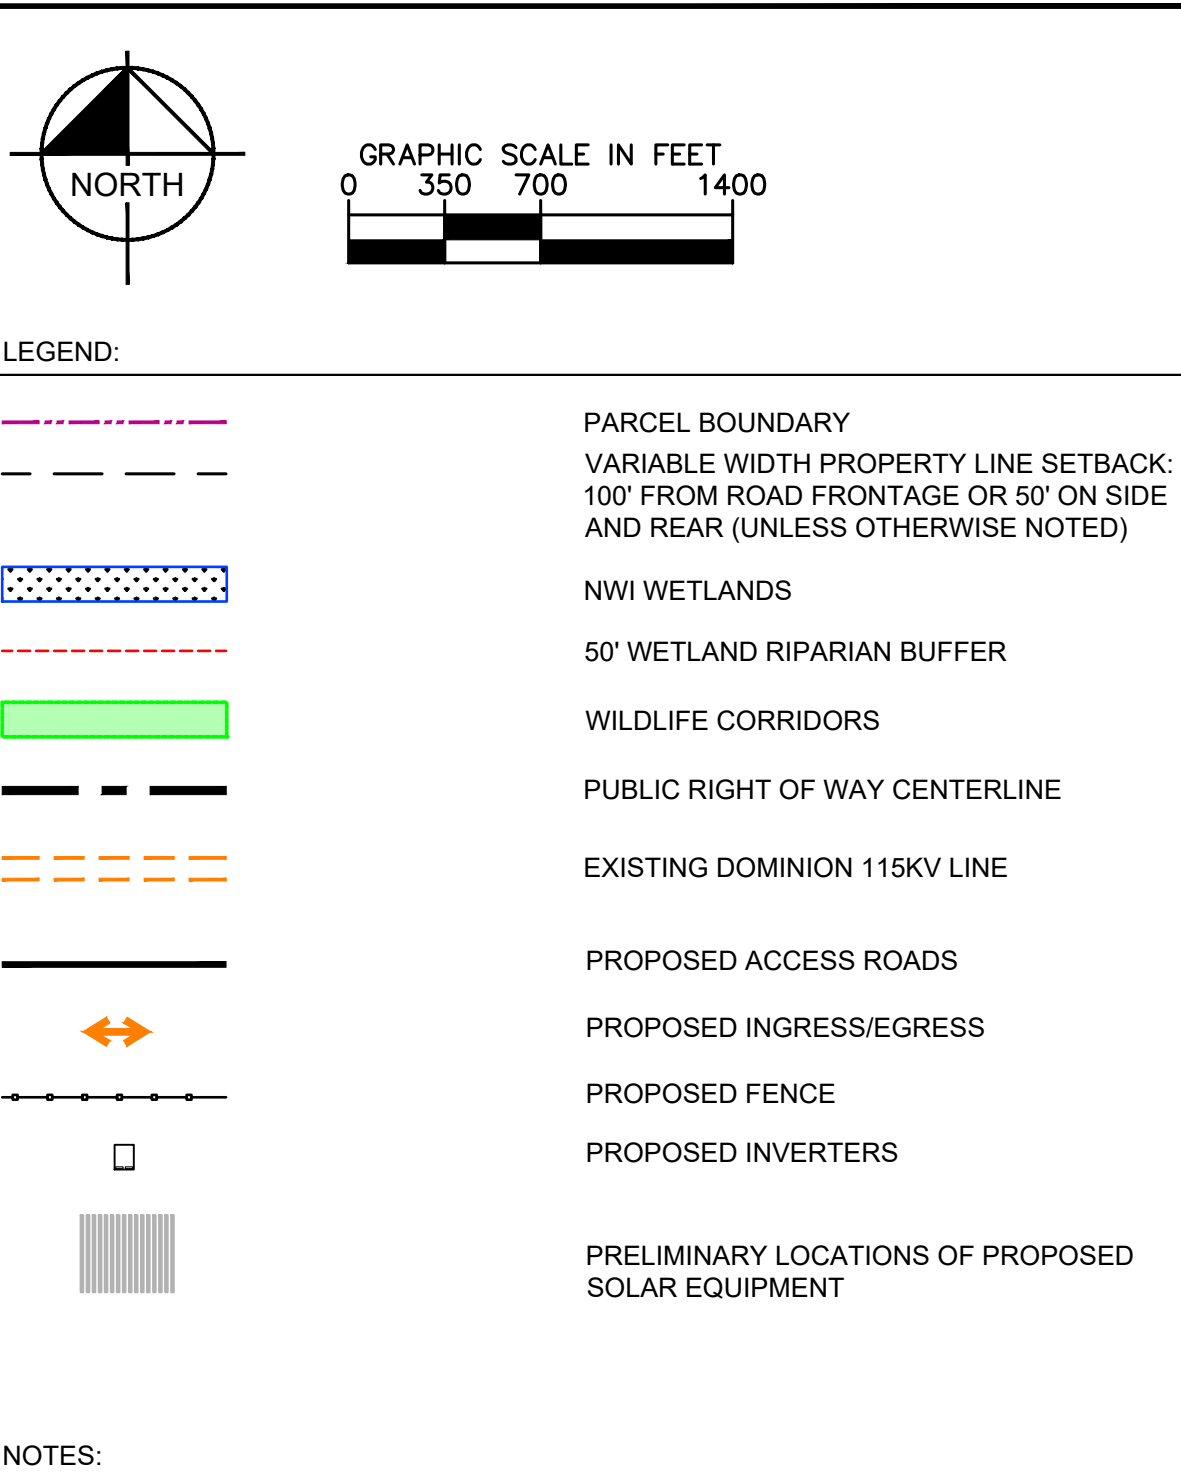

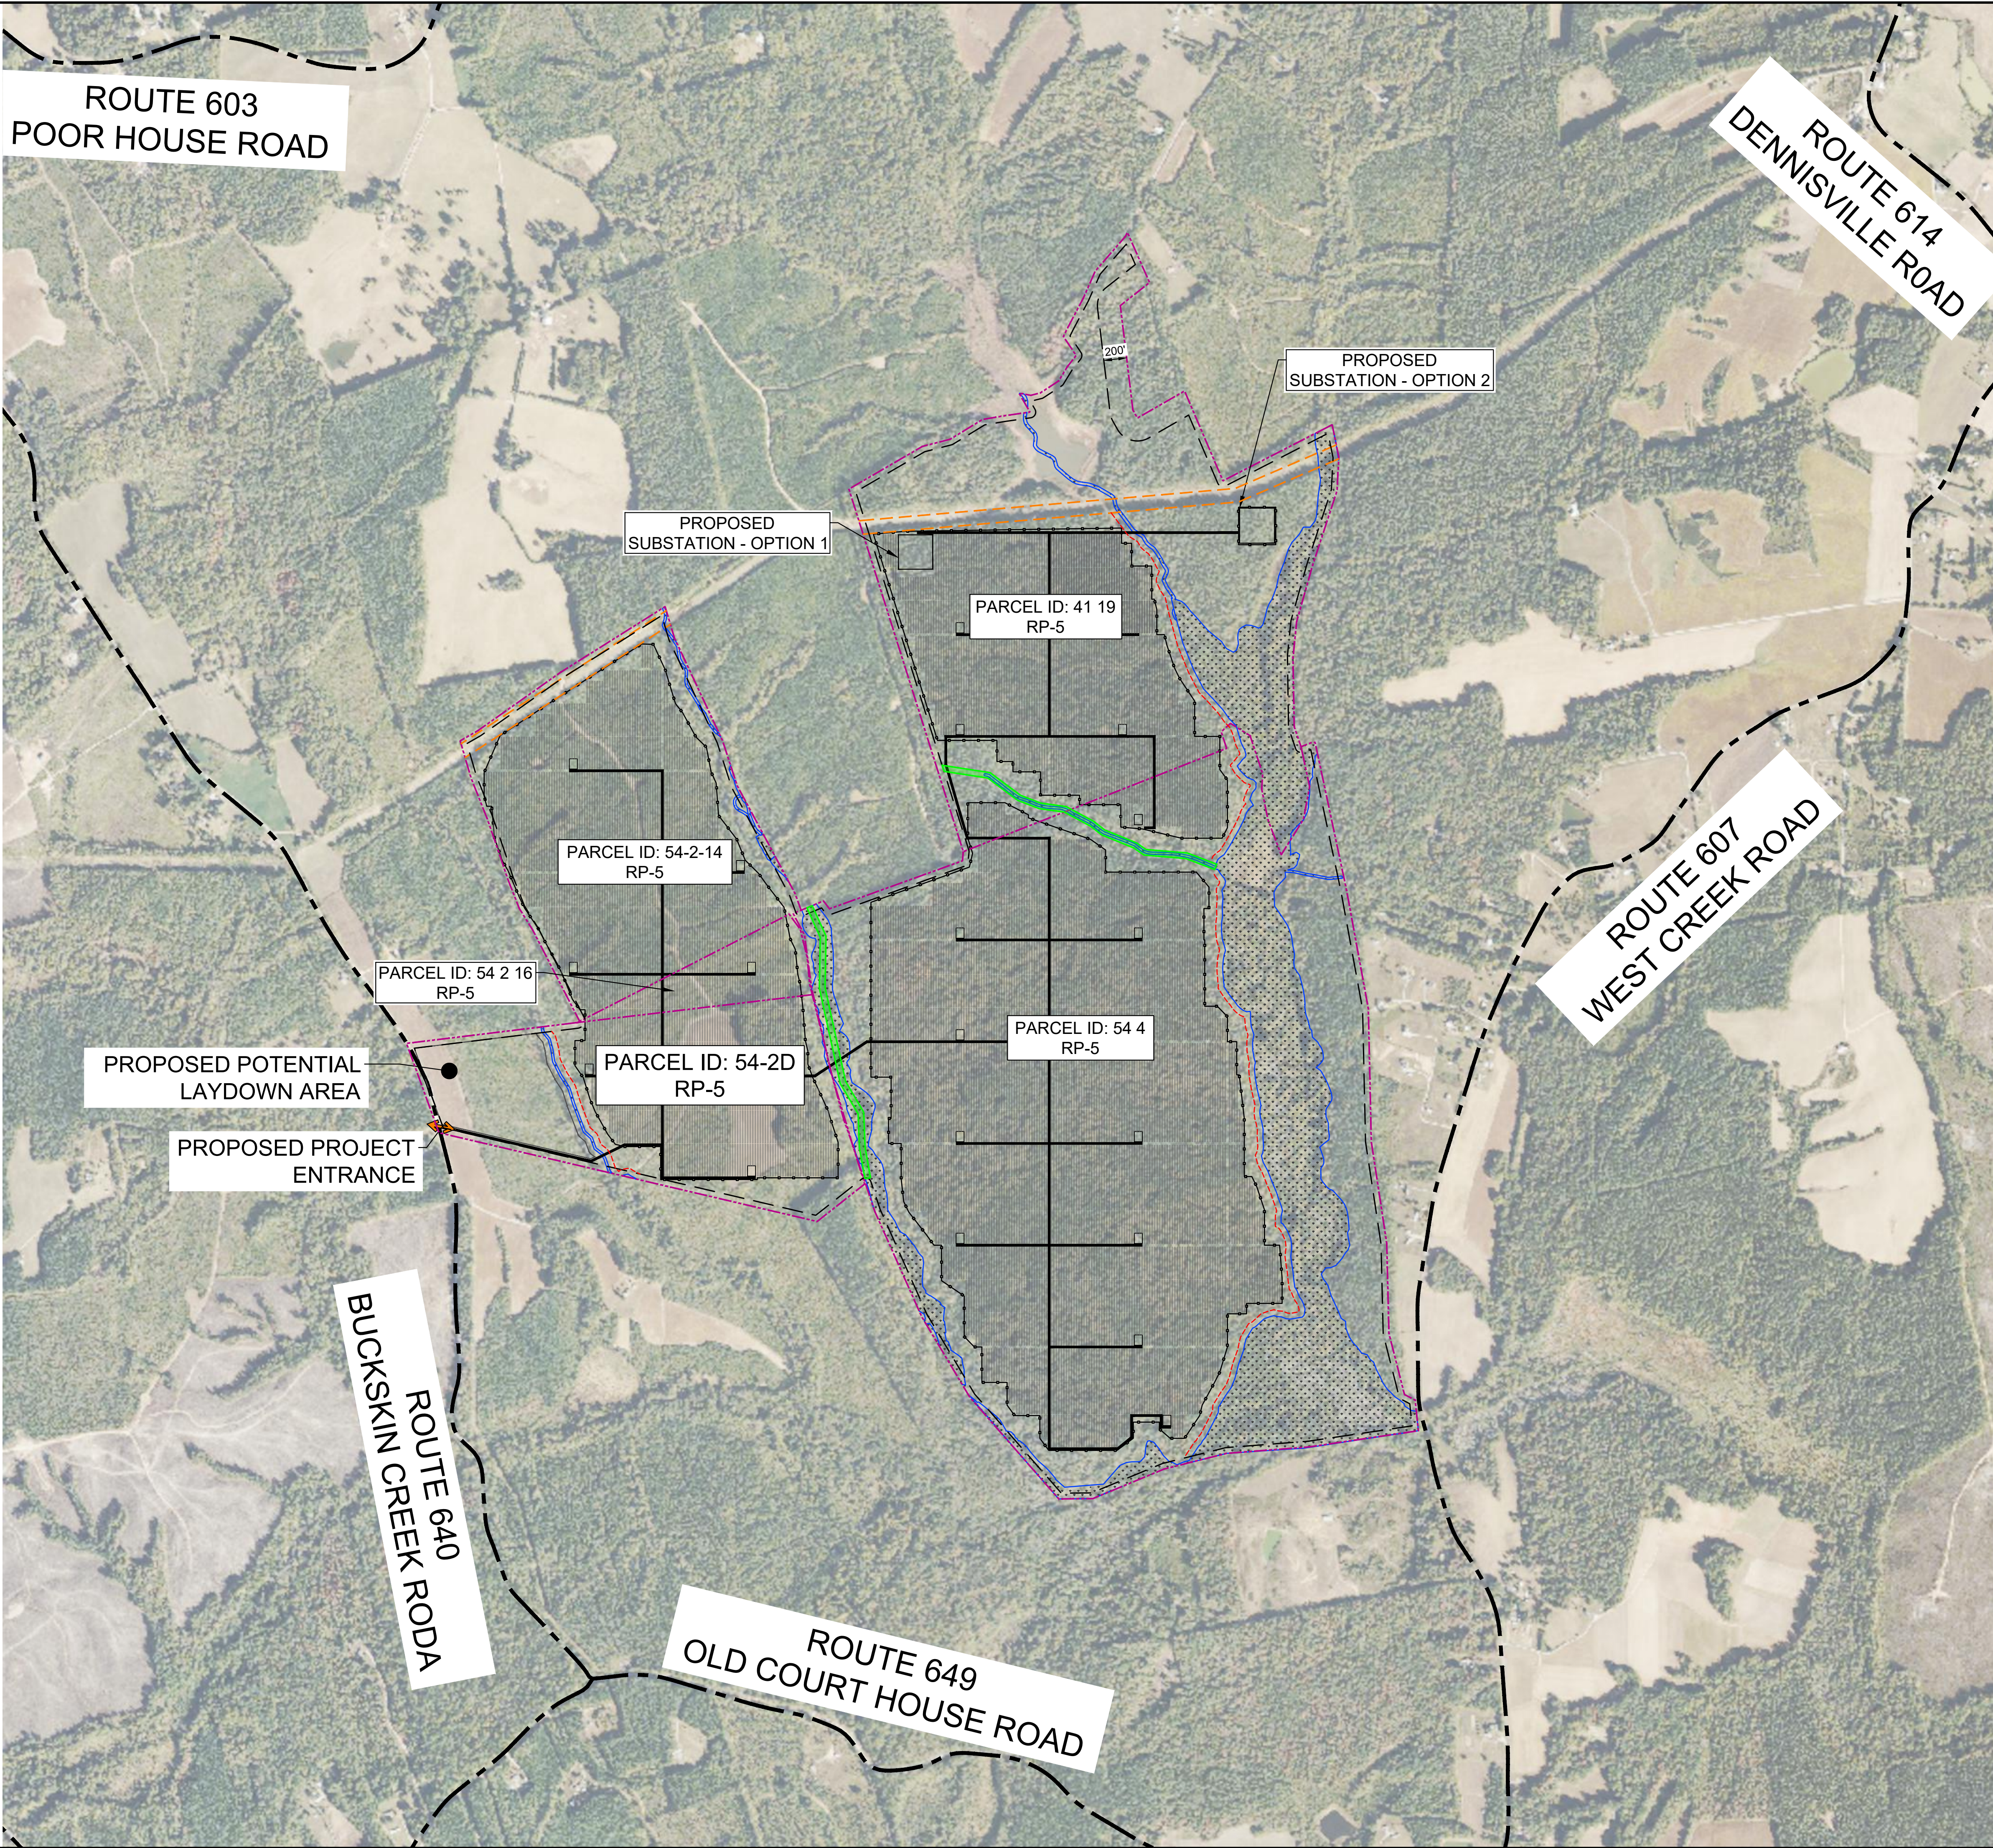

In the example from Powhatan County, the construction and operation of the solar project does not appear to have affected home values in the Fighting Creek and Mill Station neighborhoods.

Table 1: Summary

Dates of Sale	#	Avg. Sale Price	Avg. \$/sq.ft.
Before 2016 (Pre Construction; median year 2011)	17	328,888.20	130.06
2016-2017 (Mid-Construction; both sales 2017)	2	324,567.00	152.96
After 2017 (Post-Construction; median year 2019)	11	431,597.10	168.54

Impact of Solar Development on Property Values - Powhatan County

- NOTES:
1. EQUIPMENT LOCATIONS AND ACCESS POINTS SHOWN WITHIN THESE PLANS ARE CONCEPTUAL AND MAY CHANGE DURING FINAL ENGINEERING DESIGN AND VDO APPROVAL.
 2. IN FINAL DESIGN, THE PROJECT WILL FENCE NO MORE THAN 635 ACRES.
 3. PROPOSED CONSTRUCTION LAYDOWN AREA WILL BE LOCATED ON PARCEL 54-2.
 4. A MINIMUM 25' VEGETATIVE SCREENING BUFFER WILL BE MAINTAINED ALONG EXTERIOR PERIMETER OF FENCED AREAS.

RE: *Amelia Energy Facility, LLC Decommissioning Plans Request*

Dear Mr. Andrews,

Pursuant to your request for a Decommissioning Memorandum and Cost Estimate associated with the Solar Project in Amelia County, VA, kindly refer to the following pages. Should you have any questions, please feel free to contact me directly.

Please contact me at 804-673-3882 or Nicholas.Robertson@Kimley-Horn.com should you have any questions or concerns.

Sincerely,
KIMLEY-HORN

Amelia, VA 23002

**RE: *Amelia Energy Facility, LLC – Decommissioning Cost Estimate
Kimley-Horn #110188004***

Dear Members of the Department of Community Development:

The purpose of this letter is to provide a brief summary of Kimley-Horn's experience with solar energy facilities, the preparation of decommissioning costs associated with these facilities, and an overview of our estimating methodology.

Kimley-Horn has experience providing consultation on more than 30 GW of solar energy development across the country, ranging in size from <1 MW to over 500 MW. Many of these solar facilities are in North Carolina and Virginia.

There is little current data available regarding the actual costs to decommission a solar facility because there have been few (if any) decommissioned since the average expected life span of a solar facility is approximately 35 years. However, we have combined our extensive experience in estimating sitework construction costs with the experience of our solar energy clients in the construction of all aspects of these facilities to develop quantifiable and defensible unit costs.

Quantities for the racking system, solar modules, inverters, and transformers were provided to us by Amelia Energy Facility, LLC for this decommissioning cost estimate. Quantities for site-related items listed were estimated using the preliminary site plan. Salvage values of the various metal components were estimated using five-year average scrap metal prices for steel, and copper.

At the time of decommissioning, the owner of the solar farm will issue RFP's (Request for Proposals) to Recycling/Restoration companies to provide their bid to restore the site to its original conditions and sell the items of value to recyclers and dispose of items with no value in a landfill. The cost estimate for Year 5 shows that the cost to decommission the site is \$6,646,339 excluding all salvage value and accounting for inflation utilizing a 1.5% inflation factor each year. Please see the attached Decommissioning Cost and Salvage Value estimates.

Please contact me at (804) 673-3882 or Nicholas.Robertson@kimley-horn.com should you have any questions or concerns.

Sincerely,
KIMLEY-HORN

A handwritten signature in blue ink, appearing to read "Nick Robertson", with a stylized flourish at the end.

Nicholas Robertson, P.E.

**AMELIA ENERGY FACILITY, LLC
DECOMMISSIONING PLAN
SEPTEMBER 30, 2021**

Purpose

This decommissioning plan is provided by Amelia Energy Facility, LLC (the “Project Company”) and will detail the projected decommissioning demands associated with the proposed project.

The purpose of this decommissioning plan is to provide procedures and an opinion of probable construction cost for partial or full closure of the solar facility. Amelia County Code requires a decommissioning plan and performance guarantees to supplement plans submitted as part of a Special Exception Permit application package. This decommissioning plan details provisions for facility deconstruction and site restoration to satisfy the specific guidelines set forth in the County Code. This decommissioning plan shall take effect upon facility abandonment, discontinuation of operation, or expiration of the use permit as defined by Amelia County Code.

Site Location

Amelia Energy Facility, LLC proposes to build a photovoltaic (PV) solar facility (“Solar Facility”) with a nameplate capacity of approximately 106 MW_{AC} (“Project”), in Amelia County, VA. The Facility is located on approximately 635 acres of land, bounded by Poor House Road to the north, West Creek Road to the east, Buckskin Creek Road to the west, and within tax parcel identification numbers 41-19, 54-4, 54-2D, 54-2-14, and 54-2-16 (“Property”).

Anticipated Service Life of the Project

Unless the system is purchased by the County or other entity, the facility shall be decommissioned in accordance with this Decommissioning Plan (“Plan”), restoring the site to as close to its agreed-upon post-decommissioned state as practicably possible upon expiration or termination of the Power Purchase Agreement. The Solar Facility will have a maturity date of twenty (20) years but carries an expected useful lifetime of more than 30 years.

Decommissioning responsibilities include the removal of: any perimeter fences, any concrete or steel foundations, all metal structures (mounting racks and trackers), all photovoltaic (PV) modules, aboveground and underground cables, transformers, inverters, fans, switch boxes, fixtures, etc. and otherwise restoring the premises to its original position or mutually-agreed upon state. Other Plan activities include the management of materials and waste, projected costs, and a decommissioning fund agreement overview.

Decommissioning Risk Over the Lifecycle of a Project

The probability of an event that would lead to abandonment or long-term interruption is extremely low during the first 15 to 20 years of the Project life. Accordingly, the risk of decommissioning the Project is extremely low during this time frame. The reasons why the risk to decommission the Project is extremely low in the early phases of the Project include, but are not limited to:

- Project owners have sophisticated financing structures that allow the lender or tax equity partner to step in and rectify the event that may lead to abandonment.
- Most critical solar components have original equipment manufacturer (OEM) warranties with terms exceeding five years that include labor and parts. A warranty is an agreement or guarantee outlined by a manufacturer to a customer that defines performance requirements for a product or service. Warranties give customers a form of insurance if the purchased product or service does not adhere to quality standards. These warranties assure the Project owner, financing parties, and other stakeholders, that equipment will perform as expected which minimizes the risk of a decommissioning event. Average warranty lengths for critical solar components range from 5 to 10 years, with production warranties on solar panels extending to 20 to 25 years.
- Solar projects consist of many networked components designed to convert solar radiation into electrical energy. The failure of any single component will not result in a substantial reduction of energy generation that could lead to a decommissioning event.
- Solar projects are required to maintain replacement value property damage insurance coverage and business interruption insurance coverage. Business interruption insurance covers the loss of income that a business suffers after a disaster or equipment failure. Typical solar business interruption insurance covers income loss for twelve months from the date of the event triggering the loss.
- The replacement costs of solar components will typically decline over time, and accordingly, costs to replace failed or damaged equipment after lapsed OEM warranties will not create large financial hurdles for the Project.
- In the early stages of the Project, the resale value of the equipment is significantly higher than the decommissioning costs, resulting in a net positive (revenue).

Considering the reasons stated above, a decommissioning bond early in the life of a solar project life is not required to assure the coverage facility removal and site restoration costs.

Solar power is an increasingly popular form of renewable energy around the world and as an alternative to the burning of fossil fuels, solar ranks alongside wind and hydropower as essential energy options for the future of the planet. Solar also offers the additional benefit of being easier to build, operate, and decommission with minimal environmental risks. Recent rises in popularity and use can be linked to lower installation and operation costs and it is expected that this pattern will continue, further reducing the risk of a decommissioning event.

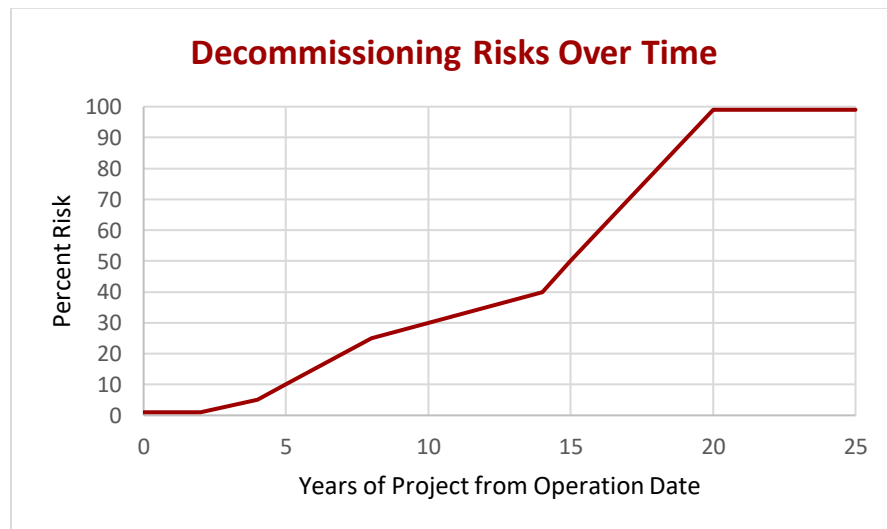

Decommissioning Risks Over Time

As previously noted, the probability of a decommissioning event that would lead to abandonment or long-term financial interruption is extremely low during the first 15 to 20 years of the Project life and accordingly, the financial risk to decommission the Project is also extremely low. A risk analysis approach is presented here for informational purposes only and has not been considered in the decommissioning cost estimates present in this Plan.

It is important to note that there are two aspects to consider when evaluating the risk for decommissioning the Project:

1. The risk of the need to decommission the Project as a whole (Project termination risk), and
2. The risk of failing to recuperate the cost of the decommissioning activities (decommissioning funding).

The most important concern for the County is the ability to recuperate the cost of decommissioning and restoration of the land to pre-Project conditions. The presence of a Power Purchase Agreement (PPA) in the first 20 years of the Project makes the likelihood of decommissioning very low during that time. The graph below summarizes the estimated decommissioning risk of cost recovery for the Project. The graph utilizes a “one percent” risk as the lowest risk; however, the financial value of the Project or equipment in the early years would far exceed the cost of the decommissioning and restoration activities and therefore, the graph is conservative.

The factors taken into consideration in estimating the risk include, but were not limited to:

- Years 1-5 – Minimal Project termination or financial risk due to presence of PPA with guarantee to purchase power, resale of value components, component warranties, value of facility.
- Years 5-10 – Similar consideration of previous period, except minimal increased financial risk due to the decrease in resale value of used components and rise in technological improvements of new equipment in market.
- Years 10-15 – Similar consideration of previous period, with slightly increased risk as warranties start to expire. Value of equipment is still substantial but decreasing.
- Years 15-20 – Similar consideration of previous period, warranties continue to expire; value of equipment diminishes with age and technological improvements in market.
- Years 20-25 – PPA expires, Project termination and funding risks increase, value of equipment diminishes, and technological improvements in market. A rise in salvage value of removed equipment due to diminishing natural resources and improvements in the efficiency of recycling/extraction technologies will offset the cost of decommissioning.

Commencement of Decommissioning

This Plan assumes that the Facility will be decommissioned under any of the following conditions:

1. The land lease (including the exercise of any extension options) ends and will either not be renewed or a new lease will not be entered into for the Project.
2. The system does not produce power for sale for a consecutive 12-month period, except in the instance of a force majeure event in which the Project is being repaired and/or restored.
3. The system is damaged and will not be repaired or replaced.

Removal of Nonutility Owned Equipment

To decommission the Solar Facility, the Project will include at a minimum:

- Disconnection from the utility power grid
- Removal of all Facility components: panels, inverters, wire, cable, combiner boxes, transformers, racks, trackers, tracker motors, substations, etc.
- Removal of all non-utility owned equipment (at point of interconnection), conduits, structures, fencing, and foundations to a depth of at least three feet below grade.
- Restoration of property to a condition reasonably similar to its condition prior to Facility installation, or as initially agreed upon.
- Plant vegetation suitable for the location, native to the region, and which matches surrounding vegetation.

The owner of the leased property may request in writing for certain items to remain, e.g., access roads.

This decommissioning plan is based on current best management practices and procedures. This Plan may be subject to revision based on new standards and emergent best management practices at the time of decommissioning. Permits will be obtained as required and notification will be given to necessary stakeholders prior to decommissioning.

The decommissioning process will maximize the recycling, reuse and salvage of applicable facility components, which are outlined in the opinion of probable construction costs. Based on the extent of decommissioning, prior to beginning construction activities, the developer will submit applicable demolition and construction plans and permit applications which will outline the schedule and extents of demolition. Decommissioning activities will not begin prior to issuance of approved permits by local regulatory agencies with appropriate jurisdiction.

Restoration of Property

In order to adequately restore the site to its previous condition, documentation using pre-construction video and/or digital photography will be performed prior to construction activities. This information will be reviewed prior to preparation of decommissioning demolition documents and included in the submittal to the County. Pre-construction documentation will also consist of detailed descriptions of existing vegetative and soil conditions as well as existing topography and drainage patterns.

At the time of decommissioning, the Project Company will restore the Solar Facility to a meadow-like condition. All waste and excess materials will be disposed of in accordance with municipal, provincial and federal regulations. Waste that can be recycled under municipal programs will be recycled accordingly. Provided, however, the Project Company shall not be required to replace any structures that were removed to build the Solar Facility.

The restoration will consist of de-compaction of the topsoil by disking or tilling and re-vegetation of the property. Mass grading is not anticipated since the initial project will not alter topography significantly. At the end of the project the area will be seeded and fertilized with native vegetation as needed to return the site to as close as practicable to original or initially agreed-upon condition. Landscaping and entrance will remain following site restoration. The future use of the land will be determined at the time of decommissioning. Deciding factors will be influenced by County land use and comprehensive plans and regulations at such time in the future.

The developer will coordinate with the County to monitor vegetation and drainage following restoration until permanent vegetation is established. Erosion and sediment control, re-seeding, soil stabilization, weed control and fertilization will be provided by the developer as needed until the site is stabilized and approved to be completed by the County.

Upon completion of the site restoration, a final report of activities will be submitted to the County documenting the process and results.

Time Period to Complete Decommissioning

The Project Company will have twelve (12) months from the date decommissioning commences to complete decommissioning. Provided, however, the Project Company shall be able to request an extension if it is in good faith diligently decommissioning and is delayed due to weather conditions or other items outside its control.

Party Responsible for Decommissioning

The Project Company is responsible for this decommissioning, provided however that the Project Company may contract with a third-party to perform the decommissioning on its behalf. Nothing in this plan relieves any obligation that the real estate property owner may have to remove the Facility as outlined in the Special Exception Permit in the event the operator of the Facility does not fulfill this obligation.

Decommissioning Cost Estimate and Bonding

An engineer's opinion of probable construction cost and analysis of material salvage value were prepared as part of this decommissioning plan. Exhibit A summarizes the probable costs and salvage values associated with decommissioning. Exhibit B summarizes probable costs associated with decommissioning exclusive of salvage values. Exhibit C summarizes probable costs associated with trucking panels to approved recycling facilities.

Amelia County Code requires Amelia Energy Facility, LLC to provide a faithful performance bond as a financial guarantee for proper decommissioning. This bond is separate from, and in addition to, performance bonding submitted for permitting. Furthermore, Amelia Energy Facility, LLC will be required to submit detailed engineering plans at the time of decommissioning, and obtain construction permits as required by appropriate authorities.

Expenses associated with decommissioning the Project will be dependent on labor costs at the time of decommissioning. For the purposes of this report, current RSMeans data was used to estimate labor, material, and equipment expenses. Inflation of the labor costs were factored into the estimates using an inflation rate of 1.5% per year.

Total probable cost of decommissioning in Year 5 is estimated to be **\$6,646,339**.

Resale/Salvage Value Estimate

There is a robust secondary market for resale of solar PV panels worldwide and a network of facilities available for recycling panels. Solar PV panels are estimated to degrade less than 0.5% per year, meaning they're expected to operate at 90% of capacity after 20 years. Panel manufacturers will guarantee the performance for each individual module and replace defective modules per the terms of warranty. Panels can therefore be sold for a price higher than their scrap value.

In general, the highest component value would be expected at the time of construction with declining value over the life of the Project. Over most of the Project's life, components such as the solar panels could be sold in the wholesale market for reuse or refurbishment. As panel efficiency and power production decrease due to aging and/or weathering, the resale value will decline accordingly. Secondary markets for used solar components include other utility scale solar facilities with similar designs that may require replacement equipment due to damage or normal wear over time; other buyers (e.g., developers, consumers) that are willing to accept a slightly lower power output in return for a significantly lower price point when compared to new equipment. The solar facility's additional supporting components, such as inverters, transformers, racking and piles, can be dismantled and resold for scrap value. Inverters and transformers are comprised of salvageable materials such as copper, aluminum, and silver. Piles and other steel components can likewise be recovered and

salvaged. Resale values at the end of Year 5 for equipment of significant value were calculated with straight-line depreciation after an instant depreciation of the original material cost.

A current sampling of reused solar panels indicates a wide range of pricing depending on age and condition (\$0.10 to \$0.50 per watt). Future pricing of solar panels is difficult to predict currently, due to the relatively young age of the market, changes to solar panel technology, and the ever-increasing product demand. A conservative estimation of the value of solar panels in Year 5 at \$0.18 per watt would yield approximately \$18,575,061. Increased costs of removal, for resale versus salvage, would be expected to preserve the integrity of the panels; however, the net revenue would still be substantially higher than the estimated salvage value.

The resale value of components such as trackers, may decline more quickly; however, the salvage value of the steel that makes up a larger portion of the tracker is expected to stay at or above the value used in this report.

The market value of steel and other materials fluctuates daily and has varied widely over the past five years. Salvage value estimates were based on an approximate five-year-average price of steel and copper derived from sources including on-line recycling companies and United States Geological Survey (USGS) commodity summaries. The price used to value the steel in this report is \$312 per ton. The price used to value copper in this report is \$3.09 per lb.

Total probable salvage value of decommissioning in Year 5 is estimated to be **\$23,302,838.**

LAND MANAGEMENT PLAN

NATIVE GRASS AND FORB HABITAT

AMELIA SOLAR PROJECT

The purpose of this Land Management Plan (LMP) is to provide guidelines for maintaining areas of native grass within the Amelia Energy Facility. This plan incorporates Integrated Vegetation Management (IVM) concepts to ensure best practices are utilized throughout the project life. Unlike traditional naturalized seed mixes containing turfgrass or pasture type forage grasses and legumes, native grass habitat seed mixes contain forbs (flowering plants) and native grasses. Additional steps must be taken during the initial years of establishing native grass habitat from seed that may be different or absent from traditional naturalized grass and legume pasture mixes. Without implementing the monitoring and maintenance guidelines discussed in this LPM, the likelihood of successful native grass and forb habitat establishment is decreased. When performed correctly, the long-term maintenance needs of native grass and forb habitat are generally less than traditional solar maintenance needs.

LMP involve the use of various types of vegetation management treatments including removing, pruning, and mowing undesirable vegetation to allow native plants to thrive. The overall goal of LMP is to develop site-specific, environmentally sensitive, and cost-effective solution to vegetation control, while still meeting the goal of creating and maintaining native grass and pollinator habitat vegetation. This integrated plan will require observing the conditions of the site and determining the appropriate maintenance techniques. This document will aid the Maintenance and Operations division in deciding how to manage the vegetation in a way that promotes a healthy self-sustaining native grass and forb habitat. The goal is to reduce maintenance inputs over time by promoting, improving, and sustaining the health and diversity of native grass and forb species.

Goals

One of the primary goals in the initial years of native grass and forb habitat establishment is controlling noxious and invasive weed populations. These weed species tend to flourish in disturbed soils after construction. Techniques must be implemented to both control weeds, while allowing slower growing native plants to become established.

- Provide diverse habitat for insects and mammals
- Control noxious and invasive weed species
- Use the right treatment at the right time
- Use chemical control only when necessary
- Reduce inputs over time
- Maintain clearance for panels

Invasive Weed Management Techniques

- Physical and Mechanical Control
- Chemical Control
- Best Management Practices
- Biological Control

Included in this Integrated Vegetation Management Plan

1. Guidelines for Site Monitoring
2. Weed Control Techniques and Guidelines
3. Seeding Specifications

LAND MANAGEMENT PLAN

Guidelines for Site Monitoring

Monitoring native grass and forb habitats is critical during the first 1 to 5 years of establishment. Proper and periodic field monitoring and field notes during site visits will allow for the most effective LMP. Sites should be visually monitored periodically during the first 3 years (spring, summer, and fall) and at least once per year after year 4. In the initial year of establishment four monitoring events may be required (May, June, August and September), based on site conditions. The site should be visually monitored for invasive weed presence and the health and abundance of native species.

Data Collection

Site monitoring can be conducted in conjunction with routine mowing or operational visits during the first three years. It is recommended that monitoring should occur at minimum three to four times per year, in the spring, summer and fall. If areas are identified that need special considerations the following information should be recorded:

1. Date of monitoring event
2. Plant vigor of desired species
3. Weed species present.
4. Abundance of weeds present.
5. Location of weedy species
6. Desirable species present.
7. Abundance of each desirable species.
8. Growth stage of both desirable and weed species (blooming or not blooming).

Individuals performing the monitoring should be:

1. Trained in identifying common native grass and forb species (and specifically species in the seed mix).
2. Trained in identifying common noxious and invasive weed species.
3. Familiar with growth habits and aggressiveness of common noxious and invasive weed species.

LAND MANAGEMENT PLAN

Weed Control Techniques and Guidelines

Monitoring and controlling undesirable plants and weeds is critical to maintaining a functioning and sustainable native grass and forb habitat. Weed management should be conducted based on the goals of the site and using IVM techniques. Each situation requires an assessment to determine the safest, most efficient, and cost-effective methods to utilize. There are several methods for controlling weeds, the following techniques should be considered:

1. Minimize spreading of noxious and invasive weeds
 - a. Clean equipment regularly especially after moving through areas known to have noxious and invasive weeds (Best Management Practice)
 - b. Limit traffic through areas known to have noxious and invasive weeds (Best Management Practice)
 - c. Mow prior to noxious/invasive weeds forming flowers and viable seeds (Mechanical Control).
2. Control noxious and invasive weeds
 - a. Utilize mowing as an alternative to broadcast herbicide applications (Mechanical and Best Management Practice)
 - b. Monitor sites to provide early detection and control of invasive and noxious weeds is critical to native grass and forb habitat management (Best Management Practice)
 - c. Utilize spot spraying when possible to chemically control weedy species in and around pollinator habitat areas instead of broadcast spraying (Best Management Practice and Chemical Control)
3. Target treat noxious and invasive weeds
 - a. Employ weed management techniques only to areas with weed infestation (Best Management Practice).
 - b. Avoid blanket herbicide applications in areas with desirable plants (Chemical and Best Management Practice)
 - c. Time all chemical and mechanical to decrease noxious and invasive weeds while promoting desirable plant propagation (Best Management Practice).
4. Control weeds before flowering
 - a. Control methods are more effective on younger plants (Best Management Practice)
 - b. Less harmful to native grass and forb plant species
5. Use registered herbicides according to label.

Mechanical Control

Mechanical weed control involves methods that involve physically damaging or removing undesirable plants without the use of herbicides. Mechanical control is especially effective in areas where desirable species are present. Several methods of mechanical weed control exist including:

1. **Mowing**

Mowing is one of the most effective and preferred methods of weed control. Mowing physically cuts undesirable weeds, therefore weakening the plant and prevent spreading. The following guidelines should be considered when mowing:

 - a. Mow before weed species form flowers and seed heads.
 - b. **Do not mow areas to less than 6 inches during the growing season.**
 - c. Maintenance mowing should be performed in late winter or early spring and mowed to a shorter height, 4 inches.
2. **Hand Pulling**

Hand removal of plants may be appropriate for small areas and when plants are young and easily removed. When removing plants, the root system should be removed.
3. **Cultivation**

Cultivation, or tillage, can be implemented to control weeds by physically removing plants and exposing the roots with a tillage implement. This method will also remove beneficial plants and should only be used in conjunction with re-seeding.

Chemical Control

Undesirable weeds can effectively be controlled by chemical methods using herbicides. Herbicide use should be limited and used in conjunction with other methods, such as mowing. Chemical control of noxious/invasive and undesirable weeds within the native grass and forb habitat can be an effective way to suppress weeds while allowing beneficial species to thrive. The following guidelines should be implemented:

1. Use selective herbicides when other techniques, such as mowing, are ineffective or impractical.
2. Use only registered herbicides.
3. Apply according to product label and adhere to the Environmental Hazards section.
4. Choose products with low or no toxicity to bees.
5. Use the lowest effective pesticide application rate to control the target pest.
6. Apply pesticides when pollinators are least likely to be present (before or after blooming seasons)
7. Spot spraying is preferable to a broadcast application method.
8. Use buffer zones between areas of pesticide application and sensitive species and habitats, water, and potential nectar sources to avoid contamination and help protect pollinators.
9. Applicator should be trained in the identification of both desirable and undesirable species and may need to be Licensed in the state as a Pesticide Applicator/Operator, depending on local or company regulations.

Methods of Chemical Control

1. Broadcast herbicide spray
 - a. With a backpack, hand, or ATV mounted tank sprayer, apply appropriate selective herbicide for weed species identified in large swaths containing primarily weeds.
 - b. Avoid areas with desirable plants.
2. Spot treat herbicide
 - a. Spray isolated weed plants mixed among desirable plants to prevent spreading.
3. Cut and treat small tree and shrub stumps
 - a. Apply appropriate herbicide to the stump immediately after cutting.
 - b. Use this method for woody invasive tree and shrub species.

Best Management Practices

Best Management Practices involve education and implementing various control methods at the correct time and avoiding practices that harm native grass and forb habitat and/or spread noxious and invasive weeds. These practices include the following:

- 1) Minimizing traffic into and out of areas with noxious and invasive weeds.
- 2) Monitoring to identify weeds prior to becoming a significant problem.
- 3) Educating weed management professionals to alternative weed management options.
- 4) Cleaning equipment after traveling through known areas with noxious and invasive weed populations.
- 5) Allowing native plant populations to proliferate and spread.

Biological Practices

Biological Practices involve using natural biological organisms to control weedy species. In a solar area with forbs one potential biological controls is animal grazing. If animal grazing is utilized the following practices should be employed:

- 1) Use rotational grazing so all vegetation is foraged.
- 2) Move mineral and water sources to ensure proper grazing throughout paddock.
- 3) Do not overgraze the site.
- 4) Change rotational patterns annually to promote plant diversity.

SEED MIXES

NATIVE GRASS PRAIRIE/POLLINATOR HABITAT AREAS- AMELIA SOLAR PROJECT

NATIVE LOW-GROW GRASS MIX					
Common Name	Scientific Name	Average Height (Inches)	# PLS/acre	PLS/sq ft	% of Mix
Little Bluestem	<i>Schizachyrium scoparium</i>	24	2.0	12	20%
Sideoats Grama	<i>Bouteloua curtipendula</i>	18	2.7	12	20%
Prairie Junegrass	<i>Koeleria macrantha</i>	12	0.2	12	20%
Virginia Wildrye	<i>Elmymus virginicus</i>	24	3.3	6	10%
Upland Bentgrass	<i>Argostis perennas</i>	18	0.03	6	10%
Red Clover	<i>Trifolium pratense</i>	18	1.0	6	10%
Partridge Pea	<i>Chamaecrista fasciculata</i>	12	4.2	6	10%
Total	--	--	13.4	60	100%

The native low-grow grass mixture is a predominantly native grass with a forb/legume mix. The mix contains primarily native grass species with forbs/legumes to promote a self-sustaining plant ecosystem. This mix is designed in areas throughout the site but may not be well suited for areas with prolonged high-water table or wetlands. This mix is lower growing as to limit mowing and panel shading. Seed mix should be planted with a suitable nurse crop based on planting timing. The above proposed seed mix may be altered based on seed availability and site-specific factors.

Potential Nurse Crops:

Spring (March 1 - June 1): 20 lb Spring oats or 5 lb annual rye per acre

Summer (June 1 - August 15): 8 lb brown top millet per acre

Fall/Winter (August 15 - March 1): 20 lb winter wheat or 5 lb annual rye

SOLAR FACILITY SITING AGREEMENT

This Solar Facility Siting Agreement (“**Agreement**”), dated as of _____, 2022 (the “**Effective Date**”), is by and between Amelia County, Virginia, a political subdivision of the Commonwealth of Virginia (the “**County**”) and Amelia Energy Facility, LLC a Virginia limited liability company (“**Applicant**”). The County and Applicant are herein each a “**Party**” and collectively, the “**Parties**”.

RECITALS

WHEREAS, the Applicant intends to develop, install, build, and operate a ground-mounted solar photovoltaic electric generating facility (“**Project**”) on certain parcel(s) of land identified as Amelia County Tax Map Parcel(s) 41-19, 54-4, 54-2-14, 54-2D, and 54-2-16 (etc.) (collectively, the “**Property**”), which Project may be developed, constructed and interconnected in one or more phases, each having a different generation capacity as measured in megawatts of alternating current (AC) (each a “Phase”), with the initial such Phase having an expected minimum generation capacity of eighty-six (86) megawatts, and the second such Phase having an expected minimum generating capacity of twenty (20) megawatts;

WHEREAS, Pursuant to Chapter 22, Title 15.2, Article 7.3 of the Code of Virginia titled “Siting of Solar Energy Facilities” Applicant and the County may enter into a siting agreement (“**Siting Agreement**”) for solar facilities;

WHEREAS, pursuant to Virginia Code § 15.2-2316.6, the Project is eligible for a Siting Agreement;

WHEREAS, after negotiation between the County and the Applicant, the Parties desire to enter into this Agreement to mitigate certain potential impacts of the Project.

WHEREAS, pursuant to Virginia Code § 58.1-2636, the County has adopted an ordinance assessing a revenue share of up to \$1,400.00 per megawatt (plus a 10 percent increase every 5 years as authorized by statute), as measured in alternating current (AC), of the aggregate nameplate electric generation capacity of the Project (“**Solar Revenue Share**”);

WHEREAS, Pursuant to Virginia Code § 58.1-3660, since the County has adopted a Solar Revenue Share Ordinance, the solar photovoltaic (electric energy) systems associated with the Project, which are considered “certified pollution control equipment;” will be exempt from all state and local taxation pursuant to Article X, Section 6 (d) of the Constitution of Virginia (the “**Tax Exemption**”);

WHEREAS, the Applicant has agreed to the payments and financial terms contained herein;

WHEREAS, pursuant to the requirement of Virginia Code § 15.2-2316.8 (B), the County has held a public hearing in accordance with subdivision A of Virginia Code § 15.2-2204 for the

5.4.22 DRAFT

purpose of considering this Agreement, after which a majority of a quorum of the members of the Amelia County Board of Supervisors approved this agreement;

NOW, THEREFORE, pursuant to Chapter 22, Title 15.2, Article 7.3 of the Code of Virginia, intending to be legally bound hereby and in consideration of the mutual covenants contained herein, the receipt and sufficiency of which are hereby acknowledged, the County and Applicant do hereby agree as follows:

Article I

Project Features, Conditions and Mitigation

1. SEP Conditions. The Applicant acknowledges and agrees that it is subject to all the terms and conditions contained in any special exception permit (“**SEP**”) approved by the Board of Supervisors for the Project. The SEP approved by the Board on _____, 2022 is attached hereto as **Exhibit A** and is hereby incorporated herein. Violation by the Applicant or by any of Applicant’s agents, assigns, or successors in interest of any terms and conditions of the SEP or of any other applicable zoning requirements shall constitute a violation of this Agreement.

2. Annual Valuation of Real Property. As a condition precedent to County approval of this Agreement, and as provided by Virginia Code § 58.1-3294, Applicant agrees to coordinate with the county’s efforts to get all parcel owners of the Property to provide the County’s duly authorized real estate assessor with property statements of the income and expenses, including but not limited to income earned by the landowner(s) from leasing the real property to Applicant, its successor or assigns, attributable over a period of time, as specified by the assessor, to each such parcel of real estate. Each statement shall be certified as to its accuracy by an owner of the parcel for which the statement is furnished, or a duly authorized agent thereof. Any statement required by this paragraph 2 shall be kept confidential in accordance with the provisions of Virginia Code § [58.1-3](#). Applicant further agrees to include as a condition in any agreements transferring ownership of the Project entered into by Applicant a requirement that any successor in interest shall undertake the coordination obligations set forth in this paragraph 2.

3. Decommissioning, Periodic adjustment of Decommissioning Security, Deferral and Salvage Value. The Parties agree that Decommissioning Security (as defined below), to cover the costs of decommissioning Applicant’s facilities, is required as a condition in the SEP, except as otherwise agreed to herein. Further, the Applicant recognizes the protection this provides for the County taxpayers and does not desire to shift that expense to them should the Applicant or its successors or the landowner not be able to comply with the decommissioning requirements set forth in the SEP (the “**Decommissioning Obligations**”); and County recognizes that the Decommissioning Security is an expense to be incurred by the Applicant encumbering funds that could otherwise go directly towards investing in the Project or other potential projects. In recognition of these factors, the Parties desire for the Decommissioning Security and the costs for such to accurately reflect the associated decommissioning costs being insured. Therefore, the Applicant, or its successor, agrees to update the gross estimated costs of performing the Decommissioning Obligations (“**Gross Decommissioning Costs**”) every three (3) years, unless a

5.4.22 DRAFT

longer interval is agreed to in writing by the County, and to reimburse the County for an independent review and analysis by a licensed engineer. The Decommissioning Security amount shall be adjusted accordingly to ensure it accurately reflects the costs associated with performing the Decommissioning Obligations. As used herein: (i) “**Decommissioning Security**” shall mean either (a) a bond, surety or letter of credit from a Qualified Financial Institution (as defined below) securing the payment or performance of the Decommissioning Obligations, or (b) a corporate guarantee from a Qualified Guarantor (as defined below) pursuant to which such Qualified Guarantor guarantees to the County, in the event of a default by Applicant in the performance of the Decommissioning Obligations, the reimbursement to the County of its actual out of pocket costs incurred in performing such obligations, up to the amount of the Net Decommissioning Cost (as defined below); (ii) “**Qualified Financial Institution**” means an FDIC-insured bank or other financial institution with assets exceeding \$1 billion; (iii) a “**Qualified Guarantor**” means an entity that either (a) is a public service corporation as defined under the laws of the Commonwealth of Virginia, (b) has a tangible net worth of not less than Fifty Million Dollars (\$50,000,000), as verified by financial statements certified to County by such company’s chief financial officer or equivalent, (c) has equity interests listed on the NYSE, NASDAQ, or another national public equities exchange, or (d) whose senior unsecured debt carries a credit rating of at least Baa3 or better by Moody’s, BBB- or better by S&P, and/or BBB- or better by Fitch (or the equivalent(s) under any successor rating category of Moody’s, S&P or Fitch, as applicable); and (iv) “**Net Decommissioning Cost**” means the Gross Decommissioning Costs less the Salvage Value (as defined below).

Notwithstanding any provision herein to the contrary, and in accordance with the SEP, the County agrees to the following:

a. to defer the requirements of this section until 5 years after the date the first Phase of the Project commences Commercial Operation (as defined below) (the “**Commercial Operation Date**”). The purpose of this deferral is to recognize that the likelihood of decommission being required this early in the project life is very remote. “**Commercial Operation**” shall mean, with respect to any Phase of the Project, the delivery to the electric grid, for sale to third parties, of electrical power generated by such Phase, other than deliveries of test power.

b. to allow the Applicant to apply the Salvage Value (as defined below) to the calculations in determining the required amount of Decommissioning Security. The “**Salvage Value**” shall mean the estimated gross sale value that could be realized upon resale of salvage of Project equipment after decommissioning of the Project, as determined by independent review and analysis by the same licensed engineer engaged from time to time to review the Gross Decommissioning Costs.

The Parties recognize and agree that paragraphs 3(a) and 3(b) both assist the Applicant in successful project development and support the Applicant’s ability to make payments to the County under this Agreement.

4. Right of Entry for Enforcement and Decommissioning.

5.4.22 DRAFT

- a. **Enforcement.** Applicant and the County acknowledge and agree that the County, its personnel and duly authorized agents shall have the express right of entry upon the Project parcels for the purposes of inspecting solar panels, battery storage facilities and all appurtenant facilities. The County shall provide the Applicant with reasonable advance written notice of no less than forty-eight (48) hours, in any event, prior to making such entry for any inspection or enforcement purposes. No prior notice shall be required to enter the Project in the event of an emergency that constitutes an immediate danger to life or property.
- b. **Decommissioning.** If the Applicant fails to decommission the project, the County shall have unrestricted access to the Project to effect any and all tasks, as necessary, to decommission solar panels, any battery storage equipment and all appurtenant facilities and restore the parcels to substantially the same condition that existed prior to construction of the solar facilities and as provided by Va. Code § 15.2-2241.2, as it may be amended through the Termination Date as defined in this Agreement. Such access rights shall remain in effect through decommissioning regardless of whether Va. Code § 15.2-2241.2 is repealed or otherwise limited in scope from the access rights it provides the County as of the date of execution of this Agreement.

5. Broadband. The Parties acknowledge that the County’s citizens and businesses are largely underserved by accessible and affordable high-speed Internet (“Broadband”) and that addressing that problem is an important policy goal to improve education, health care and economic opportunity in the County. In an effort to expedite County plans to help close the “digital divide” and increase the availability of affordable broadband throughout the unserved and underserved areas in the County, which will in turn benefit the local economy and business including Applicant, Applicant agrees to make the payments as set out in Article II and as permitted under Virginia Code § 15.2-2316.7.

Article II

1. Payment Structure; Capital Payments. After the Project, or any Phase thereof, has obtained Commercial Operation, except as otherwise provided herein, the Applicant shall make annual payments to the County (each an “Annual Payment” and collectively, the “Annual Payments” as follows for each Phase:

an initial Annual Payment due on the first December 1st to occur after the Commercial Operation Date for such Phase in the amount equal to the Capacity (as defined below) of such Phase multiplied by Eight Hundred Fifteen Dollars (\$815), and thereafter Annual Payments due on December 1st each year until the earlier of the following the **Termination Date** (as defined below) in an amount equal to three and one-quarter percent (3.25%) over the preceding year’s Annual Payment. As used herein: “**Capacity**” shall mean, with respect to a Phase, the electric power generation capacity of such Phase, as measured in alternating current megawatts, as shown or described in connection with the site plan approval for such Phase; and (b) the “**Termination Date**” shall mean, with respect to each Phase, the earliest to occur of (i) the Applicant’s commencement of the decommissioning

5.4.22 DRAFT

of all or a material portion of such Phase, (ii) the cessation of commercial operation of such Phase for a continuous period of longer than one (1) year, or (iii) the fortieth (40th) anniversary of the Commercial Operation Date for such Phase. The Parties acknowledge that, except as otherwise provided herein, the Applicant's obligation to make Annual Payments shall be conditioned upon the Project beginning Commercial Operation. The Annual Payments shall be made to the County in any year in one lump sum payment during the term of this Agreement. The Annual Payments are separate and distinct from the amounts owed pursuant to the Solar Revenue Share Ordinance, local real property taxes, and other applicable state or local fees and taxes.

Notwithstanding the above, the Applicant agrees to submit the following initial payments to the County in connection with the initial development of each Phase of the Project, each in an amount equal to the product of such Phase's Capacity and Four Thousand One Hundred Dollars (\$4,100.00) (each, an "**Initial Payment**" and collectively, the "**Initial Payments**"): (i) an Initial Payment due upon the start of construction of such Phase, and (ii) an Initial Payment due within thirty (30) days after the Commercial Operation Date for such Phase. The County may use the funds received through the Initial Payments for any combination of purposes permitted under § 15.2-2316.7 of the Code of Virginia, including (i) mitigation of any impacts of the Project; (ii) financial compensation to the County to address capital needs set out in the County's (a) capital improvement plan, (b) current fiscal budget, or (c) fiscal fund balance policy; or (iii) assistance by the applicant in the deployment of broadband, as defined in § [56-585.1:9](#) of the Code of Virginia.

By way of example only, attached hereto as **Schedule 1** is an anticipated schedule of Initial Payments and Annual Payments predicated on the following assumptions: (1) the Project has two Phases; (2) the first Phase has a capacity of 86 MW_{AC}, with construction commencing on March 15, 2024, and achieving Commercial Operation on November 15, 2024; and (3) the second Phase has a capacity of 20 MW_{AC}, with construction commencing on October 30, 2024, and achieving Commercial Operation on April 15, 2025. For the avoidance of doubt, the foregoing assumptions are based at best on preliminary estimates and the Parties acknowledge that such assumptions, and the schedule of payments set forth on Schedule 1 and based thereupon, are not intended to be relied upon or determinative of any obligations of Applicant hereunder.

2. Statutory Structure of Payments; Statement of Benefit. The Applicant agrees that by entering into this Agreement, pursuant to Virginia Code § 15.2-2316. et seq., the Payments are authorized by statute and that it acknowledges, it is bound by law to make the Payments, and the Initial Payment, in accordance with this Agreement. The Parties acknowledge that this Agreement is fair and mutually beneficial to them both. As of the date of this Agreement, the County has adopted a Solar Revenue Share Ordinance as provided under Virginia Code § 58.1-3660 (D). Applicant acknowledges that this Agreement is beneficial to Applicant in allowing it to proceed with the installation of the Project with clear project design terms, which provide for mitigation of effects on the surrounding properties and the Amelia County community. Additionally, Applicant acknowledges that this Agreement provides for a clear and with a predictable stream of future payments to the County in values fair to both Parties.

3. Use of Payments by the County. The County plans to apply the Payments to

5.4.22 DRAFT

critical infrastructure projects to improve citizen quality of life, including but not limited to expanding educational opportunities, health care (telehealth) and economic development through significant investments in broadband deployment throughout the County. Notwithstanding the above, the Payments may be used for any of the following purposes: (i) mitigation of any impacts of the Project; (ii) financial compensation to the County to address capital needs set out in the County's (a) capital improvement plan, (b) current fiscal budget, or (c) fiscal fund balance policy; or (iii) assistance by the applicant in the deployment of broadband, as defined in § [56-585.1:9](#) of the Code of Virginia.

Article III

Miscellaneous Terms

1. Term; Termination. This Agreement shall commence on the Effective Date and shall continue until the Termination Date. The Applicant shall have no obligation to make Payments after the Termination Date. The Payment due for the year in which the Project or material part thereof is decommissioned shall be prorated as of the Termination Date. The termination of this Agreement shall not limit the Applicant's legal obligation to pay local taxes in accordance with applicable law at such time and for such period as the Project remains in operation.

2. Mutual Covenants. The Applicant covenants to the County that it will pay the County the amounts due hereunder when due in accordance with the terms of this Agreement, and will not seek to invalidate this Agreement, or otherwise take a position adverse to the purpose or validity of this Agreement. So long as Applicant is not in breach of this Agreement during its term, the County covenants to the Applicant that it will not seek to invalidate this Agreement or otherwise take a position adverse to the purpose or validity of this Agreement.

3. No Obligation to Develop. The Applicant has no obligation to develop the Project and, other than the requirement to make the Initial Payment, this Agreement does not require any Payments until after the Commercial Operation Date. Any test energy or other energy produced prior to the Commercial Operation date shall not trigger payment under this paragraph. It is understood that development of the Project by Applicant is contingent upon a number of factors including, but not limited to, regulatory approvals, availability and cost of equipment and financing, and demand for renewable energy and renewable energy credits. No election by the Applicant to terminate, defer, suspend or modify plans to develop the Project shall be deemed a default of Applicant under this Agreement.

4. Successors and Assigns. This Agreement will be binding upon the successors and assigns of the Applicant, and the obligations created hereunder shall be covenants running with the Property upon which the Project is developed. If Applicant sells, transfers, leases or assigns all or substantially all of its interest in the Project or the ownership of the Applicant, this Agreement will automatically be assumed by and be binding on, and the rights herein shall inure to, the purchaser, transferee or assignee. Upon such assumption, the sale, transfer, lease or assignment shall relieve the Applicant of all obligations and liabilities under this Agreement accruing from and after the date of sale or transfer, and the purchaser or transferee shall automatically become

5.4.22 DRAFT

responsible under this Agreement. The Applicant shall execute such documentation as reasonably requested by the County to memorialize the assignment and assumption by the purchaser or transferee.

5. Memorandum of Agreement. A memorandum of this Agreement, in a form acceptable to the County Attorney, may be recorded in the land records of the Clerk's Office of the Circuit Court of the County of Amelia, Virginia. Such recordation shall be at the Applicant's sole cost and expense and shall occur as soon as reasonably practicable after the full execution of this Agreement. If the Applicant chooses to not develop the Project, in its sole discretion, the County shall execute a release of the memorandum filed in the aforementioned Clerk's Office.

6. Notices. Except as otherwise provided herein, all notices required to be given or authorized to be given pursuant to this Agreement shall be in writing and shall be delivered or sent by registered or certified mail, postage prepaid, by recognized overnight courier, or by commercial messenger to:

County:

Amelia County, Virginia

5.4.22 DRAFT

Richmond, Virginia 23223

The County and Applicant, by notice given hereunder, may designate any further or different persons or addresses to which subsequent notices shall be sent.

7. Governing Law; Jurisdiction; Venue. THIS AGREEMENT SHALL BE GOVERNED BY AND CONSTRUED IN ACCORDANCE WITH THE LAWS OF THE COMMONWEALTH OF VIRGINIA, WITHOUT REGARD TO ANY OF ITS PRINCIPLES OF CONFLICTS OF LAWS OR OTHER LAWS WHICH WOULD RESULT IN THE APPLICATION OF THE LAWS OF ANOTHER JURISDICTION. THE PARTIES HERETO (A) AGREE THAT ANY SUIT, ACTION OR OTHER LEGAL PROCEEDING, AS BETWEEN THE PARTIES HERETO, ARISING OUT OF OR RELATING TO THIS AGREEMENT SHALL BE BROUGHT AND TRIED ONLY IN THE CIRCUIT COURT OF AMELIA COUNTY, VIRGINIA, (B) CONSENT TO THE JURISDICTION OF SUCH COURT IN ANY SUCH SUIT, ACTION OR PROCEEDING, AND (C) WAIVE ANY OBJECTION WHICH ANY OF THEM MAY HAVE TO THE LAYING OF VENUE OR ANY SUCH SUIT, ACTION, OR PROCEEDING IN SUCH COURT AND ANY CLAIM THAT ANY SUCH SUIT, ACTION, OR PROCEEDING HAS BEEN BROUGHT IN AN INCONVENIENT FORUM. THE PARTIES HERETO AGREE THAT A FINAL JUDGMENT IN ANY SUCH SUIT, ACTION, OR PROCEEDING SHALL BE CONCLUSIVE AND MAY BE ENFORCED IN OTHER JURISDICTIONS BY SUIT ON THE JUDGMENT OR IN ANY OTHER MANNER PROVIDED BY LAW.

8. Confidentiality; This Agreement, once placed on the docket for formal consideration by the Amelia County Board of Supervisors, is a public document, subject to production under the Freedom of Information Act (FOIA). The County understands and acknowledges the Applicant, and as applicable, their associates, contractors, partners and affiliates utilize confidential and proprietary “state-of-the-art” information and data in their operations (“Confidential Information”), and that disclosure of any information, including, but not limited to, disclosures of technical, financial or other information concerning the Applicant or any affiliated entity could result in substantial harm to them and could thereby have a significant detrimental impact on their employees and also upon the County. The County acknowledges that during the development of this Agreement, certain Confidential Information may be shared with the County by the Applicant. Applicant agrees to clearly identify any information it deems to be Confidential and not subject to mandatory disclosure under the Virginia Freedom of Information Act or other applicable law as Confidential Information at the time it provides such information to the County. The County agrees that, except as required by law and pursuant to the County’s police powers, neither the County nor any employee, agent or contractor of the County will (i) knowingly or intentionally disclose or otherwise divulge any such confidential or proprietary information to any person, firm, governmental body or agency, or any other entity unless the request for Confidential Information is made under a provision of Local, State or Federal law. Upon receipt of such request but before transmitting any documents or information which may contain Confidential Information, the County will contact Applicant to review the request for information and associated documents to determine if any Confidential Information is at risk of disclosure. If Confidential Information exists, Applicant may intervene on behalf of the County and defend

5.4.22 DRAFT

against disclosure of the Confidential Information. The County agrees to cooperate in this defense and to the extent allowed by law, work to protect the Confidential Information of the Applicant.

9. Severability; Invalidity Clause. Any provision of this Agreement that conflicts with applicable law or is held to be void or unenforceable shall be ineffective to the extent of such conflict, voidness or unenforceability without invalidating the remaining provisions hereof, which remaining provisions shall be enforceable to the fullest extent permitted under applicable law. If, for any reason, including a change in applicable law, it is ever determined by any court or governmental authority of competent jurisdiction that this Agreement is invalid then the parties shall, subject to any necessary County meeting vote or procedures, undertake reasonable efforts to amend and or reauthorize this Agreement so as to render the invalid provisions herein lawful, valid and enforceable. If the Parties are unable to do so, this Agreement shall terminate as of the date of such determination of invalidity, and the Property and Project will thereafter be assessed and taxed as though this Agreement did not exist. The Parties will cooperate with each other and use reasonable efforts to defend against and contest any challenge to this Agreement by a third party.

10. Entire Agreement. This Agreement and any schedules or exhibits constitute the entire agreement and supersedes all other prior agreements and understandings, both written and oral, between the parties hereto with respect to the subject matter hereof. No provision of this Agreement can be modified, altered or amended except in a writing executed by all parties hereto.

11. Construction. This Agreement was drafted with input by the County and the Applicant, and no presumption shall exist against any Party.

12. Force Majeure.

A. "Force Majeure Event" means the occurrence of:

(i) an act of war (whether declared or not), hostilities, invasion, act of foreign enemies, terrorism or civil disorder;

(ii) a strike or strikes or other industrial action or blockade or embargo or any other form of civil disturbance (whether lawful or not), in each case affecting on a general basis the industry related to the construction, operation, or maintenance of the solar facility, as for example but not in limitation, the interruption in the supply of replacement solar panels, and which is not attributable to any unreasonable action or inaction on the part of Applicant or any of its subcontractors or suppliers and the settlement of which is beyond the reasonable control of all such persons;

(iii) specific incidents of exceptional adverse weather conditions in excess of those required to be designed for that are materially worse than those encountered in Amelia County during the twenty (20) years prior to the Effective Date;

(iv) tempest, earthquake, or any other natural disaster of overwhelming proportions; disruption of operations resulting from any plane crashing into the solar facility to the

extent that all or a substantial portion thereof it unable to generate electricity sufficient to meet Applicant's payment obligations hereunder;

(v) discontinuation of electricity supply, or unanticipated termination of a power purchase agreement;

(vi) other unforeseeable circumstances beyond the control of the Parties against which it would have been unreasonable for the affected party to take precautions and which the affected party cannot avoid even by using its best efforts, including quarantines ordered by competent governmental authority in the event of a public health emergency, which in each case directly causes either party to be unable to comply with all or a material part of its obligations under this Agreement.

B. Neither Party will be in breach of its obligations under this Agreement or incur any liability to the other Party for any losses or damages of any nature whatsoever incurred or suffered by that other (otherwise than under any express indemnity in this Agreement) if and to the extent it is prevented from carrying out those obligations by, or such losses or damages are caused by, a Force Majeure Event except to the extent that the relevant breach of its obligations would have occurred, or the relevant losses or damages would have arisen, even if the Force Majeure Event had not occurred.

C. As soon as reasonably practicable following the date of commencement of a Force Majeure Event, and within a reasonable time following the date of termination of a Force Majeure Event, any Party invoking it will submit to the other Party reasonable proof of the nature of the Force Majeure Event and of its effect upon the performance of the Party's obligations under this Agreement.

D. Applicant will, and will ensure that its Subcontractors will, at all times take all reasonable steps within their respective powers and consistent with Good Operating Practices (but without incurring unreasonable additional costs) to:

- (i) prevent Force Majeure Events affecting the performance of Applicant's obligations under this Agreement;
- (ii) mitigate the effect of any Force Majeure Event; and
- (iii) comply with its obligations under this Agreement.

E. The Parties will consult together in relation to the above matters following the occurrence of a Force Majeure Event.

F. Should paragraph (A) apply as a result of a single Force Majeure Event for a continuous period of more than 180 days then the parties must endeavor to agree any modifications to this Agreement (including without limitation, determination of new revenue sharing payments) that are equitable having regard to the nature of the ability of Applicant to continue to meet its financial obligations to the County.

5.4.22 DRAFT

G. For the avoidance of doubt, Force Majeure shall not include (a) financial distress nor the inability of either party to make a profit or avoid a financial loss, (b) changes in market prices or conditions, or (c) a party's financial inability to perform its obligations hereunder.

13. Third Party Beneficiaries. This Agreement is solely for the benefit of the Parties hereto and their respective successors and permitted assigns, and no other person shall have any right, benefit, priority or interest in, under or because of the existence of, this Agreement.

14. Counterparts; Electronic Signatures. This Agreement may be executed simultaneously in any number of counterparts, each of which shall be deemed to be an original, and all of which shall constitute but one and the same instrument. A signed copy of this Agreement delivered by facsimile, e-mail/PDF or other means of electronic transmission shall be deemed to have the same legal effect as delivery of an original signed copy of this Agreement.

[signature page follows]

IN WITNESS WHEREOF, the Parties hereto have caused this Agreement to be executed by the officers whose names appear below as of the Effective Date.

**RESOLUTION
STREET CLOSINGS FOR SPECIAL EVENT PERMIT (NATIONAL NIGHT OUT)**

WHEREAS, the Amelia County Sheriff's Office will be hosting "National Night Out" on Tuesday, August 2, 2022; and

WHEREAS, the applicant has scheduled the event for the Courthouse Square; and

WHEREAS, the Virginia Department of Transportation's regulations for activities involving street closings requires the local governing body to assume responsibility for liability, and the local governing body has thus permitted the Amelia County Sheriff's Office to have liability insurance under the County of Amelia's blanket insurance policy for this event; and

WHEREAS, the traffic on certain routes within the Courthouse area will be in conflict with the proposed event.

NOW, THEREFORE, BE IT RESOLVED that the Board of Supervisors of Amelia County request permission from the Virginia Department of Transportation to close the following streets on Tuesday, August 2, 2022, from 5:00 P.M. to 11:00 P.M.

- Court Street (Rt. 1007) between Virginia St. (Rt. 1009) and Washington St. (Rt. 1006)
- Virginia Street (Rt. 1009) between Court St. (Rt. 1007) and Church St. (Rt. 1003)
- Washington Street (Rt. 1006) between Court St. (Rt. 1007) and Church St. (Rt. 1003)
- Church Street (Rt. 1003) between Virginia St. (Rt. 1009) and Washington St. (Rt. 1006)

AND FURTHER BE IT RESOLVED that the applicants for the Special Event Permit shall be responsible for providing the Virginia Department of Transportation the required map showing the streets to be closed, method of closing the streets, method of traffic control at each intersection and detour routes with approved markings.

Taylor,

Please see the response I just sent to James Maiden. Our recommendation would be to have VDOT come to your June BOS meeting and explain the award and options for proceeding. This way, the BOS can evaluate options before the CTB makes final award decisions and the County has to make a decision on how to proceed.

Jamie,

Just to remind everyone, VDOT provided the cost estimate that was used in the original application. As is sometimes the case, VDOT adjusted the estimate during the review process. Problem is, when VDOT adjusted the cost estimate for the project, they didn't adjust the award amount accordingly. It's up to the County how they want to proceed. However, it will be difficult to down scope this project because it involves connecting the sidewalk from the Courthouse Village to the schools. If there is a way to proceed with the project with the funds available, that would be our recommendation to the County.

That would be the County's call to make.

Tue 5/17/2022 10:52 AM

Jamie,

We recently saw the Proposed TAP Projects for the draft FY 2023-2028 SYIP for Richmond District, which included an allocation for the Amelia County Schools Sidewalk Project. The list includes \$888,702 in funding for the project. Thanks for working with us on this.

According to the correspondence I have in the project files, back in November, the budget was amended by VDOT to reflect a total project cost of \$1,905,280 - which would break out as \$1,524,224 in grant funding and \$381,056 in County match. The County concurred with the change at the time (I put a comment in the portal to that effect on November 12). The proposed TAP funding for this project - \$888,702 - is considerably lower than the amended grant figure of \$1,524,224 per above.

Furthermore, I just checked the portal and the budget for this project appears to have been amended again to \$2,525,356; however, the project financing in the portal is still showing the original \$888,702 grant/\$222,175 match mix.

Consequently, there is a concern over whether the proposed project allocation of \$888,702 is meant for the whole project (leaving the County on the hook for over \$1 million in match) or if the intent is to phase the project.

Please advise.

Good afternoon,

District L&D has completed their review of the application and supporting documents for TAP Application #7958 - Amelia County Schools Sidewalk Project. Please see below and attached for their recommendations on the validation of the application.

District L&D reviews and recommendations are based on the assumption that all TAP-funded projects would be administered by VDOT. But, we understand that this project will be administered by the City. Once you've reviewed the recommendations, please let me know if you'd like to use this cost estimate and have it added in the Portal as soon as you can. Please keep in mind that if the estimate is revised, the VDOT oversight estimates may also need to be adjusted.

Please let me know if you have any questions or need additional information.

Thank you,

Jamie

CRC May 2022 Items of Interest

New Ventures

- **\$888,702 in funding** for the **Amelia County Schools Sidewalk Project** has been included in the VDOT Draft FY23 Six Year Improvement Plan (SYIP). The Commonwealth Transportation Board will adopt the SYIP in June of 2022. The CRC assisted with this grant request.
- **\$859,736 in funding** for the **Farmville River Walk Project** has been included in the VDOT Draft FY23 Six Year Improvement Plan (SYIP). The Commonwealth Transportation Board will adopt the SYIP in June of 2022. The CRC assisted with this grant request.
- **\$3,025,927 in funding** for the **Prince Edward Manor House Drive Turn Lane** Revenue Sharing project has been included in the VDOT Draft FY23 Six Year Improvement Plan (SYIP). The Commonwealth Transportation Board will adopt the SYIP in June of 2022. The CRC assisted with this grant request.
- Prince Edward County has been **awarded \$530,100** for **A&E designs** for a water storage tank and booster pump station in the **Prince Edward County Heartland Innovation Technology Park**. The CRC assisted with this grant request.
- **Virginia's Heartland Regional Industrial Authority has been awarded \$112,400** by the Tobacco Commission to prepare site design plans for the development of sites in the Heartland Park to bring the Park up to a Tier IV designation by VEDP, which would make the Park more marketable to business prospects. The CRC assisted with this grant request.
- The CRC assisted Cumberland County in submitting a grant application for funds to the Department of Conservation and Recreation for the Cumberland Courthouse/Bear Creek Lake State Park Connector Trail Improvement Project.
- The CRC is applying for GO Virginia Enhanced Capacity Building Grant funds to develop a Business Plan for the Creation of a New Regional Economic Development Organization (REDO) for the CRC footprint.
- The CRC will be hosting a FOIA Training event for local staff and elected officials in September. More to come....
- **Next CRC Meeting, Wednesday, June 15, 2022 at 9:30 a.m., Heartland Regional Industrial Park, Keysville, Virginia.**

Activity

- Regional Emergency Planning –The Consultant is working with local Registrars on the Regional Election Security Improvement project on items such as threat & vulnerability monitoring, setting up automated periodic reporting and security awareness training. Staff have updated the Draft Regional Continuity of Operations Plan and the Draft Regional PPE Stockpile Plan based on local input.
- DEQ Watershed Implementation Plan (WIP) III Assistance: CRC staff sent out funding opportunities as well as participated in a DEQ virtual meeting discussion with Chesapeake Bay PDCs on items such as Environmental Justice issues.
- PE County Access Road Project Administration: The CRC assisted the County in submitting extension request for two of the TRRC grants for the Access Road project. The TRRC granted both extensions.
- CRC Affordable Workforce Housing Development Program: The CRC has executed agreements with all housing partners.
- CRC Regional Hazard Mitigation Plan: The Berkley Group and CRC staff held a virtual meeting with the Project Management Team and stakeholders on May 9th to review Draft Sections regarding Hazard Identification & Risk Assessment.
- GOVAR3 Entrepreneurship & Innovation Implementation Project: Project expenses and match are being monitored.
- Nottoway County Comprehensive Plan Update: The CRC staff are currently working with the working committee on finalizing the Future Land Use Map, developing special policy areas and establishing goals/objectives and strategies.
- Charlotte County Comprehensive Plan Update: The citizen survey has been disseminated with a deadline of May 31st.
- Drakes Branch SLFRF Administration: The CRC assisted the Town in submitting annual reporting of ARPA funds.
- DHR ESHPF Kenbridge Town Hall Repairs Project: The CRC assisted the Town of Kenbridge in reviewing a draft contract for the Contractor's services.
- DHR ESHPF Charlotte County Courthouse Complex Drainage Project: The CRC assisted the County in reviewing bid documents and discussed items necessary in the selected Contractor's contract.
- CRC Regional VATI Grant: The CRC is working with DHCD to finalize the \$15 million dollar contract for the Regional VATI Grant for Universal Broadband Coverage in the counties Cumberland, Lunenburg and Prince Edward in partnership with Kinex.
