

# PAPER BAG STARS

## Materials provided:

- 8 paper bags
- 1 glue stick
- Twine

## Materials not provided:

- Scissors

## Instructions

1. Glue 4 bags on top of one another. Apply the glue in a 'T' shape, down the middle and along the bottom 'closed' end, leaving the 'open' end without glue.
2. Because it is difficult to cut all 8 bags at once, pause the gluing process after the first 4 bags to cut off the open corners. You will be cutting the others later. Don't worry if your cuts are uneven- they'll still look great!
3. Glue the other 4 bags on top of the ones you've already done and then cut off the open corners on those, as well, matching the cuts you already made on the first 4.
4. Let the glue dry a bit and then place a 'T' of glue on one side of your stack of bags.
5. Fan open your bags and glue the two ends together to form the circular star shape.
6. Poke a hole through one of the points on the star and thread the twine through if you wish to hang your star!
