Zentangle Inspiration

I found Sandy Steen Bartholomew's book *Totally Tangled* at my library and started tangling right away. This was also the same month I discovered National Novel Writing Month and decided to write my first novel! I am convinced that Zentangle is what enabled me to meet my writing goal of 50,000 words.

Two months later, I became a CZT. Since then, I have discovered that I have a passion for sharing this blessing with others. Seeing students' faces light up at the end of class is priceless. I had one customer tell me, "I didn't know I was an artist until I came to this class." What could be a better gift?

On a personal note, Zentangle has given me the confidence to begin making art. When I was a child, I wanted to be an artist, but never had the courage to pursue that dream. In the last year and a half, I have started taking art lessons and begun painting again. I know I would never have done this without Zentangle.
—Cris Letourneau, CZT

VARIATION 1	**VARIATION 2**	**VARIATION 3**
Symbolism: Triangles

The double triangle, forming a six-pointed star, represents fulfillment and harmony. The upward triangle represents the fire of creative life force, while the downward triangle symbolizes water and potential. Because triangles rotate on a center point, they also indicate change.
