Mobile Food Vendors Inspection Report

The requirements for the unit are listed below:

- 1 Enclosed room with walls, floors and ceilings that are smooth, easily cleanable, and non-absorbent.
- 2 Doors are tight-fitting and self-closing.
- 3 Windows that can be opened have minimum sixteen mesh per inch screening wire to protect from insects and rodents.
- 4 A three-compartment sink with hot and cold running water available to all three compartments.
- 5 All three compartments are large enough to immerse largest piece of equipment for washing, rinsing and sanitizing.
- 6 Separate hand washing sink with hot and cold running water by mixer faucet and properly plumbed to waste water tank.
- 7 Unit has a minimum ten gallon water heater or an instantaneous (on demand) water heater.
- 8 If you have a ten gallon water heater, then the unit should have at a minimum a fifteen (15) gallon fresh water tank. If you have an instantaneous water heater, the unit should have a minimum twenty-five (25) gallon fresh water tank.
- 9 Unit has minimum thirty (30) gallon wastewater holding tank. In all cases, the wastewater tank must be fifteen percent (15%) larger than the total volume of fresh water (hot & cold together)
- 10 Facilities are provided to maintain hot holding temperatures of 135F.
- 11 Facilities are provided to maintain cold holding at 41F or below.

- 12 Facilities are provided to reheat potentially hazardous foods to 165F.
- 13 All equipment is smooth, easily cleanable, and non-absorbent.
- 14 Unit is constructed of corrosion-resistant, durable materials.
- 15 Liquid waste servicing connection is of different size than water connection.
- 16 Liquid waste servicing connection is lower than water inlet.
- 17 Potable water inlet is equipped with a transition connection of size and type that will prevent its use for any other service.
- 18 Solid waste storage facilities provided.
- 19 Adequate counter and/or worktables are provided.
- 20 Equipment is clean and in good repair.
- 21 Single Service items are used and stored properly.
- 22 Ice is stored in proper facility and handled properly.

Waste Water Tank Equation for any size fresh water tank
 25 gallons 30 gallons .15 x fresh water tank size = additional amount
 additional amount + fresh water tank size = waste tank size
 FOR EXAMPLE: for A 36 gallon fresh water tank

.15 x 36 =5.4
 5.4 + 36 = 41.40 gallons waste tank
 30 gallons 34.5 gallons
 35 gallons 40.25 gallons
 40 gallons 46 gallons
 45 gallons 51.75 gallons
