Safe Harbor Statement

Statements in this article relating to Oracle's future plans, expectations, beliefs, and intentions are "forward-looking statements" and are subject to material risks and uncertainties. Many factors could affect Oracle's current expectations and actual results, and could cause actual results to differ materially. A discussion of such factors and other risks that affect Oracle's business is contained in Oracle's Securities and Exchange Commission (SEC) filings, including Oracle's most recent reports on Form 10-K and Form 10-Q under the heading "Risk Factors." These filings are available on the SEC's website or on Oracle's website at oracle.com/investor. All information in this presentation is current as of October 5, 2026 and Oracle undertakes no duty to update any statement in light of new information or future events.

Cumulative Economic Impact

Overall economic impact to New Mexico including tax revenue, investments, and additional economic activity over the next decade

2026 JULY

$4.7+ Billion

As determined by 3rd party economists. The estimates provided in this report are based on the best information available and all reasonable care has been taken in assessing the quality of that information. These estimates are intended to provide a good indication of likely future outcomes and should not be construed to represent a precise measure of those outcomes. To estimate the likely local economic impact attributable to the proposed project, we use a regional economic impact model called IMPLAN.4 - one of the most used economic impact models in the United States. Like all economic impact models, the IMPLAN model uses economic multipliers to quantify economic impacts.

ORACLE: BEING A GOOD NEIGHBOR

Transparency

Copyright © 2026, Oracle and/or its affiliates

We are defining the reporting framework, and public-access plan for Project Jupiter

Scope

Topics for public reporting

Land use, noise and heat, power and water, emissions and sustainability

Work underway

Framework design

Engaging subject-matter experts; defining engineering measures and controls

Next milestones

Planned deliverables

Confirm reporting framework and reviewer; develop public transparency dashboard; set website launch timing for public access*

*Dashboard planned to go live when data centers come online

Copyright © 2026, Oracle and/or its affiliates

RECAP –

Project Jupiter Key Facts

Energy and Emissions

100%
Carbon-free energy strategy by 2031

Water

Over 15 years, Project Jupiter's operational water is
less than 9 average households.
No potable water used for operations.

Jobs

7,000 construction jobs and **1,500** ongoing project supported jobs

Economic Impact

Billions+, including tax revenues, investments and additional economic activity
