

# Register of Significant Structures

Updated August 2025

## About the Register of Significant Structures

The Fall River Historical Commission (FRHC) is responsible for updating and expanding our city's inventory of historic and archaeological resources. The inventory, known as the Fall River Register of Significant Structures (the Register), contains over 1,900 structures, sites, objects, and districts that all have varying degrees of historic significance. Listings include those recognized on the National Register of Historic Places – as individual resources or those contributing to a National Register Historic District – the State Register, and those that are locally listed as part of a nomination process reviewed and approved by the Fall River Historical Commission.

As a requirement of the Massachusetts Historical Commission's (MHC) State Historic Preservation Plan, the FRHC encourages public recognition and protection of resources of architectural, historical, archaeological and cultural significance, identifies historical resources for City planning purposes, and determines eligibility for preservation grant funding.

### What are the criteria for listing a resource in the Register?

While the significance criteria for the Register is similar to that used by the National Register of Historic Places, this inventory will document the unique history of the City of Fall River. Properties must be at least 50 years old to qualify for listing. A building, complex of buildings, structures, site, or object may be determined for preservation if it:

- a. Has significant character, interest or value as part of the development, heritage or cultural characteristics of the City, Commonwealth or Nation or is associated with the life of a person significant in the past; or
- b. Is associated with an event of importance to the history of the City, Commonwealth or Nation; or
- c. Reflects the environment in an era characterized by a distinctive architectural style; or
- d. Embodies distinguishing characteristics of an architectural style or engineering specimen; or
- e. Is the work of a designer, architect, landscape architect or designer, or engineer whose work has significantly influenced the historical, architectural, economic, social, or cultural development of the City, Commonwealth or Nation; or
- f. Contains elements of design, detail, materials or craftsmanship which represents a significant innovation; or
- g. Is part of or related to a square, park or other distinctive area which should be preserved according to an historic, cultural or architectural motif; or
- h. Owing to its unique location or singular physical characteristic, represents an established and familiar visual feature of the neighborhood, community or City; or
- i. Has yielded, or may be likely to yield information in pre-history or history; or
- j. Exemplifies the cultural, political, economic, social or historical heritage of the community.

The Register of Significant Structures is updated as changes are made to the listings.

For more information regarding the Register, please contact the Historical Commission via email [frhc@fallriverma.gov](mailto:frhc@fallriverma.gov) or via phone 508-324-2530.
