NOTES TO USERS

For information and questions, see fris.nc.gov, available products associated with this FIRM including historic versions of this FIRM, how to order products or the National Flood Insurance Program in general, please call the FEMA Map Information exchange at 1-877-FEMA-MAP (1-877-336-2627) or visit the FEMA Map Information eXchange (<https://www.fema.gov/mie>). For more information on the National Flood Insurance Program, please visit <https://www.fema.gov/nfip>. This FIRM may be available. Visit the North Carolina Floodplain Mapping Program website at <https://fris.nc.gov> or contact the FEMA Map Services Center.

Communities annexing land on adjacent FIRM panels must obtain a current copy of the adjacent panel as well as the current FIRM Index. These may be ordered directly from the Map Service Center at the number listed above. For community and countywide map details refer to the Flood Insurance Study report for this jurisdiction.

To determine if flood insurance is available in the community, contact your insurance agent or call the National Flood Insurance Program at 1-800-438-6520.

Flood Insurance Study (FIS) means an examination, evaluation, and determination of flood hazards, corresponding water surface elevations, flood hazard risk zones, and other flood data in a community issued by the North Carolina Floodplain Mapping Program (NCFMP). The Flood Insurance Study (FIS) is comprised of the following products: autogenrated Flood Insurance Base Map and the Flood Insurance Survey Report. A Flood Insurance Survey is a compilation and presentation of flood risk data for specific watercourses, lakes, and coastal flood hazard areas within the community. The FIS is the basis for the development of the Flood Insurance Rate Map (FIRM). The FIS is completed for the NCFMP. The digital information, reports and maps are assembled into an FIS. Information shown on this FIRM is provided in digital format by the NCFMP. Base map information shown on the FIRM was provided in digital format by the NCFMP. Base map information shown on the FIRM was provided in digital format by the NCFMP. Base map information shown on the FIRM was provided in digital format by the NCFMP.

ACCREDITED LEVEE NOTES TO USERS: If an accredited levee exists on the map check with your local community to obtain more information, such as the estimated level of protection provided (which may exceed the 1-percent annual-chance level) and Emergency Action Plan, on the levee system(s) shown as providing protection to consider flood insurance and floodproofing or other protective measures. For more information on flood insurance, interested parties should visit the FEMA Website at <https://www.fema.gov/national-flood-insurance-program>.

PROVISIONALLY ACCREDITED LEVEE NOTES TO USERS: If a Provisionally Accredited Levee (PAL) note appears on this panel, check with your local community to obtain more information, such as the estimated level of protection provided (which may exceed the 1-percent annual-chance level) and Emergency Action Plan, on the levee system(s) shown as providing protection to consider flood insurance and floodproofing or other protective measures. For more information on flood insurance, interested parties should visit the FEMA Website at <https://www.fema.gov/national-flood-insurance-program>.

LIMIT OF MODERATE WAVE ACTION NOTES TO USERS: For some coastal flooding zones the AE Zone category has been divided by a Limit of Moderate Wave Action (LMWA). The LMWA represents the approximate landward limit of the 1.5-foot breaking wave. The effects of wave hazards between the VE Zone and the LMWA are not shown. Areas where the LMWA is shown are not necessarily within the VE Zone, but less severe than those in the VE Zone.

Limit of Moderate Wave Action (LMWA)

POLITICAL AREA NOTES TO USERS: The corporate limits shown on the map are based on the best information available at the time of publication. Corporate limits are provided by the NC Geographic Information Coordinating at 919-715-0711 or email frmap@ncgic.gov.

NORTH CAROLINA
Cooperating Technical State
REMA'S COOPERATING TECHNICAL PARTNER

This digital Flood Insurance Rate Map (FIRM) was produced through a unique cooperative partnership between the State of North Carolina and the Federal Emergency Management Agency (FEMA). The State of North Carolina has implemented a long term approach to floodplain management to decrease the costs associated with flooding. This is demonstrated by the State's commitment to map flood hazard areas at the local level. As a part of this effort, the State of North Carolina has joined in a Cooperating Technical State agreement with FEMA to produce and maintain this digital FIRM.

FLOOD HAZARD INFORMATION

SEE FIS REPORT FOR ZONE DESCRIPTIONS AND INDEX MAP

THE INFORMATION DEPICTED ON THIS MAP AND SUPPORTING DOCUMENTATION ARE ALSO AVAILABLE IN DIGITAL FORMAT AT [HTTPS://FRIS.NC.GOV](https://fris.nc.gov)

NOTES TO USERS

For information and questions about this map, available products associated with this FIRM including historic versions of this FIRM, how to order products or the National Flood Insurance Program in general, please call the FEMA Map Information exchange at 1-877-FEMA-MAP (1-877-336-2677) or visit the FEMA Map Service Center website at <https://msc.fema.gov>. An accompanying Flood Insurance Study report, Letter of Map Revision (LOMR) or Letter of Map Amendment (LOMA) revising portions of this panel, and digital versions of this FIRM may be available. Visit the North Carolina Floodplain Mapping Program website at <https://flood.nc.gov> or contact the FEMA Map Service Center.

Communities annexing land on adjacent FIRM panels must obtain a current copy of the adjacent panel as well as the current FIRM Index. These may be ordered directly from the Map Service Center at the number listed above.

For community and countywide map dates refer to the Flood Insurance Study report for this jurisdiction.

To determine if flood insurance is available in the community, contact your insurance agent or call the National Flood Insurance Program at 1-800-538-6920.

The Flood Insurance Study (FIS) maps risk zones, identification, evaluation, and determination of flood hazards, corresponding to specific surface elevations, flood hazard risk zones, and other flood data in a community issued by the National Coastal Planning Program (NCPP). The Flood Insurance Study (FIS) is comprised of the following products:

- Floodplain Mapping Program (NFCEM), The Flood Insurance Study (FIS) is comprised of the following products:
- Digital Flood Hazard Database, The Water Surface Elevation Ratios, the digitally derived,
- Automated Flood Insurance Rate Map and the Flood Insurance Survey Report, A flood insurance survey data was a compilation and presentation of insurance Risk Map data for specific watercourses, lakes, and coastal flood hazard areas within the community.

The FIS is compiled for the NFPE, the digital information and data are assembled into an FIS. Information shown on this FIS is provided in digital format by the NFCEM. Base map information shown on this FIS was provided in digital format by the NFCEM. The source of this information can be determined from the metadata available in the original FLOOD database and in the Technical Support Data Notebook (TSDN).

ACCREDITED LEVEE NOTES TO USERS: If an accredited levee note appears on this panel check with your local community to obtain more information, such as the estimated level of protection provided (which may exceed the 100-year annual-chance level), and Emergency Action Plan, on the levee system(s) shown as providing protection for areas on this panel. To mitigate flood risk in residual risk areas, property owners and residents are encouraged to consider flood insurance and floodproofing or other protective measures. For more information on flood insurance interested parties should visit the FEMA Website at <https://www.fema.gov/national-flood-insurance-program>.

[illegible]

LIMIT OF MODERATE WAVE ACTION NOTES TO USERS: For some coastal flooding zones the AE Zone category has been divided by a Limit of Moderate Wave Action (LIMWA). The LIMWA represents the approximate seaward limit of the 1.5-foot breaking wave. The effects of wave hazards between the VE Zone and the LIMWA or between the shoreline and the LIMWA for areas where VE Zones are not identified will be similar to, but less severe than those in the VE Zone.

Limit of Moderate Wave Action (LiMWA)
