Becoming A Foster Parent

Foster Care : Becoming A Foster Parent

What is Foster Care?

Foster Care is home-like care provided by a licensed foster parent for children who cannot live with their parents or their primary caretaker. Children are placed in foster care for various reasons including but not limited to:

- A child who has been neglected
- A child who has been abused
- A child whose parent or caretaker is in jail or is hospitalized and has no one to care for them during their parent or caretaker's absence
- A child who has committed a delinquent act
- A child who has significant medical or mental health needs that their parents or caretakers cannot or will not meet

Foster Care is usually a temporary situation that gives parents or caretakers time to make necessary changes to their home or life so that their child can safely returned home. Most children in foster care return home, which is called reunification. If children are unable to return home, they find permanency through other options including adoption, guardianship, etc.

Foster Parents receive a monthly foster care payment to reimburse for the care of the foster child in their home, called the Uniform Foster Care Rate. Each child's rate is different and can be explained in the Uniform Foster Care Rate Brochure.
