

FOR IMMEDIATE RELEASE

Lower Allen Township Requests Residents and Businesses to Report Storm Damage

Lower Allen Township, PA — Lower Allen Township Emergency Management is requesting that all residents and business owners who sustained property damage during the severe storms on July 4 and July 5 report that damage as soon as possible.

Damage reports are being collected to support local, county, and state damage assessment efforts. The information will assist Lower Allen Township, Cumberland County, and the Commonwealth of Pennsylvania in evaluating the overall impact of the storms and determining whether state or federal disaster assistance programs may become available.

Residents and businesses whose homes, commercial properties, agricultural operations, or other structures sustained storm-related damage are encouraged to submit a damage report using the following online reporting form:

<https://crisistrack.juvare.com/public/cumberlandPA/request.html>

Residents are encouraged to submit a report even if they have already contacted their insurance provider. Reporting damage to the Township does not replace filing an insurance claim; however, it provides emergency management officials with valuable information needed to document the extent of storm impacts throughout the community.

For questions regarding storm damage reporting, please email the Lower Allen Township Emergency Management Coordinator at dholl@latwp.org.

Lower Allen Township appreciates the cooperation of residents and businesses as we work with Cumberland County and Commonwealth emergency management partners to assess storm impacts and support the community's recovery.
