- ✓ House Music Fest in August
- ✓ Maywood Fest & Summer Jam
- ✓ 10th Park Re-Opening & Inspire Fest
- ✓ Annual Water Report 2025
- ✓ Youth Engagement
- ✓ 19th Avenue Updates

“Rather its new businesses, cultural celebrations, or just unity in the community experiences. Maywood truly has it all. Moving the community together is essential because our strength lies in our unity. When we move as one—across generations, backgrounds, and experiences—we create shared purpose, mutual accountability, and lasting progress. No single person or group can solve the challenges we face alone. But together, we can build a future rooted in pride, resilience, and opportunity for all.”

- Mayor Nathaniel George Booker

From the Office of the Village President Mayor Nathaniel George Booker

This summer has been moving fast! It was an honor to serve Shanghai International Friendship Cities Corporation Forum. The Forum is an annual event held in Shanghai, China, that brings together officials, experts, and representatives to discuss and collaborate on various urban development and cooperation issues. The forum aims to strengthen international ties, share best practices, and promote mutual learning among participating cities. A great thank you to Congressman Danny K. Davis and the American Multi-Ethnic Commission (AMEC). This year's gala was amazing as well. Continuing moving our communities forward together, we had our quarterly Metropolitan Mayor's Caucus meeting.

The AMEC focuses on empowering multi-ethnic communities through social, educational, cultural, health, economic, and youth initiatives. It strives to promote and protect ethnic communities and maximize resources for the benefit of these communities.

It was great to speak at the CivTech Conference this year! Thanks to the National League of Cities, we have received a free year of service via Tolemi. Tolemi is a company that provides cloud-based data management and analytics solutions to local governments. They help cities and towns use data to make more informed decisions, improve operations, and enhance community well-being. Tolemi's platform integrates data from various city systems, creating a comprehensive view of properties, owners, and related issues like complaints, violations, and fees. As we are building out our efforts to address Healthy Housing, we are blessed to be able to utilize this software.

**BEAT THE SUMMER HEAT
AND JOIN IN THE FUN!**

**PUBLIC SWIM EVERY THURSDAY &
FRIDAY FOR MAYWOOD RESIDENTS!**

2:30 pm – 6:30 pm

Starting July 10th thru August 7th

**Proviso East High School
807 S. 1st Avenue (Door #50)**

Cost: FREE

What to Bring: Swimwear, Towel, and Lock

Moving Maywood Forward Together

Mayor Nathaniel George Booker & Board of Trustees

19th Avenue Improvements (Madison Street – Oak Street) Construction Update:

The underground improvements phase for the project is continuing for the water services and sewer. 2,300 feet of ductile iron pipe water main has been installed. The main line water main installation is complete with only the intersection tie-ins remaining, which will be completed once all the new water services are transferred to the new water main.

The water main passed the pressure and chlorination test for all blocks, and water service installations are currently underway. Berger Excavating has completed nearly 50% of the water service installations on the public side. Millenium Contracting is working simultaneously with Berger Excavating to replace the lead water service lines on the private side. Roughly 40% of the lead water services have been replaced on the private side.

In addition to this, Berger Excavating is also continuing with the storm and sanitary sewer improvements. Berger Excavating has installed 500 feet of storm sewer, 6 storm manholes, 4 catch basins, 2 inlets, and 2 sanitary manholes. We anticipate all underground work to be complete by mid to late August. Concrete and roadway improvements to follow the underground improvements. Notices will be distributed to residents to provide further information as the date approaches for this phase change. The restoration will include 4,900 feet of complete curb and gutter replacement, complete sidewalk replacement, and 8,500 square yards of pavement replacement with 9" of Hot-Mix Asphalt.

The Way Back Inn's (WBI) Community Bonfire was more than just s'mores and stories—it was a celebration of 51 years since the very first AA meeting was held at WBI. WBI serves individuals who are seeking recovery from alcohol, substance, or gambling use disorders. WBI's goal is to help clients achieve continuous recovery.

The [Village of Maywood](#) thanks [Living Fresh Market](#) for partnering to bring The Rib Fest back to Maywood! The 1st Annual Fathers Day celebration was a great success, and we can't wait to continue with our Unity in the Community summer celebrations.

During the month of Juneteenth, the Village of Maywood raised the flag, and promoted our first Black woman to Fire Lieutenant! Congratulations Lieutenant Karen Ross!!!! We also swore in our first 2nd generation Black Fireman Demetrius Wade!

Juneteenth is not just a commemoration of the past — it is a call to action for the present and a vision for the future. While it marks the end of slavery in the United States, its true power lies in how it fuels the ongoing fight for justice, equity, and liberation. It is a month to honor our resilience, affirm our humanity, and commit to building a future where Black lives are not only free, but fully valued and empowered.

WE ARE HIRING... JOIN US!

The Village of Maywood is proud to welcome new team members who are passionate about serving and uplifting our vibrant predominantly Black community. As a municipality rooted in history, resilience, and cultural richness, we are intentionally focused on building a healthier, stronger, and more inclusive Maywood for all.

We are excited to bring on individuals who share our commitment to advancing every element of a healthy community—whether through public safety, infrastructure, economic opportunity, housing, education, or wellness. Together, we are working to ensure every resident in our diverse community is seen, heard, and served with pride and excellence. We are Moving Maywood Forward Together with purpose—and we are proud to have new partners in that progress. - Mayor Nathaniel George Booker
nbooker@maywood-il.gov

Maywood is more than 25K residents centrally located within 15-20 minutes of Downtown Chicago (East), O'Hare International Airport (North), and Midway International Airport (South)

Mayor Nathaniel George Booker & Board of Trustees | Moving Maywood Forward Together

The [Village of Maywood](#) thanks [A Greater Good Foundation](#) for partnering and hosting another amazing Juneteenth Holistic Health & Wellness Festival.

Thank you, [Operation UpLift INC.](#) And [It's WEST TOWN Museum of Cultural History](#) for an amazing 1960's Soul Breakfast and Reflections of the Past Trolley Tours.

Juneteenth offers space to acknowledge historical trauma while also uplifting the strength and perseverance of Black communities. This dual recognition supports mental and emotional wellness by fostering a sense of identity, cultural pride, and community connection. In this way, Juneteenth is not only a historical milestone but also a catalyst for ongoing healing, self-care, and collective empowerment

Mayor Nathaniel George Booker & Board of Trustees | Healthy Maywood West Cook Partners

Our celebration of Caribbean Heritage Month aims to raise awareness about the significant impact of Caribbean Americans on American society and culture. It is a time to celebrate the diverse backgrounds and experiences of Caribbean Americans, who come from countries across the Caribbean and have ancestral roots in Africa, Europe, Asia, and indigenous people of the Americas.

A special thank you to Co-Chair Senator Lakesia Collins of the Illinois Legislative Caucus, Chair of the Chicago Black Aldermanic Caucus Alderwoman Stephanie Coleman, Executive Director, Tiffany Hightower, Ronnie King of MyVillage, Tracey Bey of the Illinois Black NFP Coalition, CEO Karen Freeman-Wilson of the Chicago Urban League and so many more for attending the Illinois Black Caucus of Local Elected Officials convening. When we unite behind data-driven, community-focused strategies, we make Illinois stronger and healthier for all.

ComEd Customer Relief Fund

ComEd is joining with Neighborhood Housing Services of Chicago (NHS) and the Salvation Army to launch the ComEd Customer Relief Fund, a one-time program to support eligible ComEd customers experiencing higher energy costs during peak usage summer months and the months ahead. The \$10 million ComEd Customer Relief Fund is made possible through one-time charitable contributions to NHS and the Salvation Army from Exelon, ComEd's parent company.

Beginning July 7, eligible ComEd customers will be able to apply for relief through NHS and the Salvation Army, our partners who specialize in providing assistance to communities in our area.

How to Apply and Eligibility

Beginning July 7, residential customers with past-due balances who are at or below 300 percent of the Federal Poverty Level may qualify for grants up to \$500. Qualified 501(c)3 nonprofit organizations with past-due balances may qualify for grants up to \$1,000. To learn more and apply, customers can visit www.comed.com/relief for step-by-step guidance.

Energy Affordability with ComEd

ComEd customers are bearing the brunt of increasing energy supply costs as demand rises and supply is not there to meet it. While ComEd does not control energy supply costs, the company is committed to advocating for customers and working to find solutions with those who do control these costs. We recognize that any increase in household expenses can be difficult. We take seriously our responsibility to help keep energy costs manageable for our customers.

In addition to the relief fund, ComEd offers a wide range of programs to help customers locate assistance, manage their energy use and lower their monthly bills. This includes existing energy efficiency and financial assistance programs, including budget billing, flexible payment plans, home energy audits, high-usage alerts and more — available through our [online customer portal](#).

In 2024, ComEd connected approximately 229,000 customers to energy assistance programs, delivering more than \$133 million in support. We know the energy we provide is essential to families and businesses, which is why our assistance programs are designed to offer meaningful relief and ensure reliable service for every community.

Mayors use Move with the Mayor® to encourage active, healthy living and strengthen individual and community resilience. We are empowering and protecting community members from health threats and improving cardiovascular health, mental health, and health equity.

As part of our ongoing commitment to transparency, collaboration, and progress, the Village of Maywood launched our 2025 community tours to engage directly with residents and listen to your voices. This effort is grounded in the belief that the future of Maywood must be shaped together—by the people who live, work, and raise families here.

We have opened a new workforce development space at 1010 Madison St., that is the pipeline to all Elements of a Healthy Maywood. Thank you, Senate Majority Leader Kimberly Lightford, House Speaker Emanuel "Chris" Welch, Commissioner Tara Stamps, Cook County Government, and so many community partners for bringing workforce readiness to the Maywood West Cook area. Congratulations Lumity!

Mayor Nathaniel George Booker & Board of Trustees | Healthy Maywood West Cook Partners

The Corned Beef Factory Sandwich Shop (613 Roosevelt Rd, Maywood IL 60153) is open for business! We are so happy that Maywood has become the official home to some of the best corned beef, turkey, italian beef, reuben, pastrami, and more.

Wine Down Wednesday Kick-Off at the Maywood Park District on 9th & Madison. Held Weekly @ 5:30p.

THANK YOU to everyone who attended the New Covenant Project Community Tour, more to come!

VILLAGE OF MAYWOOD
ANNUAL WATER REPORT
January - December 31, 2024

It's time again for the annual report on our water system for the period of January 1, to December 31, 2024. During 2024, the Village of Maywood, in its continuing commitment to provide excellent water service and increased efficiency throughout the water system, completed **16 Buffalo Boxes**, installed and/or replaced **8 Water Hydrants**; repaired **19 Water Main Breaks**, and lastly repaired **17 Sewer Structures**. Additionally, the following capital improvement projects were completed.

- **2024 Roadway Improvements** – The project was located along Legion Street from 5th Avenue to 9th Avenue, and along 6th, 7th, and 8th Avenues from Wilcox Street to Legion Street. The project included nearly ½ mile of roadway reconstruction and resurfacing, and the installation of 12 catch basins, and the installation of 430 feet of new storm sewer. Finished concrete pavement was installed along the industrial properties to accommodate truck traffic.
- **South Maywood Drive Roadway Improvements** – The project was located along South Maywood Drive from the west Village limits to 19th Avenue. The project included nearly 4,000 square yards of finished concrete pavement to accommodate truck traffic along this route. The project also included the installation of 7 catch basins, 4 manholes, and nearly 500 feet of storm sewer.
- **2024 Green Infrastructure Alley Improvements** – The project was located at various locations in the north section of the Village between Lake Street, Nichols Lane, 1st Avenue and 9th Avenue. The remaining five (5) stone alleys in this area were improved with concrete, permeable pavers, and an aggregate base layer to contain and infiltrate over 120,000 gallons of stormwater per rain event. 2,000 square yards of alley pavement were improved in total.
- **9th Avenue Resurfacing** – The project was located along 9th Avenue between Main Street and Chicago Avenue, straddling the border between the Village of Melrose Park and the Village of Maywood. The project included the patching and resurfacing of over 3,600 square yards of roadway pavement.
- **I-290 Corridor Storm Sewer Separation Improvements (Phase I Additional Work)** – The project was located along 9th Avenue at the intersections of Harrison Street, Congress Street, and VanBuren Street. The work included the installation of 22 catch basins, 7 manholes, and over 600 feet of storm sewer.
- **Hot Mix Asphalt Alley Paving Program** – The project was located Village-wide and included all 64 remaining stone alleys. The project included the installation of over 33,000 square yards of hot-mix asphalt alley pavement.

- During 2024, 44 lead water service lines were removed and successfully replaced with 1” copper lines for Maywood residents courtesy of the new Get the Lead Out Program.

These and other improvements have been designed to provide you with the best service possible. Please read the balance of this report as it will give you valuable information on improvement projects in the Village as it relates to water, and our sewer system. Es hora de volver para el informe anual sobre nuestro sistema de agua para el periodo del 1 de Enero al 31 de Diciembre de 2024. Durante el 2024, el pueblo de Maywood, en su compromiso continuo para proporcionar agua excelente servicio y Mayor eficiencia en todo el sistema de agua, completado y había reparado más de 17 estructuras de alcantarillado y 16 cajas de Buffalo por todo el pueblo. Además, 19 main de agua de a contra de roptura fueron programadas para ser agregadas al

sistema de alcantarillado combinado con 8 nuevas bombas de agua de Maywood en la temporada de construcción de verano y otoño de 2024. estas y otras mejoras han sido diseñadas para ofrecerle el mejor servicio posible. Liendo el saldo de este informe, le dará información valiosa sobre los proyectos de mejoramiento en el pueblo de lo que se refiere al agua y nuestro sistema de alcantarillado.

This report is intended to provide residents with important information about their drinking water and the efforts made by the water system to provide safe drinking water. The source of drinking water used by Maywood is **purchased** surface water from the City of Chicago. Drinking water, including bottled water, may reasonably be expected to contain at least small amounts of contaminants. The presence of contaminants does not necessarily indicate that water poses a health risk. More information about contaminants and potential health effects can be obtained by contacting the USEPA’s Safe Drinking Water Hotline at (800) 426-4791.

Some people may be more vulnerable to contaminants in drinking water than the general population. Immuno-compromised persons who have undergone organ transplants, people with HIV/AIDS or their immune system disorders, some elderly and infants can be particularly at risk for infections. These people should seek advice about drinking from their healthcare providers. USEPA/CDC guidelines on appropriate means to lessen the risk of infection by Cryptosporidium and other microbial contaminants are available from the USEPA’s Safe Drinking Water Hotline at (800) 426-4791.

The sources of drinking water (both tap and bottled water) include rivers, lakes, streams, ponds, reservoirs, springs and wells. As water travels over the surface of the land or through the ground, it dissolves naturally occurring minerals and radioactive material and picks up substances resulting from the presence of animals or from human activity. Possible contaminants consist of:

- *Microbial contaminants such as viruses and bacteria, which may come from sewage treatment plants, septic systems, agricultural livestock operations and wildlife.*
- *Inorganic contaminants like salts and metals, which can be naturally occurring or result from urban storm water run-off, industrial or domestic wastewater discharges, oil and gas production, mining or farming.*
- *Pesticides and herbicides, which may come from a variety of sources such as agriculture, urban storm water run-off and residential uses.*
- *Organic chemical contaminants, including synthetic and volatile petroleum production and can also come from gas stations, urban storm water run-off and septic systems.*

- *Radioactive contaminants, which can be naturally occurring or be the result of oil and gas production and mining activities.*

In order to ensure that tap water is safe to drink, EPA prescribes regulations which limit the amount of certain contaminants in water provided by public water systems, FDA regulations establish limits for contaminants in bottled water which must provide the same protection for public health. If present, elevated levels of lead can cause serious health problems, especially for pregnant women and young children. Lead in drinking water is primarily plumbing. The Village of Maywood and City of Chicago Department of Water Management are responsible for providing high quality drinking water but can't control the variety of materials used in plumbing components. When your water has been sitting for several hours, you can minimize the potential for lead exposure by flushing your tap for 30 seconds to 2 minutes before using your water for drinking or cooking. If you are concerned about lead in your water, you may wish to have your water tested. Information on lead in drinking water, testing methods, and steps you can take to minimize exposure is available from the Safe Drinking Water Hotline or at <http://www.epa.gov/safewater/lead>.

If anyone has questions about this report, contact Greg Buchanan Public Works Director at 708-450-4463. For questions on meter reading and collection procedures, call the Water Department at 708-450-6323 or 708-450-6324. Este informe pretende ofrecer a los residentes con información importante sobre su agua potable. La fuente de agua potable utilizada por Maywood es comprada en la ciudad de Chicago. Si alguien tiene preguntas sobre este informe, póngase en contacto con Greg Buchanan at 708-450-4463. Para preguntas sobre procedimientos de colección y lectura del medidor, llame al departamento de agua al 708-450-6323.

MORE ACCURATE READINGS

The Village continues to promote the latest CDC approved health guidelines for its staff and residents concerning new and replacement meter implementation. Properly functioning meters are a necessary component for both residents and the village, assisting in providing accurate billing and consumption data. Replacement of existing inaccurate or malfunctioning meters are installed at no charge. If you are experiencing problems with a meter, call 708-450-6323 or 708-450-6324. **FAILURE TO REPORT METER PROBLEMS MAY RESULT IN INCREASED CHARGES OF WATER SERVICES.** For your convenience, the Village of Maywood offers online bill payment at www.maywood-il.gov. You can pay with Visa, Discover, Mastercard and American Express. Desde el inicio Maywood había actualizado Sistema de medición el 99% de los medidores por todo el pueblo se han instalado y ahora están siendo actualizado con precisión. Nuevos medidores están instalados de forma gratuita y obligatoria. Si aun no tienes un nuevo medidor, llame al 708-450-6323. Incumplimiento puede resultar en la pérdida de servicios de agua. Para su comodidad, el pueblo de Maywood ofrece pago de facturas en línea en www.maywood-il.gov. Se puede pagar con Visa, Discover, MasterCard y American Express.

Maywood Sprinkling Ordinance

A friendly reminder: Lawn sprinkling shall NOT be permitted between the hours of 9am and 6pm daily during the period of May 15 - September 15. Un recordatorio amigable: rociada de césped no se permitirán entre las horas de 9am y 6pm todos los días durante el del 15 Mayo al 15 de Septiembre.

2024 Water Quality Data

DATA TABULATED BY CHICAGO DEPARTMENT OF WATER MANAGEMENT
0316000 CHICAGO

Maximum Contaminant Level Goal (MCLG): The level of a contaminant in drinking water below which there is no known or expected risk to health. MCLGs allow for a margin of safety.

Maximum Contaminant Level (MCL): The highest level of a contaminant that is allowed in drinking water. MCLs are set as close to the MCLGs as feasible using the best available treatment technology.

Highest Level Detected: This column represents the highest single sample reading of a contaminant of all the samples collected in 2024.

Range of Detections: This column represents a range of individual sample results, from lowest to highest that were collected during the CCR calendar year.

Date of Sample: If a date appears in this column, the Illinois EPA requires monitoring for this contaminant less than once per year because the concentrations do not frequently change. If no date appears in the column, monitoring for this contaminant was conducted during the Consumer Confidence Report calendar year.

Treatment Technique (TT): A required process intended to reduce the level of a contaminant in drinking water.

N/A: Not applicable

DETECTED CONTAMINANTS

| Contaminant (unit of measurement) Typical source of Contaminant | MCLG | MCL | Highest Level Detected | Range of Detections | Violation | Date of Sample |
|--|--|--------------------------------|----------------------------|---------------------|-----------|----------------|
| Turbidity Data | | | | | | |
| Turbidity (NTU/Lowest Monthly % ≤ 0.3 NTU) Soil runoff | N/A | TT (Limit: 95% ≤ 0.3 NTU) | Lowest Monthly %: 99.7% | 99.7% - 100% | | |
| Turbidity (NTU/Highest Single Measurement) Soil runoff | N/A | TT (Limit 1 NTU) | 0.39 | N/A | | |
| Inorganic Contaminants | | | | | | |
| Barium (ppm) Discharge of drilling wastes; Discharge from metal refineries; Erosion of natural deposits | 2 | 2 | 0.0203 | 0.0198 - 0.0203 | | |
| Nitrate (as Nitrogen) (ppm) Runoff from fertilizer use; Leaching from septic tanks, sewage; Erosion of natural deposits | 10 | 10 | 0.39 | 0.36 - 0.39 | | |
| Total Nitrate & Nitrite (as Nitrogen) (ppm) Runoff from fertilizer use; Leaching from septic tanks, sewage; Erosion of natural deposits | 10 | 10 | 0.39 | 0.36 - 0.39 | | |
| Total Organic Carbon (TOC) | | | | | | |
| TOC | The percentage of TOC removal was measured each month and the system met all TOC removal requirements set by IEPA. | | | | | |
| Unregulated Contaminants | | | | | | |
| Sulfate (ppm) Erosion of naturally occurring deposits | N/A | N/A | 28.2 | 25.3 - 28.2 | | |
| Sodium (ppm) Erosion of naturally occurring deposits; Used as water softener | N/A | N/A | 9.18 | 8.87 - 9.18 | | |
| State Regulated Contaminants | | | | | | |
| Fluoride (ppm) Water additive which promotes strong teeth | 4 | 4 | 0.76 | 0.67 - 0.76 | | |
| Radioactive Contaminants | | | | | | |
| Combined Radium (226/228) (pCi/L) Decay of natural and man-made deposits. | 0 | 5 | 0.95 | 0.83 - 0.95 | | 02-04-2020 |
| Gross Alpha excluding radon and uranium (pCi/L) Decay of natural and man-made deposits. | 0 | 15 | 3.1 | 2.8 - 3.1 | | 02-04-2020 |

Fifth Unregulated Contaminant Monitoring Rule (UCMR 5)

As required by UCMR 5, EPA's latest monitoring cycle, the City of Chicago has completed monitoring for 25 perfluorinated & polyfluorinated alkyl substances, 4 perfluorinated alkyl acids, and lithium in its drinking water for four quarters in 2024. None of the contaminants were detected in our drinking water.

Units of Measurement

ppm: Parts per million, or milligrams per liter

ppb: Parts per billion, or micrograms per liter

NTU: Nephelometric Turbidity Unit used to measure cloudiness in drinking water

% ≤ 0.3 NTU: Percent of samples less than or equal to 0.3 NTU

TURBIDITY

Turbidity is a measure of the cloudiness of the water. We monitor it because it is a good indicator of water quality and the effectiveness of our filtration system and disinfectants.

UNREGULATED CONTAMINANTS

A maximum contaminant level (MCL) for this contaminant has not been established by either state or federal regulations, nor has mandatory health effects language. The purpose for monitoring this contaminant is to assist USEPA in determining the occurrence of unregulated contaminants in drinking water, and whether future regulation is warranted.

FLUORIDE

Fluoride is added to the water supply to help promote strong teeth. The Illinois Department of Public Health recommends an optimal fluoride level of 0.7 mg/L with a range of 0.6 mg/L to 0.8 mg/L.

SODIUM

There is no state or federal MCL for sodium. Monitoring is required to provide information to consumers and health officials who have concerns about sodium intake due to dietary precautions. If you are on a sodium-restricted diet, you should consult a physician about the level of sodium in the water.

SOURCE WATER ASSESSMENT SUMMARY**Source Water Location**

The City of Chicago utilizes Lake Michigan as its source water via two water treatment plants. The Jardine Water Purification Plant serves the northern areas of the City and suburbs, while the Sawyer Water Purification Plant serves the southern areas of the City and suburbs. Lake Michigan is the only Great Lake that is entirely contained within the United States. It borders Illinois, Indiana, Michigan, and Wisconsin, and is the second largest Great lake by volume with 1,180 cubic miles of water and third largest by area.

Source Water Assessment Summary

The Illinois EPA implemented a Source Water Assessment Program (SWAP) to assist with watershed protection of public drinking water supplies. The SWAP inventories potential sources of contamination and determined the susceptibility of the source water to contamination. The Illinois EPA has completed the Source Water Assessment Program for our supply.

Susceptibility to Contamination

The Illinois EPA considers all surface water sources of community water supply to be susceptible to potential pollution problems. The very nature of surface water allows contaminants to migrate into the intake with no protection, only dilution. This is the reason for mandatory treatment of all surface water supplies in Illinois. Chicago's offshore intakes are located at a distance where shoreline impacts are not usually considered a factor on water quality. At certain times of the year, however, the potential for contamination exists due to wet-weather flows and river reversals. In addition, the placement of the crib structures may serve to attract waterfowl, gulls and terns that frequent the Great Lakes area, thereby concentrating fecal deposits at the intake and thus compromising the source water quality. Conversely, the shore intakes are highly susceptible to storm water runoff, marinas and shoreline point sources due to the influx of groundwater to the lake.

Further information on our community water supply's Source Water Assessment Program is available by calling DWM at 312-742-2406 or by going online at <http://dataservices.epa.illinois.gov/swap/factsheet.aspx>

2024 VOLUNTARY MONITORING

The City of Chicago has continued monitoring for Cryptosporidium, Giardia and E. coli in its source water as part of its water quality program. No Cryptosporidium or Giardia was detected in source water samples collected in 2024. Treatment processes have been optimized to provide effective barriers for removal of Cryptosporidium oocysts and Giardia cysts in the source water, effectively removing these organisms in the treatment process. By maintaining low turbidity through the removal of particles from the water, the possibility of Cryptosporidium and Giardia organisms getting into the drinking water system is greatly reduced.

In 2024, CDWM has also continued monitoring for hexavalent chromium, also known as chromium-6. USEPA has not yet established a standard for chromium-6, a contaminant of concern which has both natural and industrial sources. Please address any questions or concerns to DWM's Water Quality Division at 312-744-8190. Data reports on the monitoring program for chromium-6 are posted on the City's website which can be accessed at the following address below:
