Why Do I Need A Sign? A 911 address is the physical address of your structure. When you dial 911 in an emergency, this is the location where help will be sent. 911 address signs are highly visible day or night and make your house clearly and easily identifiable from the street so that first responders can provide life-saving services to you and your family by quickly finding your house during an emergency.

Sign Size: All address signs are around 12-18 inches long (depending on # length) and 6 inches wide.

Number Height: Numbers on each sign will be 4 inches high with a minimum stroke width of 1/2 inches per NFPA guidelines.

Visibility: Address numbers and sign background are made of reflective materials.

Placement: Address signs must be placed in a plainly legible position and visible from the street or road fronting the property.
