DRIVEWAY CULVERT INSPECTION

Article 6.6 Road-Driveway Requirements prohibit the installation or construction of a driveway that restricts or obstructs the flow of water on the county right of ways; such ordinance requires the installation of a ***county approved*** culvert pipe.

A stake (provided by the customer) with a copy of this application attached will need to be placed in the ditch at the center of your planned driveway.

Once you have staked the driveway you will need to contact the Road Department to let the know you are ready for evaluation.

Polk County Road Department ***770-749-2132***

69 Cline Ingram Jackson Rd

Cedartown, GA 30125

The Road Department will inspect the proposed driveway site or existing driveway and determine if a pipe is needed, the size of the pipe, and the cost of the pipe.

If your driveway is on a state highway, you must obtain a driveway permit from the State Highway Department.

You must have a completed Driveway Culvert Certification form before any permits will be issued.
