SOUTH ADAMS COUNTY WATER
AND SANITATION DISTRICT

2016 INDUSTRIAL PRETREATMENT PROGRAM
NON-RESIDENTIAL USER FEE SCHEDULE

1) NON-RESIDENTIAL USER IS DEFINED AS ANY USER DISCHARGING WASTEWATER INTO THE POTW FROM A PLACE OF BUSINESS.

2) INDUSTRIAL USER PERMIT ADMINISTRATION FEE

$1,421.47 PER YEAR

For all non-residential users, considered by the Industrial Pretreatment Coordinator to be Significant Industrial Users, and, therefore, requiring a Wastewater Discharge Permit.

3) ZERO DISCHARGE CATEGORICAL INDUSTRIAL USER PERMIT ADMINISTRATION FEE

$710.74 PER YEAR

For all non-residential users, employing categorical processes that, in the judgment of the Industrial Pretreatment Coordinator, do not discharge or have the potential to discharge regulated materials or regulated pollutants to the POTW.

4) INDUSTRIAL USER COMPLIANCE MONITORING AND SAMPLING FEES

<table>
<thead>
<tr>
<th>Contracting Laboratory Costs:</th>
<th>100 % Paid By Industrial User</th>
</tr>
</thead>
<tbody>
<tr>
<td>District Laboratory Costs:</td>
<td>Current Local Contracting Rate</td>

<tr>
<td>Sample Collection, Equipment:</td>
<td>$ 177.69 District Sampling Fee</td>
</tr>
<tr>
<td>Preparation, Data Review, Etc.</td>
<td>$ 5.92 pH Sampling Fee</td>
</tr>
<tr>
<td>All overdue Wastewater:</td>
<td>$ 59.23 Penalty and Letter of Violation. Questionnaires</td>
</tr>
</tbody>
</table>

5) BOD AND TSS NON-RESIDENTIAL SURCHARGES

All non-residential users which discharge a waste with five-day biochemical oxygen demand (BOD5) and total suspended solids (TSS) greater than that of the average wastewater treatment plant influent shall pay surcharges in addition to permit and connection fees. These surcharges will be sufficient to cover the cost of treating wastes above normal strength. Normal strength influent wastes of the South Adams County Water and Sanitation District treatment plant have an average BOD-5 of 272 mg/L and
average TSS of 264 mg/L. The following formula shall be utilized in computing the monthly or quarterly surcharge.

\[ Cs = (Vt)(8.34)[A(BOD5 - 272) + B(TSS - 264)] \]

Cs = A user's surcharge for treatment of pollutant concentrations in excess of those present in normal treatment plant sewage per unit time.

Vt = Total volume contributed in million gallons from a non-residential user per unit of time.

8.34 = Conversion factor for converting mg/L to pounds per gallon.

A = Unit charge for BOD in dollars per pound = $0.45

BOD5 = Five-day biochemical oxygen demand strength index in mg/L indicative of waste in question.

272 = South Adams County Water and Sanitation District's standard BOD5 strength in mg/L.

B = Unit Charge for suspended solids in dollars per pound = $0.45

TSS = Total suspended solids strength index in mg/L indicative of waste in question.

264 = South Adams County Water and Sanitation District's standard TSS strength in mg/L.

The non-residential user shall pay 100% of the monitoring costs incurred by the District in establishing the user's surcharge.

The District reserves the right to restrict BOD and TSS loading rates if levels are sufficient to interfere with the wastewater treatment processes.

6) VOLUME SURCHARGE

A $29.89 per 1000 gallon fee shall be applied to non-residential discharges that originate from the following sources:

A) Centralized wastewater collection and/or treatment companies. Note: This wastewater shall be accepted by the District only if preapproved by Industrial Pretreatment Coordinator, the Board of Directors, and permitted prior to discharge.

B) Permitted discharges of storm water, surface water, groundwater, roof runoff, or
subsurface drainage, commercial or industrial wastewater. Note: Storm water, surface water, groundwater, roof runoff, subsurface drainage shall be accepted by the District only if preapproved by the Industrial Pretreatment Coordinator, the Board of Directors, and permitted prior to discharge.

7) SAND/OIL AND GREASE INTERCEPTOR INSTALLATION INSPECTION FEE

A $236.91 interceptor inspection fee shall be applied to all new interceptor installations.
