

Above: status photo showing Columbarium 3 under construction. Mark Gherardi graciously invited Alan and I to the plant floor for a few photos of the construction progress. Photos taken 13 November.  
Below: a view of how a shutter fits onto the niche. The structure will be cleaned up prior to delivery.

Above: The parts and pieces that make up the niches are held in place using some kind of epoxy and small plastic wedges while the epoxy dries.  
Below: an organized pile of parts and pieces awaiting assembly. Note the numbers on the individual pieces, these numbers correspond to those shown on the shop drawings provided to the cemetery commission.
