EXIT DRILLS IN THE HOME

When fire strikes...you may have less than one minute to safely get out of the building. Most fire occur in residential homes between 11:00pm and 8:00am. Having working smoke detectors and a fire escape plan can reduce your risk of injury or death.

SURVIVAL IS SIMPLE:

- 1) Install smoke detectors AND keep them in working order.
- 2) Make an escape plan AND practice it regularly.
- 3) React immediately at the first sign of fire.

FIRE FACTS:

- 1) Fires are fast.
 - Fires double in size every minute.
- 2) Fires are dark.
 - Fires create thick, black, choking smoke which makes it impossible to see and breathe.
- 3) Fires produce heat, smoke, and toxic gases.
 - Smoke alarms warn residents in the event of a fire.
 - Smoke alarms give you time to leave the house before your escape route is blocked by deadly smoke, heat and toxic gases.
 - When the smoke alarm sounds..... GET OUT AND STAY OUT!
